Specifications		
Bag details	Bag size	Number of bags per pallet
	50 litre pre-packed bag	50
Features and usage	Features	Usage
	<ul style="list-style-type: none"> A blend of materials including composted bark fines and PAS100 certified soil improver with added nutrients. Produced with bark fines of which 90% of particles are in the range of 0-10mm. Contains minimal white wood, normally within 10% (by volume basis). The weight/volume ratio (bulk density) is normally in the range of 350-550kg/m. The pH range is between 6.5 and 8.5. Brown/black in colour with the feel and consistency of peat. Durable, long lasting and free from pathogens and pests. 	Ideal for: <ul style="list-style-type: none"> Indoor and outdoor plants. Sowing seeds. Hanging baskets and tubs. Filling pots. Rooting cuttings.
Environmentally friendly	This product is free from peat, which is an increasingly rare natural resource. Peat bogs are an invaluable habitat for flora and fauna and an important store of carbon – destroying them to make garden compost contributes to battling climate change. Manufactured from materials sourced 100% within the British Isles, thus completely free of any trace of methyl bromide contamination.	

Storage: Store under cool, dry conditions and prevent contact with water, chemicals, weed seeds and other contaminants.

Whilst all practical measures are taken to remove foreign matter such as metal, glass, plastic we cannot guarantee the complete absence of all extraneous material. The total amount will not exceed 0.2% by weight.

A Material Safety Data Sheet (MSDS) is available for this product, on request. Please email info@rolawn.co.uk
