

Ulti-Line Eaves Protector

Description

The underlay support tray is a UV stable application to prevent the exposure of the roofing underlay at the eaves, which isn't UV stable so long term will degrade and cause risk of water ingress into the roof structure.

Our eaves protectors also prevent ponding behind the back of the fascia board thus avoiding the need to install tilting fillets. Available in Black in 1.5m lengths.

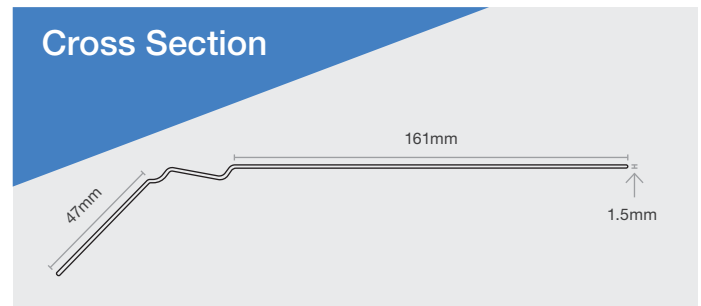

Guidelines for use

Fit whilst laying the Roof Underlay and associated Eaves Products so used in conjunction with Soffit/Fascia Vents, Rafter Tray and Bird Comb all available from Ulti-Mate® Roofing and Building Products.

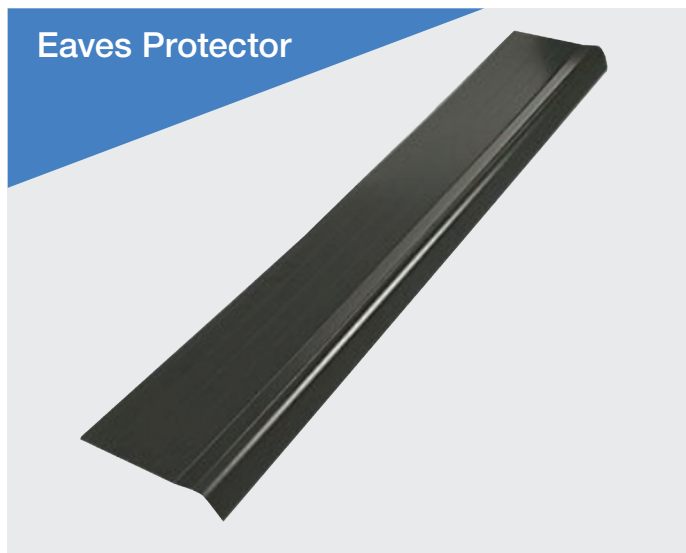

Do not leave product exposed to direct sunlight during high temperature as can distort, so cover when in Storage or complete Eaves Course.

Specifications	
Product code	ULTI1UST
Product	Underlay Support Tray 1.5m
Weight	855g
Packed in	20 piece per carton
Pallet quantity	50
Material	Recycled PVC
Manufacturing process	Extrusion
