Who We Are

“STS are and always have been a **family run business**. This is something we carry through into our company **values**. We treat our customers as an extension of our own STS family and we go above and beyond to create **relationships** that last and prosperous endeavours for us all.

There is no traffic in the extra mile and we like to know we have supported you in every way we can, from technical knowledge to account management.

We are here to help you grow.”

Eddie Burrowes

Managing Director | STS

A Family Business With Close Working Relationships With The Trade.

STS creates, manufactures and distributes building systems that deliver a clear competitive advantage. All products are tried and tested to consistently outperform alternatives, and all systems come with lifetime guarantees for the user's complete peace of mind. Our customers' reputations rest on the quality of our products, so we stop at nothing to make sure consistent reliability and 'first time, every time' performance.

We believe this is paramount and sets us apart as a supplier. Our technical helpline is available to stockists and end users alike to help deliver on our promise - making the working day easier for our customers.

We want our customers to leave every experience with us feeling happy and it's the responsibility of every staff member to make sure that happens - from the point of order, to picking and packing, through to delivery.

What We Do

We manufacture and distribute a range of boarding and wetroom systems, as well as tiling supplies including trims and tools. Our installers really value the lifetime guarantee we offer and tell us our products are easy to fit and easy to use.

We're Different Because We Invest In Our Merchant Relationships.

By sharing industry knowledge and retailing best practice, we create and implement personalised training programmes to make sure our customers grow profitably.

Our Business Development Managers will help your staff engage with the trade, stimulate trial and encourage repeat purchase. They give practical advice and hands-on support with trade events, product promotions, merchandising and tailored points of sale.

When you buy from STS you get the reassurance that you are buying from the best in the industry. Our market leading brands **NoMorePly**, **Beava** and **Kaskade** have built up a following because they are successful and they do exactly what they say they do. Quality products from a brand built on trust, honesty and integrity.

THE WET-ROOM SHOWER TRAY

Our Values

This is the code by which we run our business. We believe in Trust, Honesty and Integrity above all else. We pride ourselves on not only having these values but also the personal attributes below.

Industrious:

Everyone works hard. You may say, of course we all do, but our team is dedicated to make things happen above and beyond.

Cheerful:

There's nothing like laughter even when things aren't going exactly to plan. A smile says so much - even over the telephone.

Creative:

We are always thinking outside of the box - If there ever was a box here at STS we're not sure where it is now! We love to look at new ways of working and innovation is a priority.

Sound family values:

We are a family business, and always will be. We trust and respect each other and expect everyone to be honest and loyal.

“STS have a **great** product range, especially the 12mm Construction Boards that work in just about every situation. Having one board makes it way easier for us to stock and sell, plus their **support** at branch level has been **excellent**.

They came to us offering an all in **One Board** to cover **multiple applications**, and proved by support and tenacity, this was correct and sales of this range is growing well above other products we are carrying.”

Jonathan Hick
Bradford's Building Supplies
Category Manager

Our Customer Promise

STS is a family business with a close working relationship with the trade. Established in 1995, STS was born out of the desire to do better and the need to bring tiling professionals across the UK fresh solutions to everyday problems.

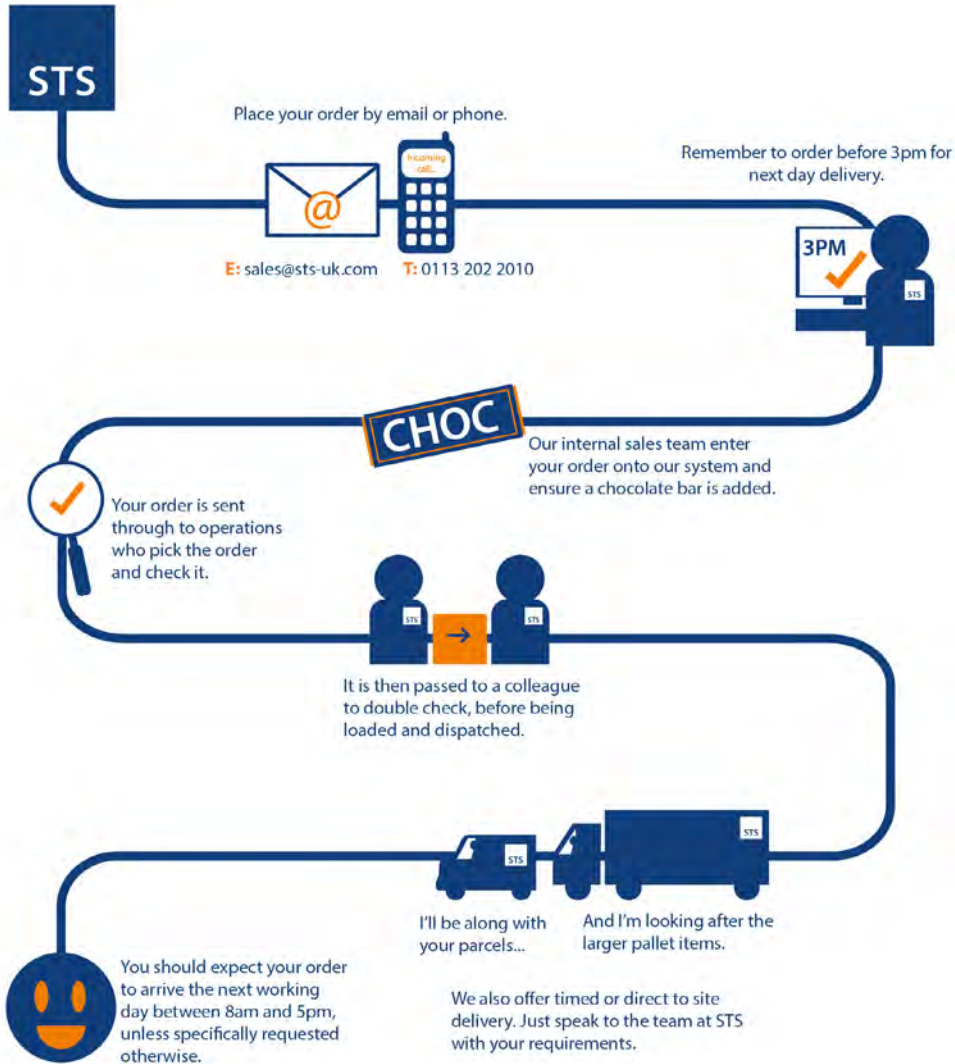

The driving force behind the STS team is not merely to meet industry standards, but to exceed and redefine them, and in doing so, bring our customers a clear competitive advantage.

Put simply, we innovate, not imitate to keep our clients one step ahead of the game. We take pride in our customer service in all areas of the business, as we believe that customer experience is paramount.

We want our customers to leave every experience with us feeling happy, and we believe that it's the responsibility of every staff member to ensure that happens - from the point of order, to picking and packing, to delivery.

STS BUILDING SYSTEMS

The First Manufacturer To Give A Lifetime Guarantee

STS are the first manufacturer to give a lifetime guarantee on all our products provided they are fitted as a system using our fixing materials.

We listened to installers and created a great range of products to meet their needs, specifier's preferences and the latest building regulations. Our systems are easy to install, efficient and they do the job better.

Whether you or your customers are busy creating en-suites, installing bathrooms, building loft conversions or extending into basements, our products should be part of your range.

1. 6MM FIBRE CEMENT BOARD

Prevents cracked grout lines by removing movement and the 'bounce' in timber floors before tiling. Professionals prefer **NoMorePly** because it's quick and easy to use, plus its the first system with a lifetime guarantee.

2. 12MM CONSTRUCTION BOARD

Stronger than plasterboard and essential in wet /damp areas. With fire resistant and sound absorbing properties, 12mm boards are perfect for loft conversion partition walls and to create en-suites, ready to tile.

3. WETROOM TRAYS

Kaskade and **NoMorePly** trays have a unique rebate that fits perfectly with our 6mm boards to ensure a waterproof promise. STS Kaskade trays fit directly onto joists or into solid surfaces, we have easy fitting systems for tile or vinyl.

4. MEGA TANKING KIT (8M²)

Includes **NoMorePly** unique one-coat tanking membrane. Fast drying, ready to tile in approx. 2 hours. Plus, advanced tanking primer to improve adhesion. 10m of self-adhesive joint sealing tape, brush and gloves. Low odour and eco-friendly.

NoMorePly[®] Boarding Solutions

The System

1. Prime solid walls with SBR (1 part SBR to 3 parts water) before boarding
2. Use 12mm STS Construction Board on solid walls - prime the boards on both sides then 'dot and dab' with tile adhesive
3. Use 12mm STS Construction Board fixed with MEGA Strength and screws for boarding wood/metal stud walls
4. Use 6mm NoMorePly fixed with MEGA Strength and screws when over boarding timber floors. Use 6mm fixed with flexible rapid-set tile adhesive onto old concrete floors
5. Always use a good quality single part flexible adhesive for fixing tiles
6. Use MEGA Strength on all joints for extra strength and complete waterproofing.

Used to strengthen timber floors before tiling - Its quick, easy to handle, cut and lay. It's thin, so avoids any unwanted step and it's water resistant, unlike plywood which weakens when damp. Its cut using a 'score and snap' technique, then stuck and screwed into place. Tiling can start immediately after fixing the boards. This system comes with a lifetime guarantee.

Stock Code	Size	Bulk QTY
5600	1200 x 600 x 6mm	150

STS Construction Boards

STS 6mm Construction Board

Primarily designed to overboard floors and walls instead of plywood helping to eliminate problems caused through warping and movement. It is completely unaffected by moisture and has a lateral strength equivalent to 18mm plywood. This means that 6mm boards are ideal for over-boarding solid walls prior to tiling and they are the first board to come with a lifetime guarantee.

STS 9mm Construction Board

Suitable for internal and external use. Impervious to moisture and A1 Fire Rated. The 9mm STS Construction board has numerous applications including over boarding timber floors prior to tiling, especially in large scale projects. Other uses include, cavity closure, eaves board, under canopies, or as a ceiling board where fire rating is required.

STS 12mm Construction Board

For both internal and external use. It is a stronger partition walling material than plasterboard and a first choice for wet areas. Impervious to moisture, it's the preferred substrate to carry large, heavy wall tiles. It's impact resistant, providing a tough, long lasting walling material with a solid feel to touch. Securing fixings, such as towel rails, are no problem and it comes with an A1 fire rating, so it's ideal to line out fireplaces before tiling and installing log burners. It's a versatile board that suits lots of applications, including for external use as a render board.

Professionals choose **STS Construction Board** for its range of uses and for peace of mind

STS fibre cement construction boards can be used in a wide range of applications both internally and externally, covering 4 key areas including fire protection, sound reduction, moisture resistance and render application.

A1 fire resistant board means that your structure will be safer in the event of a fire outbreak, potentially saving people's lives.

Makes ideal partition walling in damp or wet areas, such as bathrooms. It's also weather resistant, so can be exposed to poor weather on site during the construction phase without concern. A weather protective coating is required for permanent exposure.

Faster to fit than laying blocks, it's an ideal alternative to masonry substrates for domestic and commercial applications.

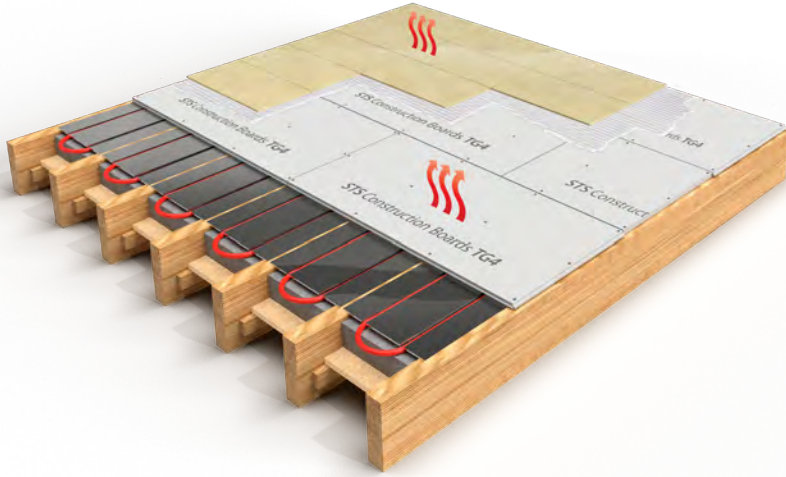

A stronger build means these boards can withstand surface impact, making the finish more durable and longer lasting, especially in high traffic areas prone to damage.

Made up of compacted cement with fibres, STS 12mm Construction Board has exceptional strength properties. It also accepts wall mounted fixings without the need to secure to stud beams.

Boards are easily fixed to timber or metal stud work, and to solid walls using STS fixing products.

Features	Benefits
100% recyclable	Easy to dispose of waste on site
High thermal mass	Capacity to store and release heat, according to surrounding
Non-combustible	Can be used as fire protection
Water resistant	Not effected when in contact with moisture
Heavy duty	Ideal for high traffic and vulnerable areas
Highly durable	Suitable for external and internal application

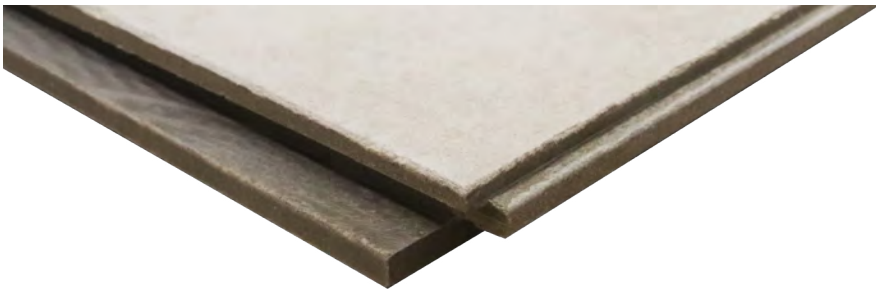

18/22mm STS Construction Board TG4

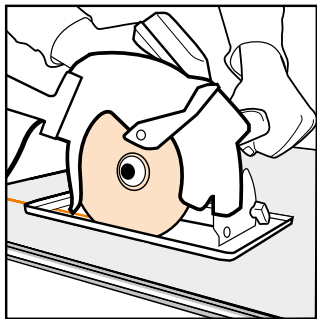

These boards replace the need for both timber and over-boarding with a single board. Guaranteed no squeak flooring, it's quick and simple to lay. We have seen developers switching to our 18 and 22mm to gain commercial economies of scale through its speed and ease of application. It's easy to order from STS and boards can be delivered next day to branch or direct to site, plus they're resistant to poor weather, so won't be damaged on site unnecessarily. The 4 sided TG means quick and easy fitting.

Stock Code	Size	Bulk QTY

5518	TG4 1200 x 600 x 18mm	50

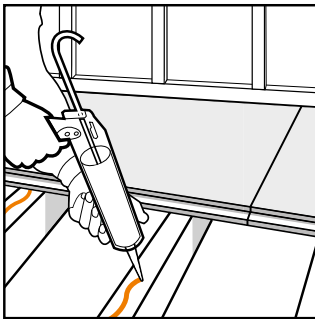

STS 18/22mm Construction Board TG4 Installation

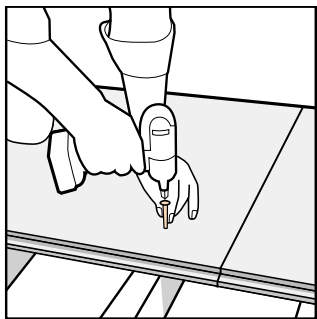

1. Cut boards to size

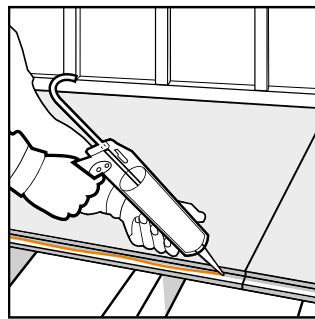

2. Stick board to joists

3. Screw board to joists

4. Seal between boards

REDUCE WASTE
NO NEED TO JOIN ON A JOIST!

STS 18/22mm Construction Boards TG4

Cut STS 18/22mm Construction Boards using a circular saw fixed with vacuum extractor and an STS PCD saw blade. This method will cut boards easily and mitigate dust.

STS 18/22mm Construction Boards can be fixed to timber or steel joists installed at maximum 600mm centres.

To achieve an acceptable finish, it is important that floor joists are level.

Apply a bead of STS Mega Strength adhesive to the joist, then position the first floor board.

Secure with 12 x 38mm STS Drill Tip screws, placed a minimum of 12mm from the square edge and 5mm from the side of the joist.

Ensure screws are placed a minimum distance of 25mm from the tongue and groove edge.

STS 18/22mm Construction Boards should be laid out in a brick bond pattern. T&G joints do not need to end on a joist but all short, square edges should be fully supported.

Secure subsequent 18/22mm Construction Boards by applying MegaStrength along the length of the board's groove, before inserting the tongue of the next board.

Clean off any surplus adhesive with a damp cloth.

STS 18/22mm Construction Boards are ready to tile or install other surface finish immediately.

Screw it

STS Insulated Tile Backing Boards

These boards are the perfect tile backing system for use on solid floors, providing the ideal foundation on which to lay electric underfloor heating. It's the right choice for kitchens, bathrooms, wet rooms and comes highly recommended by professional tilers.

Manufactured with a high-density polystyrene core and reinforced cement coatings on both sides, it provides a high-quality tile backer board for wet and dry areas. Boasting exceptional ease of fitting and scope for creative application, STS Insulation Board is the bathroom fitter's choice for outstanding results in tiling.

Stock Code	Size	Bulk QTY

beava[®] Backer Board

STS recognise the growing need for a no frills, low cost option whilst making no change in the high standards.

Not only does Beava backer remove the bounce in timber floors, preventing cracking tiles and grout lines the 6mm depth removes the "step" into the tiles area. Our Beava Backer Boards are also water resistant, they don't rot, swell or de-laminate like plywood even in the wettest conditions. They are also strong fibre cement boards for use with large heavy tiles.

MATTING SYSTEMS

Why professionals choose

Beava® Matting Systems

When it comes to laying down the work before tiling, we know our stuff. Beava® Matting systems offer a range of options to suit your budget and the job at hand. We know our systems are tried and tested and so do the professionals who use them with confidence. Our systems are not only proven to be reliable but they are quick to fit and easy to use - this means less time on the task at hand while you move on to the next step.

Why use matting systems before tiling?

When you are laying expensive new tiles, the last thing you want is for those tiles to crack from movement underneath. Using a matting will help to reduce the chances of faults occurring, meaning your tiles and floors not only last longer and look better, but you don't have to deal with the headache of having to replace it 6 months down the line.

The Beava® Matting Options

Anti-Crack Mat:

A cost effective, waterproof, fast fit and low profile solution for anti-crack matting.

Anti-Crack Mat PRO:

Designed to waterproof and protect tile installations from cracked substrates and lateral movement.

SANDIMAT®:

A technologically advanced decoupling mat, designed to prevent the failure of tiled floors.

Anti-Crack Mat

A thin, waterproof, anti-crack membrane that is quick and easy to install. Anti-Crack Mat can help to accommodate for the lateral movement in substrates. Specifically designed for areas where waterproofing is required, this in turn helps to reduce cracks through the soft polyethylene material.

An ideal as a base for tiles, as it helps to reduce the chances of cracked grout or tiles by removing the movement and can be used in medium trafficked floor areas. Anti-Crack Mat is ideal for use in wet and dry environments as it is waterproof and can be used in conjunction with anhydrite screeds. A great, cost effective choice for an anti-fracture matting.

Stock Code	Size	Bulk QTY
5997	20m	3

Anti-Crack Mat PRO

Anti-Crack Mat PRO is a premium matting system designed to waterproof and protect tile installations from cracked substrates and lateral movement in high traffic areas. The polyethylene membrane, coupled with the fleece underside, means Anti-Crack Mat PRO is an ideal option to use with most substrates and applications. Like Anti-Crack Mat, Anti-Crack Mat PRO is a de-coupling mat with waterproofing properties and the ability to evenly distribute heavy loads, meaning cracking tiles and grout are a thing of the past.

Stock Code	Size	Bulk QTY
6000	30m	9

SANDIMAT®

SANDIMAT® is a technologically advanced decoupling mat, designed to prevent the failure of tiled floors, caused by movement in solid floors, including heated anhydrite screeds. With its high tensile strength, SANDIMAT® allows for lateral movement in the substrate, whilst protecting the tiled floor above.

WETROOM SYSTEMS

We offer a unique range of structural and non-structural wetroom trays ready to tile straight onto. Our one of a kind, 6mm rebate means that our trays can be used directly in conjunction with 6mm Pre-Primed **NoMorePly** boards to create the ideal substrate ready to tiling.

The Complete wetroom solution

The Kaskade tray is ultra slim, constructed from resin reinforced GRP making it a super strong, high quality wetroom shower tray. Its unique rebated edge provides an extra waterproof barrier and fits within existing floor boards directly on to the joists. This removes the need for under boarding, creating a step-free access to the showering area, making it the ideal choice for en-suites, bathrooms and care applications.

- Super strong
- Self supporting
- Fastest fit
- Pre-primed
- Rebated edge
- Suitable for all tiles & vinyl
- **NEW Lighter material**

NoMorePly[®]

Our **NoMorePly** tray is the low cost alternative to Kaskade. Constructed from high density, extruded polystyrene sandwiched between a reinforced cement and fibreglass layer. It features the same unique rebated edge and fits into existing floor boards, creating the same step-free access to the showering areas as mentioned above. The **NoMorePly** tray does require under-boarding for support.

- Light weight
- Easy to cut
- Rebated edge
- Low cost
- Suitable for most tiles

You spoke. We listened.

NEW, LIGHTER KASKADE TRAY

Manufactured in the UK

New light-weight technology.

Same reliable strength!

25 Year guarantee

 Kaskade®

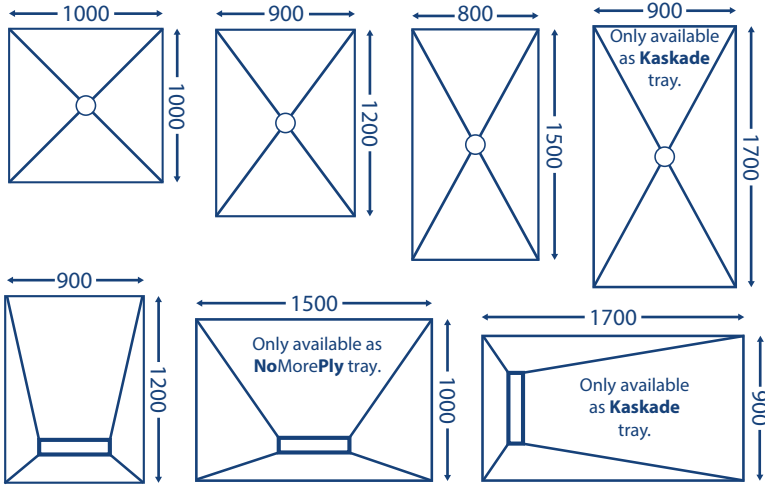

Ordering your wetroom products is really simple.

1. Choose your trap and grate

2. Choose your tray

Our trays are 28mm thick, 22mm around the edge with a 6mm rebate to accept the 6mm Pre-Primed **NoMorePly** board.

3. Choose your wet floor kit

STS wetroom kits include everything you need to overboard the floor and waterproof the complete showering area prior to tiling.

All kits are suitable for Kaskade and NoMorePly Systems.

Kaskade Wetrooms

As wetroom specialists, we know that modern, cleaner looking linear trays are becoming increasingly popular. Which is why we added to our Kaskade range with a 1200 x 900 linear tray, designed to create the perfect wetroom. So now you can benefit from the unrivalled quality of Kaskade in a stunning linear design. After customer feedback we made some changes to our trays, we've reduced the weight so now they are much lighter but you still get the same, strong and quality tray you had before.

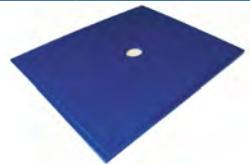

Available in 7 formats, Kaskade's one-piece shower bases fit flush with the floor, ready for tiling over. A built-in fall to the centre of the base, fitted with a Kaskade shower trap, ensures rapid drainage to keep up with the most powerful of showers. The rebated base edge accepts 6mm **NoMorePly** tile backer boards, creating a watertight seal to the adjoining surfaces.

Mega Tank One-Coat Tanking

Stock Code	Size	Bulk QTY
5588	8m ²	8

THE MEGA TANK KIT CONTAINS:

- 3kg BLUETANK™ Membrane
- 1kg TANKING™ Primer
- 10m Tape
- Block Brush
- Latex Gloves

Why our MEGA Tank Kit is so successful:

- One-coat and dry in 2 hours means fast application
- Super primer with quartz particles for excellent adhesion
- Self-adhesive tape with split back making installation easy
- Everything in the bucket you need to do the job
- Low odour & emissions means Eco-Friendly
- Lifetime guarantee for complete peace of mind
- Coverage is approximately 8m²

Megatape & Double Mega Tape

Stock Code	Size	Bulk QTY
5848	10m	10

Providing highly effective sealing of corners and joints, waterproof Joint-Sealing Tape is a robust and totally water resistant material. Its flexible construction and split back makes it easy to apply and manipulate into corners, removing the need for pre-formed corner pieces.

Stock Code	Size	Bulk QTY
5857	2.5m	10
5856	3.2m	10
5855	25m	5

Double Megatape has all the qualities of the standard Megatape but it's double sided to allow for easy adhesion between baths, shower trays and walls. It is fast and simple to use, flexible and provides you with a tidy fit to corners.

Megalastic Wetroom Tile Adhesive 5kg

Stock Code	Size	Bulk QTY
5621	5kg	5

Offering exceptional strength and water-resistance, Megalastic is a professional adhesive for wetroom tiling, suitable for use with underfloor heating. Based on advanced technology, the 2-part construction cures to a clean white finish, and provides a waterproof membrane on to the walls and floors to which it is applied.

Coverage: Approx. 2m² per tub.

Megaseal Waterproof Membrane 4kg

Stock Code	Size	Bulk QTY
5850	4kg	10

Megaseal is a heavy duty tanking membrane that provides a 100% watertight seal that is clearly visible when applied. Drying to a thick, grey membrane, its elastic properties allow for movement in the walls and the floors, but bonds any loose-surface elements to a stable finish ready for tiling. Not just for wetrooms - Megaseal is an extremely versatile material and can be used as a damp proof membrane in many situations, like garage and shed walls and for tanking out basements.

Coverage: Approx. 12.5 m² per tub based on 2 coat tanking.

Mega Power Sealant 290 ml

Stock Code	Colour	Size	Bulk QTY
5622	White	290ml	12
5623	Crystal Clear	290ml	12

Based on advanced technology, Mega Power sealant will bond and seal virtually anything to everything. Providing a long-lasting, totally waterproof finish, Mega Power sealant is perfect for every bonding and sealing requirement in your wetroom, where a fast setting time is not required. It is easy to apply, and provides a clean finish.

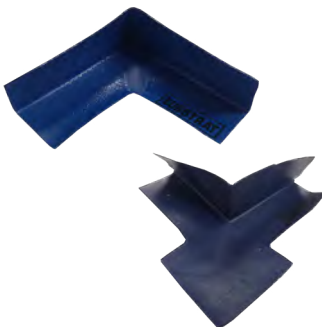

KASKADE Concrete Fixing Kit

Stock Code	Box
5808	1

The KASKADE concrete fixing kit comes complete with 4 stainless steel anchors, 2 rubber strips and one tube of Mega Power Sealant as well as the Mega Tanking Kit.

Mega Waterproof Preformed Corner Piece

Stock Code	Type	Box
5920	Internal	1
5925	External	1

The quickest and most reliable method of waterproofing external and internal corners in any wet area. Use Mega Power Sealant to adhere them in place.

MAXILEVEL SYSTEM

ACHIEVE PERFECT TILE LEVELLING
IN A FRACTION OF THE TIME.

1. How to use the spacer clips:

- Once you have laid the tile onto the adhesive, insert one side of the spacer clip under the tile - Do this on all 4 sides.
- Use a minimum of 2 clips per edge of the tile.
- Set the next tile.

2. How to use the wedge:

- Insert the wedge into the spacer clip.
- Using the Beava Pliers push the wedge into place.

3. How to remove the Spacer:

- Once the adhesive sets remove the wedge and the visible portion of the clip, using a rubber mallet or foot.
- Simply knock the spacer clip and wedge to remove.

The MAXILEVEL™ System is designed to assist in getting perfectly level tiling every time, even when using large format tiles of varying thickness's.

- Only one spacer and wedge required per corner joint.
- Prevents tile from moving during the installation.
- Requires minimal effort to install and remove.
- Virtually eliminates uneven tiles.
- Versatile range of spacers to suit majority of tiles (1, 2 & 3mm).

Adhesives & Grouts

With a quality range of adhesives, grouts and self levellers to suit most rooms, spaces and applications we know you will find the product you need for your next job.

Our adhesives are available in both white and grey for the most part and include both rapid setting and flexible fibre-reinforced adhesives among others. Our grouts also come in a range of colours making their application perfect for a range of rooms and styles.

Adhesives

Benferflex C2

Benferflex C2 is a very flexible fibre-reinforced white adhesive made from high strength cements. C2 is perfect for floor and wall tiling and has excellent resistance to vertical sliding. Ideal for use with underfloor heating and heated screeds. One 25kg bag of C2 will cover approximately 4 - 6m². With an application thickness's up to 15 mm making perfect for large areas. Tested in accordance with EN 12004, C2 F S1.

Stock Code	Type	Bulk QTY
2915	White 25kg	48

Benferflex Rapido

Available in white and grey, is a special quick setting adhesive for interior and exterior laying of floorings and covering. It consists of high-strength cement, synthetic resins and special additives. With a 3 hours setting time, 20 minutes in the bucket - one 20kg bag covers 4-5m². Its is ideal for use with marble, granite, natural stone and porcelain and ceramic tiles. Benferflex is also tested in accordance with EN 12004, C2 F S1.

Stock Code	Type	Bulk QTY
2925	White 20kg	56
2920	Grey 20kg	56

Megalastic Wetroom Tile Adhesive 5kg

Offering exceptional strength and water-resistance, Megalastic is a professional adhesive for wetroom tiling, suitable for use with underfloor heating. Based on advanced technology, the 2-part construction cures to a clean white finish, and provides a waterproof membrane on to the walls and floors to which it is applied. Coverage: Approx. 2m² per tub.

Stock Code	Size	Bulk QTY
