JIGTECH™

Fast fitting door handle
and latch system

Performance you can trust

What does the **trade** think?

- // I have been in the industry for 12 years and your product is genuinely revolutionary. I will be using Jigtech from now on across all my sites.
- // **Topline. Worth it. Overall by far the best way to go I have found. The handles are very good quality. Best I could find. Heavy and looks great. It will save you time but more importantly stress and will give an excellent result.**
- // What an amazing kit, absolute game-changer, I will only install doors using this now. Thank you.
- // **We used the Jigtech system for all the doors in our new build and it was brilliant, saved loads of time and perfectly fitted on every door, quality of handles was excellent. Highly recommended.**
- // Really does make fitting doors a pleasure - quick, easy, professional and a great end result.

**Fits in under five minutes
Simple to use
Accurate and precise**

JIGTECH™

Jigtech is a revolutionary door handle and latch fitting system which reduces fitting time and improves efficiency and accuracy by changing the way you install door furniture and latches.

Jigtech has created a new standard in door hardware installation with the innovative system reducing fitting time from over 25 minutes to under 5 minutes. This results in a time saving of 80% benefitting both contractors and fitters alike with increased efficiency and functionality.

- **Fit handles in under five minutes**
- **Accurate and precise**
- **Saves time and money**
- **Easy to install**
- **Fire rated and Certifire approved handles**
- Unique finishes
- Door packs available
- Wide variety of handles
- Range of finishes including polished chrome, satin chrome, black nickel and antique brass

To complement the fitting system we also offer a range of stylish handles, latches in modern finishes, alongside several accessories designed specifically for the innovative fitting system.

Kits compatible with:

- Contract and premium handles
- Up to 54mm thick doors
- CE SmartLatch and CE SmartBolt
- Push button privacy

How to achieve fire-rating

An extension fixing pack and 34mm spade bit will be required for 54mm thick doors. The premium handles must be installed with CE SmartLatch and an intumescent kit to be fully compliant for fire doors up to FD60.

Applications

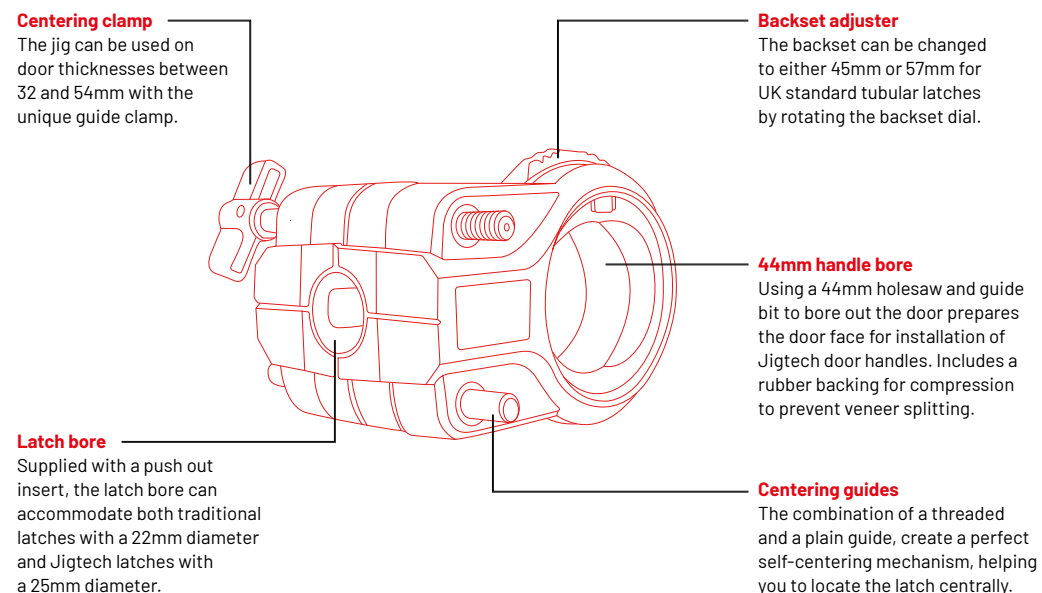

Whether you need a striking, contemporary style for a new home or apartment, or a sleek, modern look for a smart office environment, our Jigtech door handles are available in a range of shapes, styles and finishes.

Jigtech handles, latches and accessories are designed for internal use.

How it works

The system is based around a unique jig, which clamps to the door, auto aligning the drill holes on both the door face and the edge. Holesaws are used to accurately bore into the door, in preparation for the installation of the specially designed latches and door furniture.

Jigtech Pro kit

Installation kit in carry case

What's included?

The Jigtech Pro installation kit is supplied in a robust carry case, containing the full range including: the jig, holesaws and arbors, spade bit and unique latch tappers and keep locators for the professional installer.

Dimensions

Lever on rose

- 1 Handle - diameter of round rose or height/width of square rose
- 2 Handle length
- 3 Handle projection

Swatches

Our extensive collection of door hardware comes in a range of finishes to suit the needs of any door or project.

Swatches are provided as a quick reference guide to help with selection, actual finish may vary.

Icons and certifications

- All products in this brochure include fixings
- This handle is also available in a door pack

British designed

180 years of British engineering in Willenhall, the lock capital of Europe

Guarantees

Peace of mind with industry-leading product assurance

certifire

Certifire is a 3rd party approval scheme that confirms the product is suitable for use on fire doors. For details of actual approval see Certifire's website to view each certificate.

Fire door testing - fire resistance within door assemblies serves three main purposes: to restrict the initial development of the fire, to restrict the spread of the fire and to protect escape routes. Whenever fitting a latch to a fire door it must be fire door tested and fitted with an appropriate intumescent kit.

JIGTECH™

Jigtech slim rose handle coming soon in 2023

Stunning range of lever on rose handles

Sleek 3mm rose thickness

Exclusive new finishes

Perfect for commercial environments

Subtly enhance the look and feel of any internal door with Jigtech Premium fire-rated handles, which are quick and easy to install and legally compliant.

- Manufactured from premium zinc raw material
- Can be installed on fire doors up to FD60
- Certifire approved
- Compatible with Jigtech CE SmartLatch
- Suits 35-44mm door thickness
- 54mm fixing packs available

An extension fixing pack and 34mm spade bit will be required for doors of 54mm thickness and the handles must be installed with CE SmartLatch and an intumescent kit to be fully compliant for fire doors up to FD60.
