

Product Datasheet STRATHSTONE SPLIT WALLING

Our Strathstone Split Walling is suitable for both load and non-load bearing applications. The striking contoured texture and rich aesthetics ensures Strathstone Split Walling blends perfectly into traditional and contemporary designs making it the perfect choice for high profile commercial and private housing projects. Strathstone Split walling creates a high quality, cost effective charming appearance of authentic rustic natural stone.

- Beautiful colour blends and striking contoured texture creates the effect of natural stone • High crushing strength and density make Strathstone suitable for both load and non-load bearing applications
- Choice of beautiful timeless colours: Buff, Buff/Black, Buff/Brown, Light Grey, Charcoal and Grampian Grey and Caledonia. Also, Plum and Red are available as made to order.
- Low water absorption

Product Specifications	
Product type	Strathstone Split Finish Walling
Manufacturing process	Hydraulically pressed;split finish
Manufactured to	BS EN 771-5
Dimensional tolerance	Category D1
Compressive Strength	25N/mm ²
Mean unit strength	25.0N/mm ²
Net dry density	2200kg/m ³
Durability	Frost resistant
Reaction to fire	Euroclass A1 (EN 13501-1)
Recyclable	100% can be recycled
Application	Internal and external walls, faced retaining walls, and extensions,
Thermal conductivity	1.24W/mk
Bond Strength	0.15N/mm ²
Water absorption by capillarity	0.2g/m ² s all strengths
Water vapour diffusion coefficient	All strengths 30/100 - Moisture movement <0.4mm/m
