

SmartVerge® Linear Dry Verge System - Overview

Code: **GLV**

Description:

The Manthorpe SmartVerge® Linear Dry Verge System is a fast and effective, maintenance free method for finishing the verge of a roof.

The Linear Dry Verge System can be mechanically fixed in all weather conditions without the need for mortar. It is compatible with many types of roof coverings including Fibre Cement Slates, Natural Slates and Interlocking Plain Tiles.

The Angled or Round Ridge End Cap can be used to protect the end of the ridge while the Fixing Clips and Verge Unions allow shorter sections of the Linear Verge Units to be fixed to the verge and joined together.

The sleek appearance of the product maintains the clean line of the verge while remaining unobtrusive to the original roof design.

Features:

Easy to fix and maintenance free.

Compatible with all fibre cement slates, natural slates and interlocking plain tiles.

Also compatible with many other plain tiles and concrete interlocking tiles.

Secures tiles to the roof, preventing wind uplift problems.

Mortar-free solution allows fixing in all weather conditions.

Prevents entry of birds and large insects.

Suitable for new build or refurbishment situations on roofs of 15° to 55° pitch.

Wind Tunnel Tested to comply with BS 5534 requirements for mechanical fixing.
