INDUSTRIAL FANS

ACCESSORIES

Residential Fans

Why Ventilate?

AIRFLOW fans meet/exceed the requirements of the latest Building Regulations helping to combat the harmful effects of dampness and condensation and by extracting airborne pollutants such as odours, cooking smells,

humid and stale air. The potential hazards to health for occupants and possible damage to the fabric of the building can be largely eliminated.

Short key Functions

SWITCHING

Fan operates by remote switch

TIMER

Adjustable timer overrun

PULLCORD

Manual on/off control by integral pull cord

MOTION SENSOR

Passive infra red activation

CONTINUOUS VENTILATION

Continuous ventilation at trickle speeds

2 MINS

Delay start for 2 minutes

TWO SPEED

Two speed operation

SELV

Safety Extra Low Voltage

HUMIDITY

Adjustable humidity setting

Aura eco 100

Toilet, en-suite and bathroom ventilation

Key Features

- Axial fan
- Ventilation up to 54 m³/hr
- Slim compact styling
- Quick and easy to fit
- Quiet - 29 dB(A)
- Low watt motor - 6w
- Low SFP - 0.36 W/l/s
- Compatible with 100mm ducting
- IPX4 rating
- 3 year warranty

Aura eco 100

Highly reliable, low energy fan in a modular design for ease of installation and maintenance. The Aura eco 100 is designed to provide quiet extraction in a suitable application.

The fan comes in various control options and is recessed into the wall. The Aura range of fans are slim, compact, attractively styled, are easy to wipe clean and are ideal for through the wall installations.

Models

Basic	Control by Remote Switch
Timer	Timer can be set to run on between 2 and 30 minutes
Humidity Timer	Humidity sensor can be set between 60 - 90% RH
Motion Sensor Timer	PIR sensor activates fan

Aura In-Line

Toilet, en-suite and bathroom ventilation

Key Features

- Axial in-line fan
- Ventilation up to 108 m³/hr
- Designed for ventilation of small and medium size rooms
- Use for both supply or extraction
- Compact and quiet in operation
- Mounting bracket included
- Ductable
- IPX4 rating
- 3 year warranty

Aura In-Line range

Highly reliable fan in a modular design for ease of installation and maintenance. Aura In-Line Fans are designed to provide extraction levels that comply with the latest Building Regulations.

The fans are manually operated by a remote switch (switch not supplied). Timer control versions are also available. Install in-line with ducting for a quiet and discreet installation.

The Aura in-line fan comes with a fixing bracket and is compact, attractively styled and ductable over short lengths. They are the ideal solution for removing damp moist air, odours and airborne pollutants from toilets and bathrooms.

Aura Smart

Key Features

- Two speed axial fan
- Flow rate up to 133 m³/hr
- Interchangeable spigots - 100/125mm
- Modern compact styling - optional front covers to match décor
- Quick and easy to fit
- Versatile positioning - portrait or landscape
- Exceptionally quiet - 21 dB(A)
- Energy efficient low watt motor - 3.8W
- Advanced controls for ultimate user comfort
- Universal voltage 100/240v - 50/60Hz
- IP44 rating
- Complies with Building Regulations
- 5 year warranty

Aura Smart

The Aura Smart is an innovative low energy axial fan with a unique design for ease of installation and maintenance. The fan is extra slim and with optional colour covers available, it will blend perfectly into the décor of any room. The fan is suitable for mounting anywhere outside of Zone 2 of your wetroom.

The fan comes with interchangeable spigots giving the user the option to use 100mm or 125mm ducting and increase the flow rate accordingly.

This smart fan is available with either humidity timer control or motion sensor humidity timer control giving the user the benefit of achieving the perfect micro climate within their home. Aura Smart has a one-touch control panel beneath the cover for control of the fan. A separate remote controller is also included for convenient control of all the functions – it's a Smart Fan!

Interval ventilation occurs automatically every 15 hours for a period of 2 hours - this ensures regular movement of the air and keeps the room fresh.

Models

Humidity Timer Humidity sensor activates fan - if humidity rises by less than 20% within 10 minutes, run on time reverts to 15 minutes instead of the preset rates of 30, 45 or 60 minutes.

Motion Sensor Humidity Timer PIR sensor activates fan to switch on - overrun timer kicks in - can be set at 5, 15 or 30 minutes. If humidity sensor activates the fan – run on time, to clear humidity can be set at 30, 45 or 60 minutes. If the humidity rises by less than 20% in 10 minutes the overrun time will revert to 15 minutes.

QuietAir QT100

Toilet, bathroom and en-suite ventilation

Key Features

- Axial fan
- Two speed ventilation up to 90 m³/hr*
- Awarded Quiet Mark 2014 by Noise Abatement Society
- Extremely quiet, noise levels as low as 25 dB(A)
- Power consumption from only 5w
- Interval timer for routine auto extraction
- Very low SFP of 0.24 W/l/s
- Long life ball-bearing motor 40,000 hours
- Integral flow straightener / backdraught flap
- Powerful extraction for longer ducts
- Suitable for installation anywhere in Zone 1 of bathrooms when installed with an RCD
- IP45 rating
- Complies with Building Regulations
- 3 year warranty

QT100 range

The whisper quiet QuietAir QT100 is designed to provide powerful extraction levels that exceed the requirements of the latest Building Regulations.

The QuietAir QT100 is the quietest fan available complying with Building Regulations "Installed Performance" requirements when ducted.

QuietAir is a range of elegant, discreet axial fans that are extremely quiet with various control options that activate the fan only when needed – remote switching,

timer, humidity timer and motion sensor with timer. By using exceptionally low energy this helps to reduce carbon emissions and also save on your energy bills. It has a high efficiency impeller for extraction through up to 12m of rigid ducting with up to 10 x 90° bends and still complies with the Building Regulations.

Room refresh (interval timer) enables automatic extraction at pre-set times if required.

Maxivent eco

Larger bathroom, utility room and kitchen

Key Features

- Axial fan
- High performance fan up to 260 m³/hr
- Easy to fit and clean
- Can be mounted in the wall or ceiling
- Interchangeable fixing holes to easily replace most other 150mm fans
- Variable speed controller available
- Thermally protected motor
- Low watt motor 28w
- Low SFP - 0.38 W/l/s
- Silent automatic shutter
- IP45 rating
- Complies with Building Regulations
- 3 year warranty

Maxivent eco range

Highly reliable and powerful axial fan in a modular design for ease of installation and maintenance. Maxivent is designed to provide extraction levels that comply with the latest Building Regulations.

Maxivent fans offer quiet powerful performance in units equipped with auto shutters. These stylish, modern 150mm axial fans will blend comfortably with existing décor and are quick and easy to install. They are the ideal solution for removing damp moist air, odours and airborne pollutants from kitchens and utility rooms.

Unique, elegant, efficient

"A revolution in fan design. You have never seen a fan like it or installed a fan like it either"

In 2004 Airflow introduced iCON. A radical new design which brought style, colour and a new level of functionality to the bland world of boxy extractor fans.

The changes were not just cosmetic, but the results of a complete rethink of the way in which fans are designed, specified, sold and installed.

Today, as we introduce the next generation of energy saving iCON, these award winning fans remain the market leader for simplicity and style with its unique, interchangeable module concept continuing to save time and money for distributors and installers alike.

iCON® 15

iCON 15 is ideal for toilets, en-suite, shower rooms and bathrooms. Recessed into the wall or ceiling, it is stylish and unobtrusive, even in the smallest space.

iCON® 30

iCON 30 is quiet, powerful and designed for recessed or surface mounting in walls or ceilings in larger toilets, bathrooms and utility rooms.

iCON® 60

iCON 60 is the largest fan in the range, suitable for recessed or surface mounting in walls or ceilings and is highly efficient in domestic kitchens, changing areas and residents' lounges.

Sandstone

Its looks aren't everything

Installation

iCON has been designed with simplicity in mind. A quick, core drilled hole enables immediate fixing of iCON. The twist on/off cover requires only a single side entry fixing screw.

Cantilever fixing lugs enable recessed installation on uneven surfaces. iCON 30 and iCON 60 are also supplied with a narrow contour skirt for surface mounting if preferred.

The 'snap-in' module is quick to fit and wire, giving the installer a choice of controls on-site.

Modular versatility and simplicity. Select the fan, iCON 15, iCON 30, iCON 60 and add the module. Any module fits any fan.*

*subject to voltage

- Simple twist on/off cover mechanism
- Cantilever lugs to facilitate uneven surfaces
- 'Snap-in' interchangeable module, quick to fit and wire
- Fit the control module required for the particular job

Wholesalers and Installers save too!

Designed with the busy contractor in mind with modular design and maximum fan choice, you save time and make more money. Just carry three basic fans and a range of inexpensive fan control modules to install fans quickly and move faster from site to site.

- Go from site to site
- Just carry three basic fans and a choice of control modules
- All modules fit all fans.*
- Reduce trips to the wholesaler for site-specific fans.

*subject to Voltage

Minimal stock and maximum choice equals more profit

Wholesalers only need to stock three basic fans and offer a range of control modules to...

STOP using up valuable shelving space with boxes for every type of fan.

SAVE up to half your valuable shelving space by stocking three basic fans and a range of popular control modules.

iCON 15

Stylish toilet and bathroom ventilation

Key Features

- Axial fan
- Flow rate up to 68 m³/hr
- Stylish, slim and unobtrusive in walls or ceilings
- Low SFP 0.49 W/l/s
- Different colour covers available
- Unique iris shutter, prevents backdraughts, operates silently
- Interchangeable control modules match fan to installation requirements
- IPX4 rating
- Complies with Building Regulations
- 3 year warranty

iCON 15

iCON 15 is ideal for toilets, en-suites, shower rooms and bathrooms. Recessed into the wall or ceiling, it is stylish and unobtrusive, even in the smallest of spaces. The circular design means no squaring up is required, adding to the already simple installation procedure.

iCON 15 is designed to provide ventilation levels that comply with the latest Building Regulations. The iCON fan is an efficient, stylish and unique ventilation solution for

the modern home. The shutter design makes switching on and off almost silent and helps reduce external noise ingress.

The slim profile and iris shutter of the iCON make it a fan which will blend discreetly into any setting. The iCON 15 Shower Kit is supplied with adjustable timer module and ducting installation kit.

Select the module
It's iCON simple

The module concept which is unique to iCON, gives one the option of determining how you wish to control your fan and based on your requirement select the appropriate module. Airflow has invested extensively in the research and development of our modules to bring our customers the most versatile controllability available in the extractor fan market. Our extensive range of control functions has helped the iCON product range become the leading brand it is today.

The same module is compatible with all three size iCON's – 15, 30 and 60. However, it should be noted that there are specific 240V modules and different low voltage SELV modules (please refer to the table below for details and part numbers of the various modules).

Replacing a module is also a lot simpler and cheaper than replacing the entire fan.

Modules for use in 240V iCON Fans iCON 15 - 72683501 iCON 30 - 72591601 iCON 60 - 72591701

Part No.	Control	Function
72573602	PCM	Manual on/off control by pull cord switch
72612601	TM	Adjustable timer between 1 - 30 minutes, remote or light switch operation
72687103	HTM	Adjustable humidity setting between 40 - 90% RH, adjustable timer and momentary pull cord to override
72687104	PRTM	Motion sensor activation with adjustable timer
72687102	PRHTM	Motion sensor activation with adjustable humidity setting and adjustable timer
72675701	CV2	Continuous Ventilation at 8/13 l/sec. Module automatically recognizes fan installation. Boost to a maximum flow rate of the fan by remote switching
72675702	DTM	Delayed start for 2 minutes after light switch operation (ideal for quick visits) then adjustable timer between 2 - 45 minutes (DTM only)
72675703	2SHM	Remote light switch operation activates low speed. Boost speed activated by automatic humidity sensor (adjustable 40 - 90% RH) or manually by pull cord (detachable if required)

Modules for use in 12V iCON SELV Fans with remote transformer iCON 15S eco - 72683701 iCON 30S eco - 72683801

72573603	PCS	Manual on/off control by pull cord switch
72574204	PCTS	Adjustable timer between 1 - 30 minutes, pull cord/ remote or light switch operation
72574202	HTS	Adjustable humidity setting 40 - 90% RH, adjustable timer and pull cord to override
72574203	PRTS	Motion sensor activation with adjustable timer
72574201	PRHTS	Motion sensor activation with adjustable humidity setting and adjustable timer
72682307	DTS	Delayed start for 2 minutes after light switch operation (ideal for quick visits) then adjustable timer between 2 - 45 minutes (DTS only)

Modules with integral transformer for use in 12V iCON fans iCON 15 eco - 72687121 iCON 30 eco - 72687122 iCON 60 eco - 72687123

Part No.	Control	Function
72687127	PCE	Manual on/off control by pull cord switch
72687128	TE	Adjustable timer between 1 - 30 minutes, remote or light switch operation
72687129	HTE	Adjustable humidity setting between 40 - 90% RH, adjustable timer and momentary pull cord to override
72687130	MSTE	Motion sensor activation with adjustable timer
72687131	MSHTE	Motion sensor activation with adjustable humidity setting and adjustable timer
72687132	CVE	Continuous Ventilation at 8/13 l/sec. Module automatically recognizes fan installation. Boost to a maximum flow rate of the fan by remote switching
72687133	DTE	Delayed start for 2 minutes after light switch operation (ideal for quick visits) then adjustable timer between 2 - 45 minutes (DTE only)
72687134	2SHE	Remote light switch operation activates low speed. Boost speed activated by automatic humidity sensor (adjustable 40 - 90% RH) or manually by pull cord (detachable if required)

Chrome

Anthracite

Silver

Sandstone

Adding colour and style to your home with a coloured iCON cover

Colour Covers	iCON 15	iCON 30	iCON 60
Anthracite	52634503	52634506	52634509
Silver	52634504	52634507	52634510
Sandstone	52634505	52634508	52634511
Chrome	52634502	N/A	N/A

To complement the décor of your home, we also offer the flexibility to upgrade the white cover to Anthracite, Sandstone, Silver or Chrome (iCON 15 only). This is perfect for customers looking for a fan that blends seamlessly into the surroundings adding colour and co-ordination to any toilet, en-suite, bathroom, utility room or kitchen at a surprisingly low cost.

The covers are simple to fit and can be easily cleaned by simply wiping off with a damp cloth.

We are convinced that our exclusive design and product configuration possibilities, have contributed to iCON fans, modules and covers becoming one of the most successful brand names in the extractor fan business.

iCONstant

Continuous Ventilation

Key Features

- Continuous running axial fan
- Trickle flow rate from 22 m³/hr
- Boost flow rate up to 97 m³/hr
- Stylish circular design suitable for wall and ceiling mounting
- Ideal for New Build and Refurbishments
- LED lamp to indicate fan failure
- Very quiet running fan
- Low energy motor – economical to operate
- Timer and humidity timer versions
- IPX5 rating
- Complies with Building Regulations
- SAP Appendix Q eligible*
- 3 year warranty

iCONstant.

The market for Decentralised Mechanical Extract Ventilation (dMEV) fans is particularly prevalent in the social housing sector as specifiers, but also landlords and tenants, seek a ventilation solution that will satisfy the need for an energy efficient, economical to run and low noise fan with minimum human intervention.

iCONstant helps eliminate the problems of condensation and mould growth by continuously extracting the damp, moist air that is the source of the problem.

Choose iCONstant, the quiet, low energy dMEV fan from Airflow.

iCONstant

Continuous Ventilation

Why dMEV?

dMEV fans comply with Part F System 3 of the Building Regulations often referred to as Continuous Mechanical Extract Ventilation. The Airflow iCONstant dMEV continuous ventilation fan will provide the perfect solution for both new build and retrofitting into any domestic home, particularly where there has been an

increased level of insulation making it more airtight or the homeowner/tenant has a particular problem with condensation or mould. The iCONstant with Timer or Humidity Timer functionality are also SAP Appendix Q eligible*.

* pending approval

Economical to Operate – less than a light bulb

iCONstant has been developed to consume minimal energy by using a highly efficient DC motor. The motor draws a mere 0.91w on the trickle speed of 6 l/sec. The boost speed on the humidity version is intelligently controlled so as to minimise the period of the boost flow and not significantly ramp up the running costs.

The yearly running cost of the iCONstant is less than that of a low energy light bulb. A small price to pay to ensure the well-being of the occupier and help preserve the fabric of the building.

Versatile Applications – one fan for all rooms

iCONstant dMEV fans can be used in any of the wet rooms. The required trickle rate is selected by the installer when the fan is fitted – this is dependent on the application - for toilets select 6 l/sec, en-suites, bathrooms and utility rooms select 8 l/sec and for kitchens it is 13 l/sec.

The boost speed will be the next speed level up with a maximum speed of 27 l/sec. The boost to the higher speed is activated by one of the following methods; momentary pull cord, remote switch or intelligent humidity sensor.

Simple Controllability – optimizing your ventilation

On the timer version, the boost speed is set to run on for between 2 and 45 minutes. With the Humidity Timer version, the intelligent humidity sensor will activate the boost speed when a set point is reached – this can be

adjusted anywhere between 60% and 90%. When the set point is reached after the boost speed kicks in, the fan will revert to the trickle speed once again.

Packed with useful features with the user in mind

Airflow's intelligent humidity sensor offers the additional feature of being able to recognize a rapid increase in humidity and activates the boost speed before the pre-set value is reached so that preventive ventilation commences. Should this occur, the fan reverts to the trickle speed when the humidity level is within 10% of the set-point. The benefits of this are that energy consumption is kept to a minimum and noise levels are reduced whilst ensuring optimum ventilation is achieved.

Another feature is the ability to delay the start of the boost function by two minutes on the live switch and humidity sensor. This is particularly advantageous for those quick visits during the middle of the night and to avoid waking up the entire household every time someone visits the loo. The boost activation on the pull cord is instant.

Another stylish design from Airflow

As the fans are extremely quiet in continuous mode, we have introduced an LED light which flashes through the cover in the event of a failure.

The iCONstant is designed to be recessed into either the wall or the ceiling. The white cover can be wiped clean with a wet cloth or removed with the simple twist

off action when the cover and or inner parts require a proper clean. Should you wish to hide the momentary pull cord in ceiling installations for example, we have designed the product in such a way that the cord can be neatly stowed away within the fan.

User safety is our priority

As we have achieved IPX5 ingress protection rating on this product, you will be able to fit the iCONstant anywhere within Zones 1 and 2 of your bathroom/ en-suite. This makes our product incredibly safe to operate which is another reason for housing associations and landlords to specify iCONstant, also it is easy for the installer to position the fan. Airflow is one of the few suppliers to offer a dMEV product with this rating.

It's an all-round win for iCONstant

iCONstant's circular design is based on our very successful iCON brand of extractor fans. Customers like our circular design as this enhances the style and

appearance of the room plus a round fan is simple and quicker to install saving on costs once again.

LOOVENT eco

A fan for every room

Key Features

- Two speed centrifugal fan
- Flow rate up to 110 m³/hr
- Compact design - smallest 30 l/sec fan in class
- For toilets, bathrooms, en-suites, utility rooms and kitchens (adjacent to hob)
- Well proven, centrifugal, filterless technology
- Surface or recessed, portrait or landscape
- Simple replacement of existing Loovent - same mounting and spigot position
- Economical to operate - from 3.6w
- Timer, humidity timer and motion sensor Timer versions
- SELV versions - low voltage
- Voltage supply 100/240v-50/60Hz
- IPX5 rating
- Complies with Building Regulations
- 5 year warranty

The next generation...

From an excellent pedigree of fans for over 40 years comes the next generation of fans – LOOVENT eco. A powerful, discreetly styled fan in a modular design for ease of installation and maintenance to ensure effective ventilation with minimal noise level and energy efficiency in mind.

It is exceptionally quiet with various “on-demand” control options that only activate the fan when needed - timer, humidity timer and motion sensor with timer. The low

energy motor helps reduce carbon emissions and saves on energy bills.

The LOOVENT eco is truly versatile in that it can be surface or recessed mounted into the wall or ceiling and fitted in either the portrait or landscape position.

LOOVENT eco is ideal for replacing the old Loovent 01C or existing Loovent 01 as the spigot position is identical and the back plates are the same size keeping reworking to a minimum.

- Voltage supply 100/240v-50/60Hz
- IPX5 rating
- Complies with Building Regulations
- SAP Appendix Q eligible
- 5 year warranty

The next generation...

The dMEV continuous ventilation versions are the ideal solution for maintaining the perfect air quality in the domestic home. The LOOVENT eco dMEV versions with timer and humidity timer functionality are SAP Appendix Q eligible, making them perfect for the new build market.

The trickle rate should be selected on installation depending on the application - 7 l/sec for toilets, 9 l/sec for bathrooms / en-suites / utility rooms and 16 l/sec for kitchens. Boost speed is activated by the pull cord,

humidity sensor or a remote switch (light / door switch). Boost speeds are 15,15 and 31 l/sec respectively. The pre-set run on timer period will apply and revert back to the trickle speed after this time.

LOOVENT eco is ideal for replacing the old Loovent 01C or existing Loovent 01 as the spigot position is identical and the back plates are the same size keeping reworking to a minimum.

Loovent

Toilet and bathroom ventilation

Key Features

- Proven centrifugal fan
- Flow Rate up to 111 m³/hr
- Surface or recessed mounted
- Compact design - smallest 30 l/sec fan in class
- Well proven, centrifugal, filterless technology
- Integral magnetic anti-backdraught flap
- Thermally protected motor
- IPX4 rating
- TÜV approved
- Complies with Building Regulations
- 3 year warranty

Loovent

Highly reliable and powerful fan in a modular design for ease of installation and maintenance.

Loovent centrifugal fans are perfect where longer duct runs are required as they are powerful enough to overcome pressure loss. All Loovents are designed to provide extraction levels that comply with the latest Building Regulations.

The Loovent fan offers a choice of timer and humidity controls, ensuring efficient ventilation, which can be used with 100mm ducting. They provide the ideal solution for removing damp moist air, odours and airborne pollutants from en-suites, bathrooms and utility rooms.

The new LOOVENT eco range offers a full range of functionality including SAP Appendix Q approved dMEV versions - See page 76.

TIMER

Roomvent

Highly reliable and powerful centrifugal fan in a modular design for ease of installation and maintenance. The Roomvent is designed to provide extraction levels that comply with the latest Building Regulations.

Operated by adjustable timer, via a light or optional door switch. The Roomvent range comprises a selection of high performance fans for higher performance ventilation.

They are the ideal solution for removing damp moist air, odours and airborne pollutants from larger rooms. The motor, fan and plug-in timer are on a separate chassis for easy installation.

Kitchen ventilation

Key Features

- Powerful centrifugal fan
- Flow rate up to 260 m³/hr
- Two speed versions available
- Recess or surface mounted into a wall or ceiling (bezel supplied)
- Window fitting with optional window kit
- Easy to clean, integral, re-usable grease filter
- Thermally protected motor
- Easy to fit with 100mm outlet
- Demco approved
- Integral magnetic backdraught flap
- IPX4 rating
- Complies with Building Regulations
- 3 year warranty

Supervent range

Highly reliable and powerful centrifugal fan in a modular design for ease of installation and maintenance. The Supervent is designed to provide extraction levels that comply with the latest Building Regulations.

Supervent fans are small in size but big in performance. This range of powerful fans provides compact units that are ideal for almost any kitchen application. A

centrifugal fan that is simple to install and exceptionally versatile, delivering 150mm fan performance levels through 100mm ducting. These are the ideal solution for removing damp moist air, odours and airborne pollutants from kitchens.

The washable, built-in grease filter protects the motor in kitchen applications.

Aventa In-Line

Bathroom, en-suite, utility room and kitchen ventilation

Key Features

- In-line mixed flow fans
- Flow rate up to 280 m³/hr
- Designed for ducted installations
- High pressure, low noise
- Compact and quiet in operation
- Two speed (normal and boost)
- Adjustable overrun timer version
- Access to monitor and impeller without dismantling ductwork
- Low watt motor from 21w
- IPX4 rating
- Complies with Building Regulations
- 3 year warranty

Aventa In-Line range

The Aventa range provides compact, quiet and powerful remote mounted ventilation for ducted installations. Available in high performance, two speed versions they are less bulky than larger in-line centrifugal fans and can be installed in loft spaces or service shafts for remote extraction.

With high flow / high pressure development characteristics they can be used with flexible ducting and flat duct systems to ensure compliance with Building

Regulations guidance ensuring installed performance and extraction conditions are met.

Combining two Aventa fans allows for even more powerful operation. Mounting in parallel (left hand image on facing page) doubles the air flow, whilst two fans in series (right hand image on facing page) leads to a doubling of the air pressure for longer duct runs.

Double the pressure - mount in series

Controls and Accessories

A range of accessories including flexible and rigid ducting kits, controls and grilles are available.

Aventa Shower Kit

Shower ventilation

Key Features

- In-line mixed flow fan
- Flow rate up to 280 m³/hr
- Designed for ducted installations
- High pressure, low noise
- Compact and quiet in operation
- Two speed (normal and boost)
- Adjustable overrun timer version
- Access to motor and impeller without dismantling ductwork
- Low watt motor from 25w
- IPX4 rating
- Complies with Building Regulations
- 3 year warranty

Aventa Shower Kit

The Aventa range provides compact, quiet and powerful remote mounted ventilation for ducted installations.

Available in high performance, two speed versions they are less bulky than larger in-line centrifugal fans and can be installed in loft spaces or service shafts for remote extraction.

With high flow/high pressure development characteristics they can be used with flexible ducting and flat duct systems to ensure compliance with latest Building Regulations guidance ensuring installed performance and extraction conditions are met.

ALWAYS PULL FLEXIBLE DUCTING TAUGHT TO ENSURE INSTALLED PERFORMANCE AIR FLOW.

Applications

Timer Timer can be set to run on between 2 and 30 minutes

Contents of Kit

- 9041407** AVT 100T, 6m flex duct, ties, extract valve, external grille
- 9041408** AVT 100T, 6m flex duct, ties, halogen light, chrome and white grilles and external grille
- 9041406** AVT 125T, 6m flex duct, ties, extract valve, external grille
