

# D3

## Stand Out From The Crowd

Our D3 range has a 3D wood grain effect written directly into the board surface, designed to achieve the most natural wood look on the market. The deep 3D embossed grains provide a natural and beautifully enhanced texture that will make your deck with a difference stand out from the crowd.

D3 uses unrivalled engineering to create a premium composite with an ageless appearance. The deep 3D embossed grains provide a natural and beautifully enhanced texture. D3 provides a different experience, each board is such as a sculpture, and therefore the inventive atmosphere and aesthetic degree are greatly improved. The 3D wood grain is written directly into the board surface via a co-extrusion process and designed to achieve the most natural wood look on the market.

The outstanding superiority of this product makes it suitable for all outdoor applications. Our D3 is an exquisite premium product and is ideal for your home garden to city developments and outdoor layouts such as parks, swimming pools, holiday parks and podium deck spaces.
