WHY ARISTON?

For many years, Ariston has been chosen by millions of families to improve and simplify their everyday lives, always with the highest quality and performance in mind.

Thanks to this trust, Ariston has grown to become the No. 1 manufacturer of water heaters in the world and the 3rd largest manufacturer of heating products in Europe.

In addition to a wide range of intelligent boilers and water heaters, Ariston also offers the latest renewable energy sources including solar thermal panels and heat pump water heaters.

As well as helping our customers save energy and improve their comfort, the elegance of Ariston design ensures these products suit any environment.

EVERYTHING CHANGES: SEPTEMBER 2015

Starting from 26th September 2015, ErP and energy labelling regulations will be effective in Europe for heating and water heating products (boilers, heat pumps, micro-cogeneration devices, water heaters, and hot water storage tanks).

We're committed to energy efficiency and leading the way in ecodesign. The ErP directive will help consumers and installers reduce carbon emissions and energy costs.

ErP GUIDELINES ARE SPLIT INTO TWO SECTIONS:

ECODESIGN

Ecodesign sets the minimum energy performance and environment criteria for energy products. Products must comply in order to bear a CE mark and be available for sale.

ENERGY LABELLING

All products and systems for heating, producing and storing hot water will need to be labelled with an energy classification ranging from A++ to G. These labels will make it easier to identify the most efficient products with A++ being the most economical.

THE PRODUCT LABEL

Each product type has its own label design – this example is for a Combi boiler. The label shows information to help users select the most efficient product with the lowest environmental impact (e.g. power and consumptions in different climate areas, noise etc).

This label shows the following information:

- SUPPLIER
- MODEL
- HOT WATER
- HEATING
- ENERGY CLASS (A/A++-G)
- SOUND POWER LEVEL (dB)
- RATED HEAT OUTPUT (kW)

THE SYSTEM LABEL

When an installer fits a boiler and a cylinder, or a boiler with modulating controls, this is considered a 'system'.

The installer must produce a system label that reflects the efficiency of the whole system.

This label shows the following information:

- SUPPLIER
- MODEL
- PRODUCT'S ENERGY CLASS (heating and sanitary water)
- SYSTEM'S ENERGY CLASS (heating and sanitary water)
- SOLAR COLLECTORS
- HOT WATER STORAGE
- THERMO-REGULATING DEVICE
- SUPPLEMENTARY HEATER

**NEW EUROPEAN REGULATION ErP
FROM 26TH SEPTEMBER 2015**

ALL THE RESOURCES YOU NEED AT YOUR FINGERTIPS

Electric Water Heaters

RANGE FEATURE KEY:

-  Energy Efficient
-  Super Silent
-  Compact Size
-  Italian Design
-  Titanium Plus
-  External Temperature Regulation

PICCOLO

- Open outlet electric water heater
- 5 litre capacity
- External temperature control
- Heating indicator light
- 9 minute reheat time
- Equipped with directional spout
- Mains pressure or gravity feed

ST100

- Vitreous enamel lined steel tank comes with 10 year warranty (2 years on electrical components)
- 100 litre capacity wall-hung unit
- Protech anti-corrosion system for durability
- Supplied with control kit for ease of installation
- Space saving wall-hung unit
- Environmentally sound and highly-efficient insulation

OUR REFERENCE	PRODUCT CODE	E/P CLASS	TAPPING PROFILE	OUTPUT (KW)	CAPACITY (LITRES)	REHEAT TIME (ΔT= 50°C)
PICCOLO*	3100525 (oversink)	A	XXS	2	5	9mins

OUR REFERENCE	PRODUCT CODE	E/P CLASS	TAPPING PROFILE	CAPACITY (LITRES)	HEAT LOSS (24HR)	REHEAT TIME *TESTED TO EN12897
ST100	3820016	C	L	100	1.26 kWh	70% 112hrs

*5 litre over sink heater complete with 8" chrome spout (406901) & coloured stop valve/tap assembly (406900).

THE NATION'S FAVOURITE WATER HEATER HAS JUST GOT BETTER.

INTRODUCING:

ANDRIS LUX

An evolution in water heaters
New generation of Europrisma

HOT WATER | HEATING | RENEWABLES
ariston.co.uk

ANDRIS LUX

New Generation of Europrisma

- Modern, cutting-edge and stylish design
- Easy to operate with mechanical dial
- 'E' setting on the dial to optimise comfort and energy saving
- Copper heating element (Nickel free)
- Titanium enamelled tank and 4-bolt flange for robustness and durability
- Heating lamp to show the heating cycle is in process
- Fast reheat times
- Installation in ten easy steps

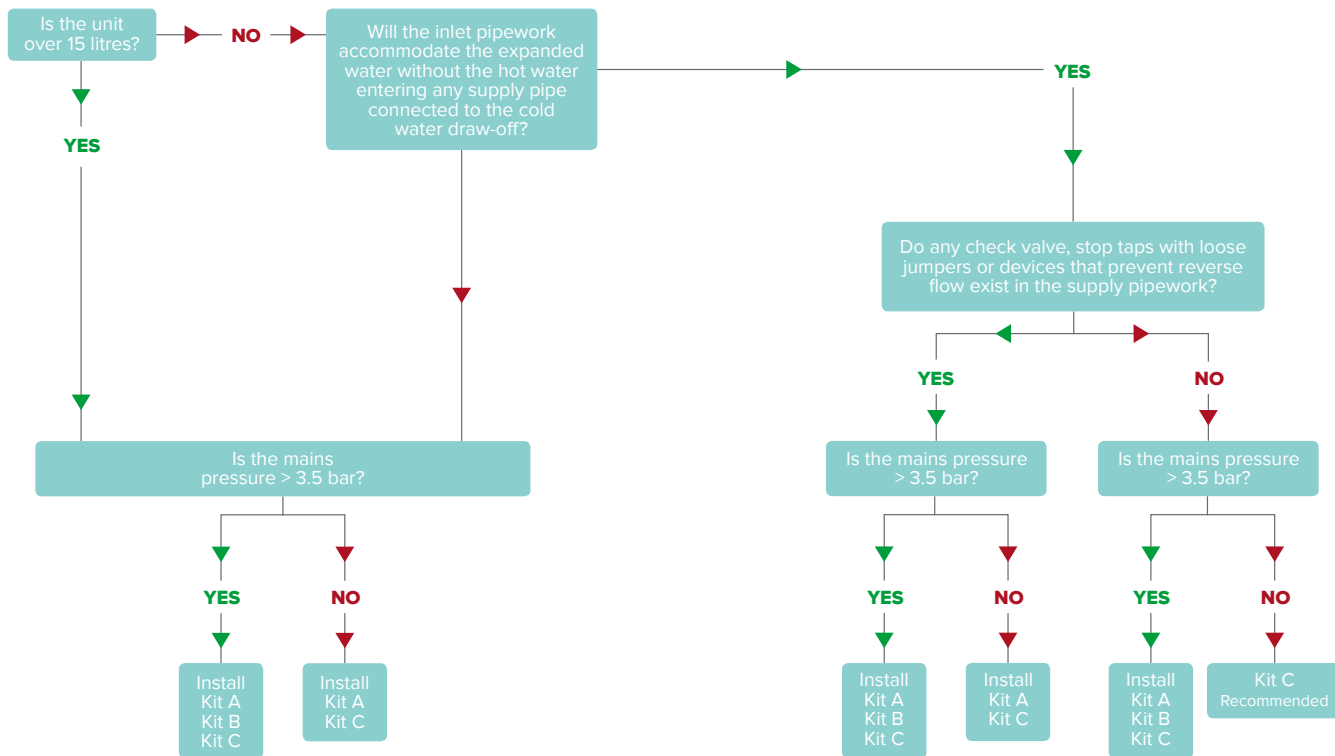

SEE PAGES 14-17 FOR
INSTALLATION INFORMATION

OUR REFERENCE	PRODUCT CODE	E:P CLASS	TAPPING PROFILE	OUTPUT (KW)	CAPACITY (LITRES)	REHEAT TIME (ΔT= 50°C)
ANDRIS100	3100302 (O)	A	XXS	3	10	12mins
ANDRIS10U	3100303 (U)	B	XXS	3	10	12mins
ANDRIS10U2	3100306 (U)	B	XXS	2	10	17mins
ANDRIS150	3100308 (O)	A	XXS	3	15	18mins
ANDRIS15U	3100309 (U)	B	XXS	3	15	18mins
ANDRIS15U2	3100310 (U)	B	XXS	2	15	26mins
ANDRIS300+AB	3820017 (O)*	C	S	3	30	36mins

(O)* = supplied with Kits A, B + C, O = Over-sink, U = Under-sink

The ANDRIS LUX[®] electric water heaters should be installed with different kits depending on the configuration.

The following guidelines are designed to help select the correct kits prior to installation.

* ANDRIS LUX 30L units come complete with Kits A, B + C.

Installation

Fig 1.

- Carefully unpack the appliance and read the installation instructions.
- Make sure all the fitting components are present:
 - 6bar pressure relief valve.
 - Dielectric junctions (Connections for the appliance).
 - Wall hanging bracket.
- Fit dielectric junctions to inlet and outlet water connections.
- Mark the wall as outlined in the instruction booklet. Drill and affix the hanging bracket to the wall. Carefully hang the appliance on to the wall brackets.
- Turn off and isolate cold water supply. Tee into supply and, if required, fit pressure reducing valve and expansion vessel. Fit 6bar PRV and connect cold water supply to appliance inlet (see Fig. 2).

Fig 2. (Applicable to 10L & 15L units only).

- Connect hot water outlet on appliance to the domestic hot water system.
- Install discharge pipe from the 6bar pressure relief valve to terminate in to a drain or point of safety (see Fig. 3).

Fig 3. (Applicable to 30L units only)

- Connect the 13amp electrical supply to appliance.
- Turn on cold mains water supply to fill appliance.
- Commission appliance in accordance with the installation manual.

Unvented Cylinders

Direct, Indirect and Twin Coil models available from 80 litres to 500 litres

RANGE FEATURE KEY:

-  Energy Efficient
-  Energy Saving
-  External Temperature Regulation

CLASSICO HE

- 10 Models – 125 - 500 litres (direct and indirect)
- Steel tank with exclusive vitreous enamel coating
- 25 year tank warranty, 2 years on electrical components
- All plumbing and electrical connections within a 90° angle
- Environmentally sound and highly efficient insulation
- Secondary return tapping
- Magnesium anodes to protect against corrosion
- Supplied with fitting kit

AQUABRAVO TWIN COIL

25
YEAR
WARRANTY
ON TANK

- Floor-standing cylinder with twin indirect coils for dual heat source applications
- 25 year warranty on stainless steel tank for peace of mind (2 years on electrical components)
- All plumbing and electrical connections within a 60° angle
- Factory Fitted T&P relief valve to meet all WRAS and Building Regulations for the UK
- Unvented control kit supplied with cylinder
- Environmentally sound and highly efficient thermal insulation providing cost savings whilst being friendly to the environment
- Range: available in 3 capacities: 215L, 255L and 305L
- Combine with an Ariston solar thermal kit for a durable energy efficient system

ADVANTAGES OF UNVENTED SYSTEMS

ADVANTAGES OF AN UNVENTED SYSTEM

- Hot and cold water supply to all outlets at mains pressures
- Drinking water at all cold water outlets, as water is supplied directly from the incoming mains water pipe
- Good shower flow and cold water supply giving wider choice of taps and fittings
- No storage tank in the loft freeing up potentially valuable loft space and removing risk of:
 - Water stagnation
 - Frost damage to pipes
- Lower insurance premiums due to the absence of stored water in the loft
- Greater system design and flexibility
- Simpler plumbing system – less pipework, less time, less cost

1 TRADITIONAL OPEN-VENT SYSTEM

2 UNVENTED INDIRECT & SEALED HEATING SYSTEMS

3 UNVENTED DIRECT SYSTEM & ELECTRIC SPACE HEATING

Flue Terminal Positions

Ariston boilers are designed to be completely adaptable to every possible flue situation that may be encountered during installation.

The need for alteration to flue components is almost completely eliminated, making installation of the boiler quick and easy. It is possible to site flue terminals in a variety of positions in accordance with BS5440-1:2008.

Note

- Do not install in a place likely to cause a nuisance/ damage/ discolouration
- Carport installations are not acceptable with HE appliances
- Products should not cross property boundaries (2.5 metres)

Terminal Position

mm

A: Directly above/below an opening, air brick, opening windows, etc	300
B: Horizontally to an opening, air brick, opening windows, etc	300
C: Below gutters, soil pipes or drain pipes	75
D: Below eaves	200
E: From vertical drain or soil pipe	75
F: From an internal or external corner	300
G: Above ground roof or balcony level	300
H: From a surface facing the terminal	600
I: From a terminal facing the terminal	1200
J: Vertically from a terminal on the same wall	1500
K: Horizontally from a terminal in the same wall	300
L: Fixed by use of terminal and matched flashing plate	-

Control / 'AUTO' Function

The advanced **'AUTO'** function ensures intelligent management of the room temperature whilst guaranteeing maximum energy efficiency and offering energy savings. By pressing the **'AUTO'** button on the control panel, the boiler will automatically choose the ideal temperature for the central heating circuit by gradually increasing

the temperature of the system water until the room reaches the set temperature, whilst guaranteeing no excessive peaks in the flow temperature. When used in conjunction with the extensive range of controls, the **'AUTO'** function ensures greater levels of comfort and savings are achieved.

Condensing Boiler with an On/Off Room Thermostat

- Unsatisfactory levels of comfort
- Energy Waste
- Unnecessary wear of the boiler

Ariston Boiler with 'AUTO' Function and On/Off Room Thermostat*

- Increased comfort levels
- Reduced Energy Waste
- Improved boiler performance

Ariston Boiler with 'AUTO' Function, Room Thermostat and Outdoor Sensor

- Ideal levels of comfort
- Energy Savings up to 5%
- Longer life for the boiler

Ariston Boiler with 'AUTO' Function, Sensys, Modulating Room Sensor and Outdoor Sensor*

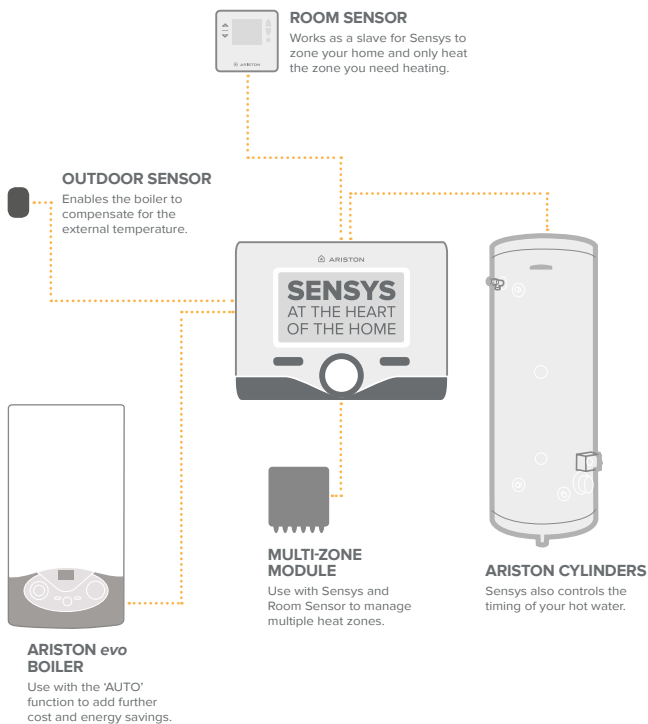

- Ideal levels of comfort
- Energy Savings over 6%
- Maximum working life for the boiler

*Compared to a standard condensing boiler

Controls & Accessories

Sensys is the controller which will control your complete heating system. Working with other products in the Ariston portfolio, comfort and energy saving go hand-in-hand.

MULTI-ZONE SYSTEMS

With the current range of boilers and controls available, Ariston makes it easy to manage up to 3 temperature zones independently. For example, should the heating system consist of an underfloor installation (low temperature) and a traditional radiator type installation (high temperature) it is possible to control both zones independently with a SENSYS and a room sensor.

Renewables Introduction

As the world's leading manufacturer of water heating, Ariston continues to show its commitment to helping homeowners reduce their carbon footprint through research and developing innovative and eco-friendly products.

This is demonstrated in our Renewable products, including the Ariston range of Solar Thermal products, offering both vertical and horizontal panels, as well as the AQUABRAVO TWIN COIL unvented cylinders.

Further evidence of Ariston's commitment to innovation can be found in the Ariston NUOS, a Heat Pump Water Heater that offers the perfect alternative to electric hot water cylinders, or for properties off the gas grid.

As the heat pump unit on the NUOS is combined with the cylinder, installers need no F-Gas Qualifications to fit and need only G3 qualifications meaning NUOS really is 'Plug and Play'.

Solar Thermal

Solar Thermal - CF2.0 Solar Panels & Fixing Kits

3020055	CF2.0 Collector
3024017	Connection Kit - 1 Collector (incl. Air Vent)
3024018	Connection Kit - Additional Collector
3107025	Rail Kit
3024103	Ground/Flat Roof Frame (CF2.0, XP2.5V)

Solar Thermal - XP2.5 Solar Panels & Fixing Kits

3020058	KAIROS XP2.5 V (Portrait Collector)
3020057	KAIROS XP2.5 H (Landscape Collector)
3024093	Connection Kit - 1 Collector (XP2.5)
3024094	Connection Kit - Additional Collector (XP2.5)
3024098	Air Vent
3024103	Ground/Flat Roof Frame (XP2.5 V)
3024105	Ground Flat Roof Frame (XP2.5 H)

Solar Thermal - Accessories

3024256	Pump Group Pro 20-70
3024340	Solar Manager Izy
3024319	Expansion Vessel (24L)
3820001	20l Solar Fluid
3024069	Insulated Flexible Twin Pipes - 10m

Solar Panel 2.0

- Aperture area 1.82m²≤
- Absorber area 1.72m²≤
- Frame: grey anodized aluminium
- Insulation: 50mm rockwool
- Special solar glass – high transparency, tempered, anti reflective and prismatic

- Low mounting profile
- EN12975 approved
- Absorber plate: High grade copper with TINOX titanium coating

NUOS Introduction

NUOS, a philosophy of energy efficiency and total peace of mind.

GREEN

If GREEN mode is selected, only the heat pump works, ensuring the most efficient operation.

Max achievable temperature in GREEN mode is 55°C.

BOOST

If BOOST mode is activated, the heat pump and heating element work at the same time. This mode has to be manually selected by the end user every time hot water is required in as short a time as possible.

Max temperature in BOOST mode is 65°C.

AUTO

In AUTO mode only the heat pump works. However, should the set temperature be higher than 55°C or the ambient air temperature below (0°C) the heating element is activated, in order to achieve the maximum energy saving and the maximum quantity of hot water.

Max temperature in AUTO mode is 65°C.

Flexible Programming

With the **NUOS** heat pump water heater, it is possible to set two water draw off times. By monitoring both the stored water and the ambient air temperatures **NUOS** will start automatically to ensure that the stored water reaches the desired temperature at the time set by the user.

NUOS FS 200

- Co-efficient of performance (COP) 2.8
- Environmentally sound and highly efficient thermal insulation
- 3 magnesium anodes to protect against corrosion
- Back up heating element
- 'Plug & Play' – No F-Gas qualifications needed to install
- Factory fitted ½" T&P relief valve
- Anti-legionella function

ARISTON ACADEMY

Training that gives you more.

HANDS-ON, PRACTICAL AND REWARDING, OUR ARISTON ACADEMY PROVIDES YOU WITH THE KNOWLEDGE AND SUPPORT ON THE LATEST TECHNOLOGIES.

Providing comprehensive training for installers and merchants, our nationwide academies offer valuable hands-on experience with live gas and water connections.

Our courses are delivered in a relaxed and friendly atmosphere by expert trainers with the knowledge and experience to help you succeed.

Training courses cover:

- Our technology and how it works
- Installation of Ariston products
- Mechanical operation
- Intuitive controls and how they simplify installation, commissioning and servicing
- Electrical circuits and components
- Hydraulic circuits and components
- Practical 'hands-on' experience
- Use of fault codes and diagnostic techniques

Ariston Academies:

- Barnsley
- Basildon
- Basingstoke
- Birmingham
- Cardiff
- Colchester
- Edinburgh
- Glasgow
- Leicester
- Manchester
- Milton Keynes
- Newcastle
- Plymouth
- Portsmouth

Become an Ariston trained professional with our expert training courses provided for heating professionals, nationwide.

Knowledge is valuable. Receive **£300*** boiler cash back when you train with Ariston.

Booking your course online is quick and easy.

Locate your nearest academy and contact us today.

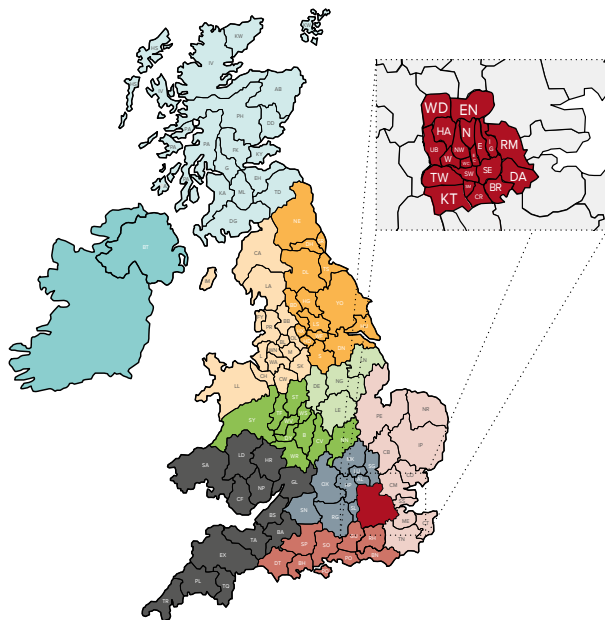

*Terms & Conditions apply.

COUNT ON US... for quality training and expert support.

24/7 Customer Service

Our specialist support and service provides a team of highly skilled experts on hand to offer advice and assistance, wherever you are, whenever you need it.

Specialists in our product areas, there will always be a point of contact available to deal with anything from arranging a service, warranty issues or scheduling a visit from an engineer.

With the knowledge an Ariston expert can answer your call within 20 seconds, you can rest assured that you can count on us 24 hours a day, 7 days a week.
