ABOUT THE GRS GROUP

GRS are experts in providing the widest choice of aggregates nationwide, competitively priced with service that's second-to-none. Each year we deliver over 20 million tonnes of primary and recycled materials, and we also offer waste removal, recycling, bulk haulage and associated services.

With decades of experience we have an enviable reputation for customer service, supplying many of the UK's high-profile infrastructure projects. Backed by **ISO18001**, **ISO14001**, **ISO9001** and **PAS99**, the team at GRS work to keep our business safe, successful and sustainable.

WELCOME TO GRS BUILDING PRODUCTS

GRS Building Products is Britain's number one supplier of bagged aggregate.

GRS is an independent business with nationwide coverage and excellent local knowledge. Our dedicated team is highly responsive with a track record for 'going beyond' for customers.

We supply the widest range of aggregates for construction,

landscaping and specialist applications – gravels, chippings, pebbles, flint, spar, marble, bark mulch, sand, rock salt and more!

From our network of 20 bagging plants throughout Britain GRS delivers more than 2 million tonnes of bagged aggregate every year, using our own dedicated transport fleet.

Whilst every effort has been made to reproduce our product colours and shades accurately within this brochure, due to the nature of natural stones and aggregates some slight colour variation may be apparent on delivered products.

All data is correct at time of print. GRS reserves the right to change specification without prior notice.

FROM SOURCE TO SUPPLY

GRS is an independent business which has long-standing relationships with an unrivalled network of aggregate manufacturers.

This means we can source our aggregates and other landscaping products from anywhere in the country – or anywhere in the world!

We bring these materials into our network of 20 bagging plants where we bag them up and load them for distribution. Then we use our own FORS-accredited transport fleet to deliver the products to builders' merchants, garden centres and retailers nationwide.

DELIVERY OPTIONS

Loose tip

When you need a large order of loose materials, deliveries can be arranged for any sized load from one tonne upwards using our dedicated fleet of tipper trucks.

Bulk bag

Our bulk bags (typically 800kg) are a convenient and tidy way to deliver bulk aggregates direct to your chosen location. Off-loading facilities can be provided.

Mini and Maxi bags

For ultimate ease of handling at smaller volumes choose our palletised mini and maxi bags.

In addition to our FORS-accredited transport fleet, our Rainham and Thurruck Plants are Silver FORS registered.

DEDICATED CUSTOMER CARE

With GRS you get the best of both worlds – local, dedicated support backed by the kind of follow-up service you’d expect from Britain’s number one.

We achieve this by having an expert dedicated team on hand to visit your local branch or site, and a central support team looking after your order and account throughout.

DISPLAY MATERIALS AND SALES SUPPORTS

There’s no better way to show off the range of aggregates than to have the actual products available:

Pallet header stand

A convenient over-pallet product information display for your stock of GRS palletised products.

Floor-standing display unit

To display more of the product why not choose our floor-standing display unit made from hardwearing and weather-proof materials.

Hand-held display box

When space is at a premium have the GRS Building Products display box available at your service desk. The box contains 16 of our most popular products.

Exterior banner

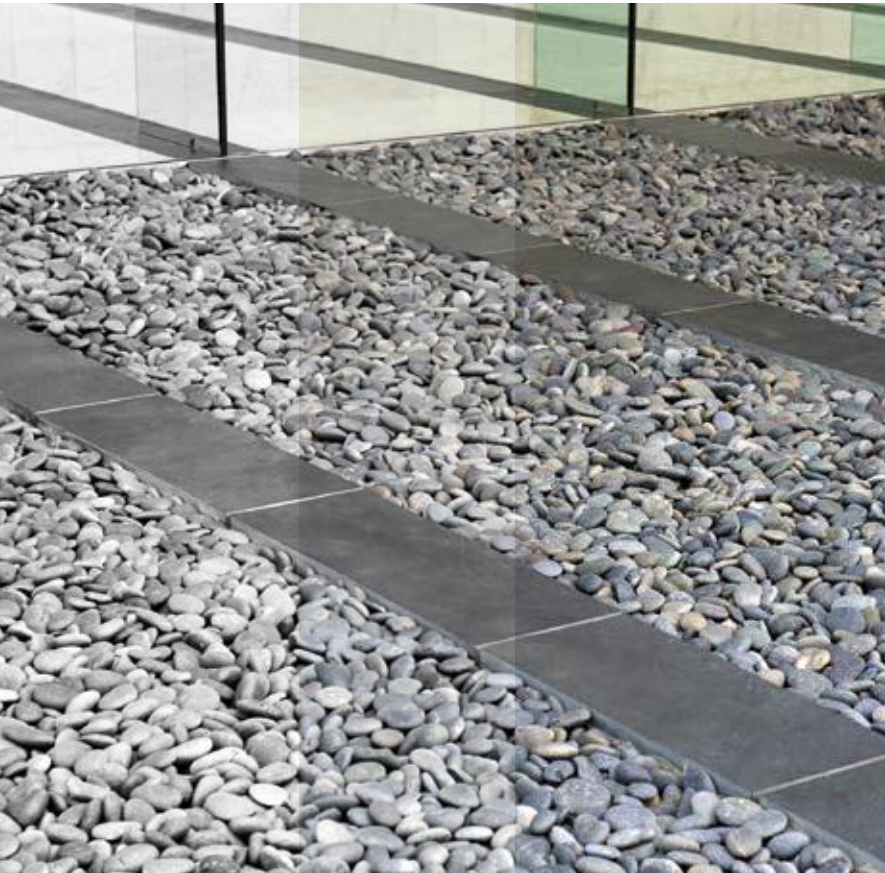

(8x3ft)
An easy-up, versatile and durable eyeleted vinyl banner.

Want something different?

Bespoke and standard point-of-sale display materials are also available. Contact your local sales representative to discuss your requirements.

COVERAGE CALCULATORS

The gravel calculators below are to be used as a quick guide to give a rough estimate of how much material is required to cover an area. For further assistance on calculating any areas please contact the office quoting length, width, depth and type of material to be laid and one of our advisors will be pleased to assist you.

For Gravels and Chippings
1 x Mini bag covers approx. 0.25m²
(50mm depth)

Flat area to cover and number of mini bags required						
AREA LENGTH						
AREA WIDTH		1m	2m	3m	4m	5m
	1m	4	8	12	16	20
	2m	8	16	24	32	40
	3m	12	24	36	48	60
	4m	16	32	48	64	80
	5m	20	40	60	80	100

For Gravels and Chippings
1 x Bulk bag covers approx. 10m²
(50mm depth)

Flat area to cover and number of bulk bags required						
AREA LENGTH						
Area Width		1m	2m	3m	4m	5m
	10m	1	2	3	4	5
	20m	2	4	6	8	10
	30m	3	6	9	12	15
	40m	4	8	12	16	20
	50m	5	10	15	20	25

For Cobbles
1 x Mini bag covers approx. 0.25m²
(100mm depth)

Flat area to cover and number of mini bags required				
Area Length				
Area Width		1m	2m	3m
	1m	8	16	24
	2m	16	32	48
	3m	24	48	72
	4m	36	64	96
	5m	40	80	120

For Cobbles
1 x Bulk bag covers approx. 5m²
(100mm depth)

Flat area to cover and number of bulk bags required				
AREA LENGTH				
AREA WIDTH		1m	2m	3m
	10m	2	4	6
	20m	4	8	12
	30m	6	12	18
	40m	8	16	24
	50m	10	20	30

*All measurements/quantities given here are for a guide only. Actual number of mini bags or bulk bags required may differ slightly on site due to natural variances in material depths etc.

CONSTRUCTION RANGE

by GRS

Our extensive range of Construction aggregates consists of high-quality products for jobs of all sizes supplied in both bulk bags and mini-bags. These materials are the core range of products that we supply daily into branches and depots across the UK.

CONSTRUCTION RANGE - SHARP SAND / PLASTERING SAND / BUILDING SAND

ABOUT THE RANGE

At GRS we understand how important it is that these construction materials match colour, texture and regional requirements. We are extremely proud of our sourcing process and local knowledge to ensure we are supplying quality materials bespoke to each specific area of the UK.

The Construction range consists of Gravel, Ballast, Type 1 and a range of sands such as Building, Concrete and Plastering Sand. Certified Topsoil is also included in the range to complete any building or landscaping project.

The last product in the range is a Self-Binding Path Gravel which is offered as an economical solution to more permanent paving substrates like concrete or tarmac and provides the added benefit of being porous.

Bespoke delivery requirements can be catered for with all these products to include loose loads direct to site and crane off-load if required.

Sharp Sand

PRODUCT SPECIFICATION	
Mini bag	Yes

RESIN BOUND AGGREGATE KIT

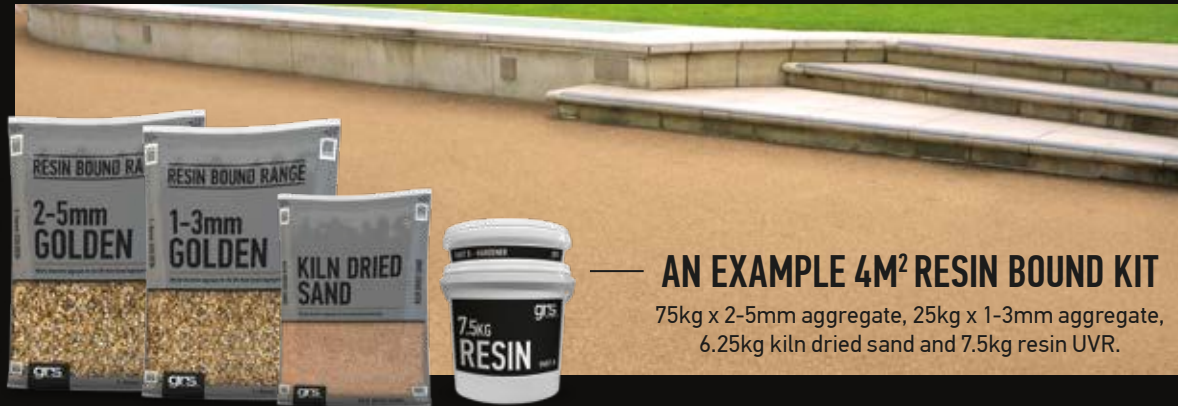

by GRS

Create stunning, durable finishes to drives, pathways & commercial spaces

- **LARGER 7.5KG UVR RESIN TUB**
More resin content = more strength!
- **MOBILE DEMONSTRATIONS AVAILABLE IN BRANCH**
Contact your sales rep to book
- **SUDS COMPLIANT**
Water permeable - drains up to 850l/m
- **48HR DELIVERY**
Order before 11am to qualify

4M² RESIN BOUND AGGREGATE KIT - 16 STUNNING COLOURS TO CHOOSE FROM!

— AN EXAMPLE 4M² RESIN BOUND KIT

75kg x 2-5mm aggregate, 25kg x 1-3mm aggregate, 6.25kg kiln dried sand and 7.5kg resin UVR.

Resin Bound surfaces are created by:

1. Mixing GRS Resin Bound aggregates together with the UV-stable resin.
2. Working in small areas at a time, pour the material to the specified approximate depth.
3. Quickly level off the mix in the working area
4. Hand trowel to form a smooth, consistent finish with no loose stones.
5. The finished surface remains porous so rainwater simply drains through it without puddling.

Basic maintenance consists of sweeping and the occasional pressure wash to restore it back to it's original freshly-laid state. Please view our website for more info and installation guides, at: www.grsbuildingproducts.co.uk/resin-bound

CONCRETE BLOCKS

by GRS

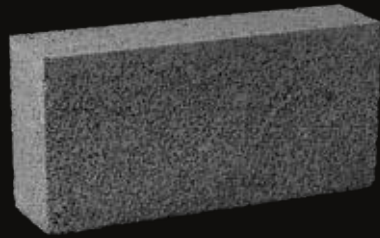

**DELIVERY
DIRECT-TO-SITE
OR INTO YARD!**

One of the most versatile of all building products, suitable for every building application above and below ground.

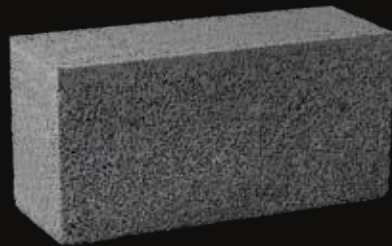

New additions to the range are our 100 and 140mm dense paint-grade blocks, featuring a less porous 'closed' face ideal for direct painting.

CONCRETE BLOCK RANGE

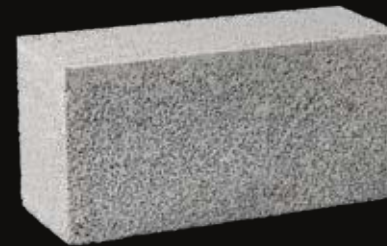

**100mm Dense
7.3N Concrete blocks**

**140mm Dense
7.3N Concrete blocks**

**100mm Medium Density
7.3N Concrete blocks**

**140mm Medium Density
7.3N Concrete blocks**

**215mm Dense Hollow
7.3N Concrete blocks**

ABOUT OUR CONCRETE BLOCKS

GRS supplies high-strength concrete blocks across the south of England from its manufacturing sites in Essex (GRS Building Products) and Cornwall (Maen Karne).

The GRS solid dense 100mm 7.3N concrete block is one of the most versatile of all building products, suitable for every building application above and below ground, including cavity and solid walls, load-bearing and solid partitioning, and in block-and-beam flooring. As well as the recent range expansion to 140mm, medium density and hollow options, the 2021 offering now includes both 100/140mm dense paint-grade variants.

GRS blocks are water and fire resistant, and give great sound insulation as well as contributing to a building's thermal mass as part of an overall low-energy design.

We currently supply blocks into East London and across the East of England – Essex, Hertfordshire, Cambridgeshire, Suffolk and Norfolk. (Maen Karne's range of concrete products is available in West London, M4 and M5 Corridors, South West and West Country.

For details, speak to a member of our central sales team 0845 250 0793 (option 2) or call our sales representative Ashley Hayward on 07885 218317, email sales@grsbp.co.uk

PAINT-GRADE

**100mm Dense (paint-grade)
7.3N Concrete blocks**

**140mm Dense (paint-grade)
7.3N Concrete blocks**

COURSING BRICKS

**215x65x100mm
20N Coursing bricks**

Concrete coursing bricks are also ideal for cutting to be used around openings and adjustments in coursing heights conveniently reducing the need to cut down whole blocks on site helping reduce cost and waste on site.

PAVING

by GRS

A comprehensive selection of traditional and contemporary paving finishes from our range of Porcelian, Indian Sandstone and Indian Limestone products.

GRS Paving will compliment perfectly our range of decorative aggregates when used in any landscaping project.

NEW

PEBBLES AND COBBLES RANGE

by GRS

Pebbles and Cobbles can be used to enhance landscaped areas with amazing results. These are most commonly used for borders, ponds and rockeries, but can be used for other large decorative areas.

PEBBLES AND COBBLES - BEACH PEBBLES / BEACH COBBLES / POLAR WHITE PEBBLES & COBBLES

ABOUT THE RANGE

Our Pebbles and Cobbles are sourced and processed in Elgin, North East Scotland which lies on the south coast of the Moray Firth, roughly midway between Inverness and Aberdeen.

These products have been naturally tumbled over thousands of years ensuring they are rounded and smooth in texture.

These are available in both bulk bags or mini-bags and we supply 20-30mm beach pebbles and larger 50-80mm beach cobbles.

Our Cobbles and Pebbles are perfect for brightening up your garden landscape all year round with their natural attractive finish. These smooth Pebbles and Cobbles will add a stylish and colourful feel to any garden landscape and water feature.

DECORATIVE GRAVELS

by GRS

Decorative gravels are popular for driveways, walking areas, path edging and dressing for planting areas. These products are a classic choice and chosen to give impact and durability in landscaping and construction projects.

DECORATIVE GRAVELS - GOLDEN GRAVEL / MOONSTONE FLINT

ABOUT THE RANGE

We offer a 20mm Moonstone Flint and Golden Gravel in both 10mm and 20mm size fractions.

Golden Gravel is a blend of browns, yellows and whites that can really brighten up an area. When wet these gravels really come to life with the yellows and browns appearing more golden in colour. This gravel has a real contemporary feel which can add an elegant look to any project. The Golden Gravel has both angular shapes and rounded gravels, with a natural buff finish.

Moonstone Flint consists of a mixture of different colours with whites and blacks mixed with grey and browns, the gravel is predominantly angular with some rounded pieces. The mix of colours, shapes and the strength of this gravel make it ideal for a wide variety of uses including driveways, paths and decorative landscaping. It is also very striking when used in water features.

SLATE

by GRS

We offer a variety of slate sourced from Cumbria and North Wales. Slate is a flat angular product that comes in three stunning colours; blue, green and plum.

SLATE - PLUM

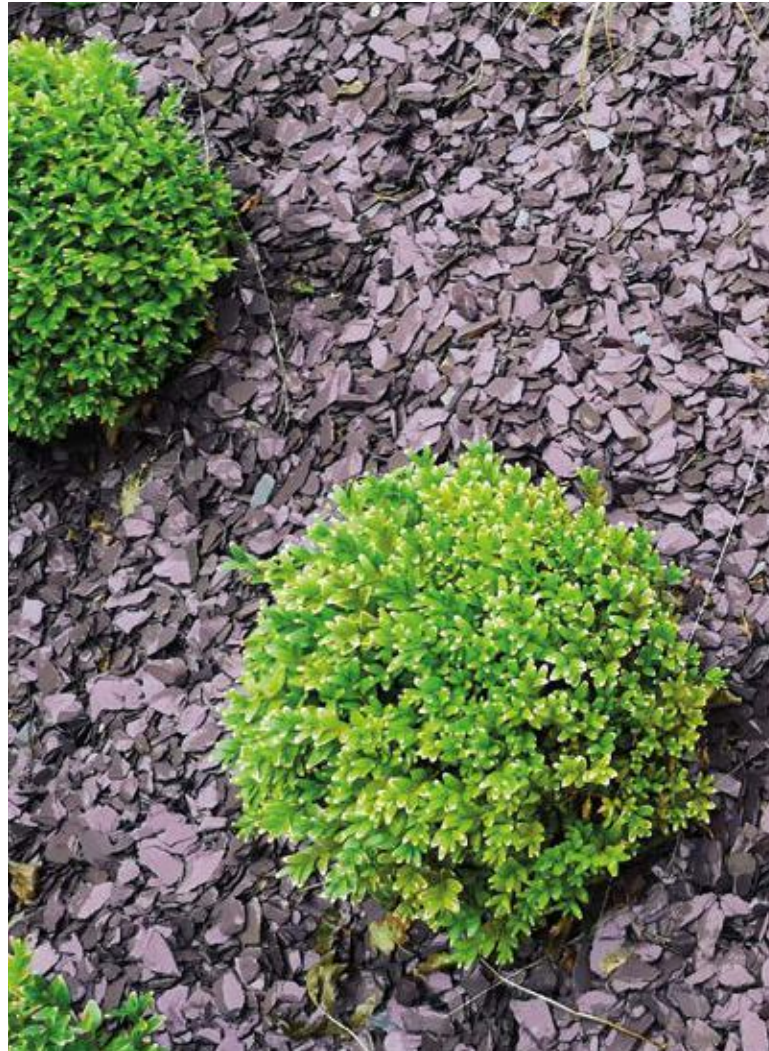

ABOUT THE RANGE

Our slate is supplied in both bulk bags and mini bags and it is available in 40mm and 20mm sizes.

The dry slates are pastel in appearance and come to life when wet, giving a bright shiny contemporary look. Slate is very popular in gardens, pathways and much more. As slate chippings are quite flat, they settle and compact nicely underfoot.

Our slate is a by-product of roof tile manufacture and as such is classed as a recycled material, which means it is more environmentally friendly than other quarried stones.

Slate chippings are often used as a mulch on borders, between plants and gardens to eliminate weed growth and also keep moisture retained in the soil during warm spells.

BULK BAG	No
LOOSE TIP	Yes
TYPICAL USAGE	Patching repairs to tarmac roads and paths
ORIGIN	UK
PRODUCT CODE	TAR

Patchphalt® Cold-Lay Macadam is the ideal solution for patching driveways, roads and paths, straight from the bag. It provides a quick, cost-effective temporary repair. Laid straight from the bag without heating, once laid it can be instantly trafficked causing minimal disruption.

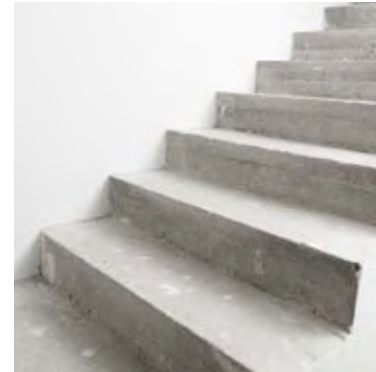

Patchphalt® Cold-Lay Macadam is extremely simple to use. No previous experience is required and no specialist tools or equipment are needed. The material is suitable for both base or surface course.

One bag of Patchphalt® Cold-Lay Macadam will cover approximately 0.4m at 30mm when compacted.

PLAY AREAS AND BARK

by GRS

GRS Building Products provides a range of safety surfacings for children's play areas, walk ways, adventure trails and trim tracks. We also supply bark mulch for landscape and contracting works. Our comprehensive range of products provides outstanding value and is manufactured to the highest standards with supporting quality assurance documentation.

PLAY AREAS AND BARK - PLAY SAND / PLAY BARK / LANDSCAPE BARK

ABOUT THE RANGE

GRS play sand is ideal for bringing the beach to your very own home.

Our Play Pit Sand is a naturally formed product and is suitable for use in play pit areas in schools, nurseries and homes. All of our Play Pit Sand has been tested to BS EN 1177 standard and testing certificates are available upon request. To ensure our Play Pit Sand is of the highest quality and suitable for children all our play sand is put through several cycles of pressure washing. Our Play Pit Sand is safe and non-toxic, making it perfect for children's play pits.

Our high quality Play Bark is a clean and safe product and widely used in children's play areas. Laid on top of a suitable weed membrane this product will not only soften the impact of any fall but also prevent the growth of weeds.

Landscape Bark is our best-selling bark. Produced from British mixed conifer bark containing a high percentage of spruce. Suitable for all landscaping and gardening applications.

RAIL

by GRS

Rail ballast is essential in the construction and maintenance of the UK rail network. The safety performance of all materials used in the trackbed requires them to be resistant to fragmentation, wear and durability against weathering effects like freezing and thawing. Our ballast is Network Rail approved.

RAIL BALLAST

ABOUT THE PRODUCT

Rail ballast serves as a bed for tracks and provides track stability, drainage, and support of significant loads carried by trains, rolling stock and carriages. In addition, it deters the growth of vegetation and allows for track maintenance to be performed more easily.

GRS Rail Ballast is produced from granite quarried in Leicestershire, this material is processed and washed to Network Rail exacting specification and is approved for use in all UK rail projects.

We can deliver either in bulk bags or loose throughout the country. For deliveries outside normal delivery hours and specialist offloading options please contact the sales office.

SALT AND GRIT

by GRS

Be prepared this winter with GRS salt and grit. Our salt and grit range includes white salt, brown salt and winter grit, supplied in either bulk bags, mini-bags or loose, all with fast delivery.

SALT AND GRIT - WHITE DE-ICING SALT / BROWN ROCK SALT

ABOUT THE RANGE

Keep all pedestrians, motorists and customers safe this winter by ensuring roads, footpaths and walkways are treated with salt or grit when snow or ice is forecast. Brown rock salt is exceptionally versatile and is ideal for melting snow from roads, car parks and pathways. Due to its colour brown rock salt becomes useful when spreading because it is visible in the snow. White rock salt is a purer cleaner alternative to the more traditional brown rock salt, mostly used in areas such as offices, car parks, hospitals and schools.

We offer these products for nationwide delivery, our salt and grit range appeals to both domestic and commercial users.
