COMPANY PROFILE

Bluebird Fixings was formed in August 1988 by the then four directors of the business. The aim, at the time, was to produce for sale a new concept for connecting new walls to existing buildings at right angles, such as garage extensions. This item would be called the Bluebird Screwie®.

Since then, the product range has been enlarged and tailor made for Builder and Merchant alike so that door cramps, as well as wire balloons to prevent birds from nesting in chimney's and other Builders Hardware have been added. These have complemented other refurbishment items and roofing products already being produced.

The continued success that Bluebird Fixings has enjoyed is due to the simplicity and practicality of its product range and continuing to provide an ever increasing customer base within the construction and allied industries, with Quality Service, Fair Pricing and Friendly Advice. Today, the Company has agents in Northern Ireland and Scotland and a full sales infrastructure for England and Wales. The Company's factory and office is based in Lincoln.

Bluebird Fixings has national contracts with all of the large builders merchants groups and most independent merchants as far apart as Jersey, Guernsey, John O' Groats and the Isle of Man. In fact our proud boast is 'Order today, delivery tomorrow'."

Having served the construction industry for over 30 years has provided Bluebird Fixings with good knowledge of the requirements Builders, Contractors, Architects and Specifiers need to complete their projects. We continually look at enhancing our product range, and are flexible when it comes to developing solutions to problems that arise, and when requests are made for bespoke items. We believe the service we provide is "second to none", and we are always improving at what we feel is "The best and most cost effective service to the construction industry".
