VORTEX[®]

The multi-purpose
POWER SCREW

- A Recessed countersunk
- B Sharp milling nibs
- C Double countersunk head
- D Sharp, wide and deep thread
- E Sawfix serrated thread
- F Oblique-angle gash point
- G Sharp gash point

Vortex™ – the multi-purpose power screw is technically-advanced, including ‘Sawfix’ technology, which quickly and easily powers through a wide range of materials, including hardwood, decking, MDF, plastic, and sheet metal, and many other applications.

The recessed double countersunk head on the Vortex™ product range reduces the likelihood of shearing the head of the screw, whilst assisting the completion of countersinking, making it a more reliable product for users.

The sharp, wide and deep thread on the products feature ‘Sawfix’ serrated thread technology, enabling the product to quickly and easily power through surfaces, and can be used on a range of materials including hardwood, decking, MDF, plastic and sheet metal.

THUNDERBOLT™

The one and only Thunderbolt™ is the original self-tapping anchor with the power to be used on a whole range of construction materials, including concrete, stone, brick and block. The threaded anchor and self-tapping action allows for safe anchorage, with the substrate becoming the nut to the bolt-applying a tried and tested method for metals and wood to a broader selection of materials.

A truly versatile anchor, the Thunderbolt™ can be installed nearer to edges and closer together at varying embedment depths, providing a stress-free fixing. Installation is quick and easy, making it the ideal general purpose anchor, even on temporary jobs as it's completely removable. Using standard sized drill bits, the Thunderbolt™ is the cost effective fix for any job.

**THE ORIGINAL
AND BEST SELLING
ALL-PURPOSE ANCHOR**

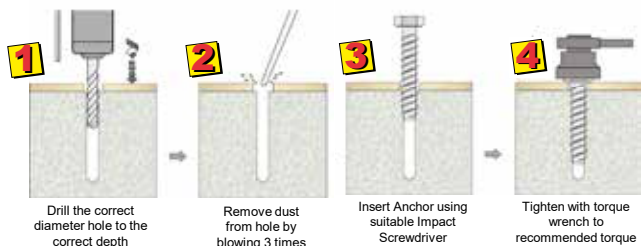

NOTHING CAN STOP THE MIGHTY THUNDERBOLT™

- Fixes over full embedment giving secure fix through voids.
- Balancing thread ensures correct alignment of anchor.
- One-piece non-expansion fixing anchor for close-to-edge fixing.
- Self-tapping thread allows for total removal of anchor.
- 25° helix angle of thread for reduced setting torque.
- Core diameter designed to avoid trapping dust whilst maintaining optimum performance loads.
- Manufactured in accordance with ISO 9000 from high grade steel.
- Achieves a tensile strength of 800N/mm² (after heat treatment).

SUBSTRATE SUITABILITY

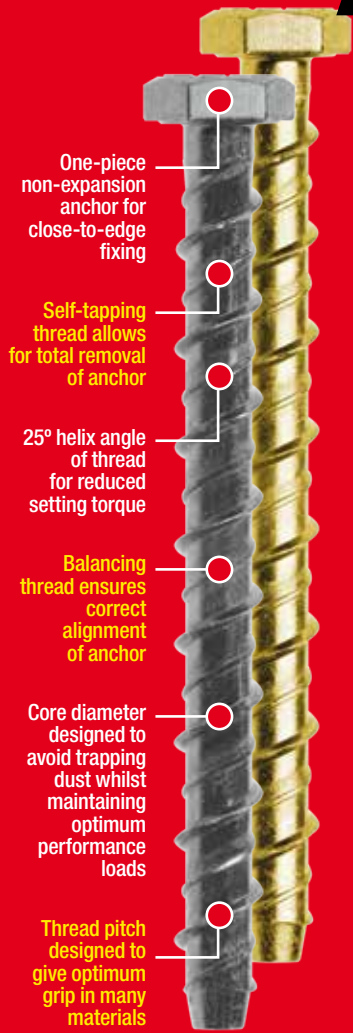

HOW IT WORKS

1 WHY IT'S BETTER

- Gives a mechanical interlock between construction material and the fixing, with no expansion stress.
- Fixes close to the edge and is totally removable.
- Fixes along the entire thread length to enable fixing through hollow sections.
- No marking out required, fix straight through your fixture.
- Works in concrete, brick, wood, marble, block, stone and more.
- Uses smaller drill bits than traditional bolts and sleeve anchors.
- Independently tested to European standards.

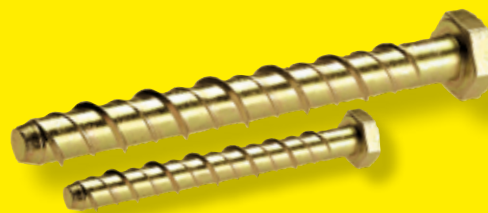

2 WHO USES IT

- General builders.
- Property developers.
- Property maintenance.
- Shop fitters.
- Plumbers.
- Restoration contractors.

Developed by our Technical Department, the JCP Anchor Specification Programme has recently been improved to include 3D graphics, along with hole depth optimisation for chemical anchors.

It has the facility to calculate numerous configurations of fixings in different base plate geometry. Calculations are carried out in accordance with the current European Guide EOTA TR 029 for bonded anchors and EOTA ETAG-001 ANNEX C for mechanical anchors.

The software and data base are updated regularly to ensure the programme is compliant with any changes in legislation, or industry standards.

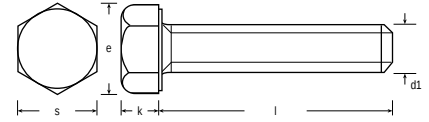

The JCP Anchor Calculation Programme is free to download via www.jcpfixings.co.uk

Steelwork Fixings

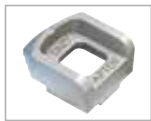

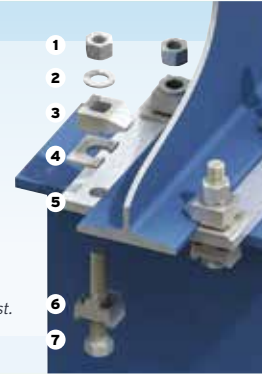

by **lindapter**[®]

Since 1934, Lindapter has pioneered the design and manufacture of quality steelwork connection solutions. The Girder Clamp symbolises the Lindapter philosophy perfectly; boldly challenging the need to drill or weld, when a safe, high strength connection can be quickly accomplished by clamping two steel sections together.

Components of a Girder Clamp

1. Standard Grade 8 or 10 Hex Nut
2. Standard Hardened Washer
3. Lindapter Clamp
4. Packing Piece (if required)
5. Location Plate
6. Lindapter Clamp
7. Standard Grd 8.8 / 10.9 Hex Bolt or Setscrew

➔ Complete Girder Clamp assemblies supplied on request.

Cavity Fixings

by **lindapter**

The CE marked range consists of the best-selling Holo-Bolt® and Lindibolt®, creating simple, cost-effective connections of SHS and other hollow sections, or conventional steelwork where access is available from one side only. The Holo-Bolt can be used as a primary structural connection as detailed in the SCI/BCSA publication 'Joints in Steel Construction - Simple Connections'.

Holo-Bolt®

Install in 3 easy steps:

1. Align pre-drilled fixture and section and insert Holo-Bolt.
2. Grip the Holo-Bolt collar with an open ended spanner.
3. Using a torque wrench, tighten the central bolt to recommended torque.

Floor Fixings

by **lindapter**[®]

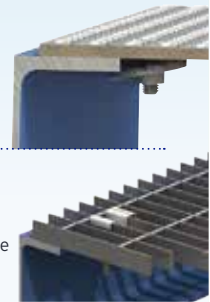

It is now possible to connect steel flooring to supporting steelwork without on-site drilling or welding for a fast, low cost operation. Access to the underside of the flooring is not required, eliminating the need for costly scaffolding or elevated floors. Installation can be carried out quickly and safely from above, often by one person, significantly reducing costs.

Floorfast[®] for chequer plate floor

- Unique stepped design locks under the flange
- Vibration and shock resistant
- Can be safely removed for maintenance access

Grate-Fast[®] for open bar grating

- High strength cast body
- Lloyd's Register Type Approved for vibration resistance
- Hot dip galvanised as standard

Injection Resin

Pure Epoxy

Pure Epoxy resin is a 3:1 ratio resin with very high load capacities. The colour of the resin is red. Approved for use in contact with potable (drinking) water.

Part Number	Description	Volume	Quantity Unit/Box
JF375E	Pure Epoxy Resin in Cartridge + 1 Mixer Nozzle	375ml	1/10
JF300E	Pure Epoxy Resin in Cartridge + 1 Mixer Nozzle	300ml	1/12

Vinylester

Pure Vinylester Resin Styrene Free is a high strength resin suitable for use in concrete, brickwork and most natural stone. Approved for use in contact with potable (drinking) water.

Rockite

Rockite (Interior Grade)

Rockite and Kwixset are fast setting hydraulic type cement products. When mixed with water they provide a compound that can be used for grouting, anchoring or patching.

1kg (2.2lb) dry powder weight fills approximately 700 cubic centimeters.

Part Number	Description	Quantity
57 9020	0.45kg (1lb) Cartons	1
57 9002	2.27kg (5lb) Carton	1
57 9003	4.54kg (10lb) Pail	1
57 9004	22.7kg (50lb) Carton	1
57 9005	22.7kg (50lb) Pail	1

Caution: Rockite and Kwixset have very strong expansion properties which generate the high tensile loads that can be achieved and as such their use in hollow bricks or blocks is not recommended.

DUCK FOOT

Duckfoot

Product Codes Begin DUCKFOOT Product Group 37

The Duck Foot anchor is a new patented drywall fixing that easily and quickly provides a strong and secure mounting in both single and double drywall. Ideal areas of application are modular shelf rails, brackets, wall units, TV mounts, lamps, etc.

No pre-drilling is required and the integrated drill ensures that the hole is the right dimension, which is no bigger than 12mm. The supplied screw is 5mm and permits an object thickness up to 22mm. Installation is carried out using a power drill and a PH2 standard bit.

Manufacturing Features

- Jubilee® clips are Kite marked to BS 5315 : 1991
- Manufactured under the stringent BS EN ISO 9001:2008 accreditation processes
- Jubilee Clips are manufactured with a built-in abuse factor to exceed British Standard breaking torque figures
- Manufactured to perform in excess of British Standard minimum requirements
- Stainless Steel range is Lloyd's Type Approved
- Rigorous quality control processes (from raw material to finished product) not only within BS 5315 but also for individual customer requirements, including testing to find out how the clips stand up to vibration, pressure and torque as well as salt spray testing to measure corrosion resistance.

Product features

- Continuously press threaded enabling flexibility of size choices
- Smooth inner band to prevent hose damage and positive contact
- Superior crimping to retain and support the screw in the housing
- 14 TPI screw and thread form allows for even and consistent tightening
- Five sizes of housing to ensure efficient thread contact and accurate form
- 7mm A/F hexagon screw with screwdriver slot
- Positively riveted housing and housing design ensures free turning torque compatible with maximum strength

Abracs

Cut & Grind

Product Group 94

Abracs are proud to supply only the highest quality ranges of abrasive cutting and grinding discs. Discs are available for use on mild steel or iron, stone and building materials, stainless steel, cast iron, aluminium and foundry materials. All Abracs discs are subject to stringent quality control procedures and meet all required safety standards.

General Information

Markings on abrasive disc labels

The safe use of abrasive cutting and grinding discs: -

It is very important to always comply with all safety and accident prevention regulations when using abrasive cutting and grinding discs. All Abracs discs are marked with the appropriate safety information pictograms.

Always wear a dust mask. Always wear ear protection. Always wear safety goggles or glasses. Always wear safety gloves. Always observe ALL safety instructions.

Grade explanation. Example: A 30 S BF

A: Indicates the abrasive grain (A=Aluminium Oxide for metal, C=Silicon Carbide for stone)

30: Indicates the grit size. The higher the number, the finer the grade.

S: Indicates the hardness of the disc.

BF: Indicates the nature of the bond. "BF" stands for reinforced bond.

Type explanation: Abrasive discs are available in several different types. The most common being F41 (Flat centre), F42 (DPC centre for cutting) and F27 (DPC centre for grinding)

Operating speeds: Maximum operating speeds are marked clearly on all Abracs discs and should never be exceeded.

Full training on the safe use and fitting of abrasive wheels is available from Abracs. Please speak to our Head Office or your Area Manager for full details on available courses.

Cutting & Grinding - Abracs' signature product range, offers one of the most comprehensive and highest quality abrasive disc ranges available on the UK market. With an extensive range of Cutting, Grinding, Extra Thin and Specialist discs available for use on a wide range of applications. All Abracs discs are subject to rigorous quality control procedures and are manufactured to European safety standards. Abracs range into 3 star and 5 star quality levels & application types to make selecting the right product as easy as possible.

Extra Thin INOX Cutting Discs

Product Group 94

Extra Thin Cutting discs are the fastest and most efficient blades for cutting both mild steel and stainless steel. They have been designed specifically for special cutting applications where speed, efficiency and accuracy are all important. EXTRA THIN do not contain Fe, S or Cl (Iron, sulphur chlorine) and are suitable for cutting stainless steel, construction steel, special material samples and are suitable for use in the petro-chemical, nuclear and food industries. Manufactured to European safety standards and supplied in attractive display boxes ideal for any trade counter or shop display. Abracs Extra Thin discs are available in both our Phoenix and Proflex range.

Key Features:

- Extremely fast cutting
- Minimum effort required
- Iron, Sulphur and chlorine free
- Precision cutting to the millimetre
- Safer and easier to use than a standard disc
- Low vibration
- Less burning than with a standard disc
- Suitable for cutting mild steel and stainless steel
- Professional performance and long life

Proflex Extra Thin are an incredibly good value product with an exceptional cost per cut ratio. Manufactured to European quality standards, a high performance disc designed for speed, accuracy and long life. The Proflex Extra Thin Discs do not contain iron, sulphur or chlorine so are suitable for stainless steel cutting applications.

- Key Features**
- H1 food grade certified by InS #1796317 • Prevents fastener threads seizing and galling on Stainless Steel fasteners
 - Lubricates a wide range of components and machinery moving parts • Recommended for all assembly work • Reduces wear and friction
 - Ease of assembly and disassembly of fasteners and mechanisms • Protects against rust and corrosion in even the harshest industrial environments

- Application**
- Food Grade Products • Anti-seize, Assembly & Dismantle • PTFE Lubricant

SC90 500ML	SC90 Food Grade Stainless Steel Cleaner 500ml	CTN 15
------------	---	--------

- Key Features**
- Cleaning all types of Stainless Steel surfaces and equipment • Leaves a unique protective soil resistant film on treated surfaces
 - Removes finger prints, water marks, all types of food residue • Does not contain solvent, abrasives, acids, bleach or salts • Retains a lasting shine
 - A1 food grade approval certified by InS #1795951 • For use on surfaces in food processing areas

- Application**
- Food Grade Products • Cleaners / Degreasers

SP90 FGR 500ML	SP90 Food Grade Dry Film Silicone Lubricant 500ml	CTN 15
----------------	---	--------

- Key Features**
- H1 Food grade • Certified by NSF #143541 and InS #1795388 • Superior non toxic maximum silicone lubricant
 - Clear, clean, and dry lubricating film • Low odour and non staining lubricant spray • Reduces friction and static • Stable over a wide temperature range
 - Prevents sticking of rubber or plastic parts • Protects against corrosion and oxidation • Ideal for use on rubber, plastics, metal, vinyl, and glass

- Application**
- Food Grade Products • Anti-seize, Assembly & Dismantle • Silicone Lubricant • Release Fluids • Plumbing Products • Electrical Products
