

SOBRANO® NATURAL ROOFING SLATE

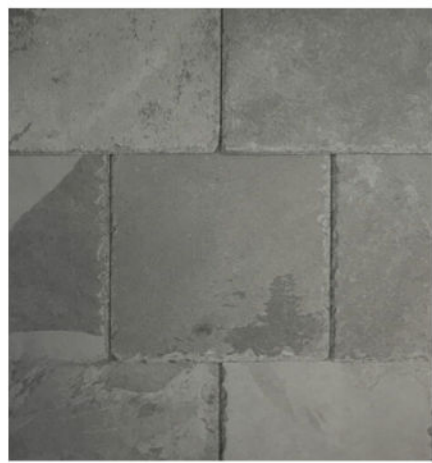

A stylish selection of traditional & contemporary natural roofing slates to suit both new-builds & property renovations.

Stunning aesthetics & exceptional durability

SOBRANO[®] NATURAL ROOFING SLATE

Brazilian Dark Grey

A dark grey slate with a natural flatness and uniform aesthetic appearance at an affordable price. This slate provides a beautiful finish ideal for new-builds as well as renovations

Brazilian Grey Green

A light grey slate with a vague hue of green. Natural flatness with uniform appearance at an affordable price, providing a beautiful finish ideal for new-builds as well as renovations

Chinese

A low-cost weathering slate, that is uniform in thickness, texture & colour. A feature of this slate is its tendency to weather sooner, creating the appearance of a seasoned and naturally aged roof with variation

Spanish P11

A classic grey slate with characteristic surface texture and overall uniform thickness, this slate is particularly durable owing to its Phyllite composition. Plenty of character and superior durability

Spanish G11

A mid-grey slate that exhibits a subtly rippled surface with a generally smooth appearance across the face overall, providing uniform thickness with a mild riven look, may contain benign surface pyrites

Quality Assurance & Warranties

Sobrano Natural Roofing Slates are tested in accordance with BS EN 12326-1.

Technical datasheets & Declaration of Performance certificates are available upon request.

If you require a specific warranty for your project then please speak with our technical sales team before making your purchase.
