MIXING EQUIPMENT

REFINA supply the most comprehensive range of specialist mixing equipment for the plaster, render, floor, concrete repair and conservation trades

The equipment includes the best selling, most reliable and durable range of German made MEGAMIXER mixer drills and mixer paddles

REFINA produce the ROTAMIXER and DAINES force action rotary tub and drum mixers. The latest mixer being produced in the UK is the RESIMIXER stainless steel rotary paddle mixer for resins and epoxies

SPRAY EQUIPMENT

REFINA air powered spray equipment is designed to complement our range of mixers, applying decorative coatings, textures, cements, mortars, plasters and renders

There is equipment for applying thin coat render, masonry paints and external coatings, finish plasters, fireproofing and intumescent coatings, tyrolean and external wall textures, acrylic and silicone renders, tanking and waterproofing finishes

SURFACE PREP EQUIPMENT

We supply a range of specialist application power tools that will handle a variety of surface preparation and refurbishment jobs, rendering, concrete repair and screeding

All are dust free when used with dustex hood and vac

The power tools and equipment are available for hire and sale across the country

MM30 1800W H HANDLE MEGAMIXER®

- new design H handle for improved cable protection
- powerful motor & long life two speed gearbox
- supplied with MR3 spiral paddle
- dust cover for switch
- soft start & low splash
- smooth, lump free mixes
- easy & comfortable handling
- high torque, slow speed for powerful mixing
- heavy duty plaster & mortar mixers
- large range of interchangeable paddles
- guaranteed German made mixers & paddles

The plastering and rendering trades' favourite MEGAMIXER, the MM30 is a well proven and robust power tool with an 1800w motor that will generate a fast, thorough mix action for consistent results. The new H handle gives easy handling and a comfortable work position whilst protecting the power tool motor from damage

All MEGAMIXERs have soft start variable speed that minimises splashing when starting. The power mixers are supplied with an MR3 spiral paddle that is the most efficient for converting power tool torque to an easy and consistent mix action

With its heavy duty 1800w high torque motor and two speed gearbox, this is the most powerful mixer for contractors requiring constant output

The two speed mixer MM30 is best for mixing heavy materials and large volume mixes including plasters, hardwall and bonding, external renders, floor screed, repair and epoxy mortars. It will easily handle a four bag mix without struggling and it will do so day in, day out

MEGAMIXER®	MM30
Power	1800w

MM21 & MM22 1150W H HANDLE

- new design H handle for improved cable protection
- powerful motor & long life gearbox
- soft start, low splash
- smooth, lump free mixes
- easy & comfortable handling
- high torque, slow speed for powerful mixing
- medium weight plaster & mortar mixer
- large range of interchangeable paddles
- guaranteed German made mixers & paddles

The MM21 & MM22 MEGAMIXERS are medium weight power mixers with H handle, all metal gearbox and reliable 1150w motor

They generate a fast, thorough mix action suitable for modern plasters and building materials

All MEGAMIXERS have soft start, variable speed, that minimises splashing when starting

The H handle gives easy handling and a comfortable mix position; the new design handle helps protect the power tool motor from damage

The power mixers are supplied with an MR3 spiral paddle but can also be supplied with a variety of different paddle designs

The two speed MM22 with the extra slow speed will mix both heavy mortars as well as lightweight powders, plaster, bonding, drylining adhesive and epoxy coatings, liquid and stiff mixes

MZR21 & EZR23 TWIN PADDLE

- new design H handle for improved cable protection
- powerful contra-rotating positive mix action
- twin paddles for thorough mixing
- soft start, low splash
- easy & comfortable handling
- for heavy & difficult to mix materials

The twin contra-rotating paddles generate a thorough and consistent mix action that reduces air entrainment. The twin paddles reduce counter rotational torque and the mixer drill does not try and twist when mixing heavier materials; minimising operator fatigue particularly with stiff mixes.

The twin paddles give the most thorough mix for heavy mortars, fibre filled cements, pastes, putties and epoxies. The mixers are suited to multi-component, specialist materials and critical mix applications.

MM19 D HANDLE & MM20 H HANDLE

- solidly made, hard working power tools
- heavy duty motor & long life gearbox
- MM19 back & hoop handle mixer for easy handling
- MM20 with ergonomic H handle
- high torque & slow speed for heavy materials
- large range of paddle sizes & designs
- reliable power tools with fast service backup
- guaranteed German made mixer drills & paddles

The MM19 MEGAMIXER is a D handle power mixer and combines a simple well proven design, reliable gearbox and powerful 1050w motor

The MM19 will mix finish and browning plasters, bonding and drywall adhesive, floor coatings and epoxy paints; ideal for one and two bag mixes

The MM19 is our best selling multi purpose mixer for the plastering and building trades

The MM20 MEGAMIXER is a single speed 1100w power mixer with H handle design. The H handle gives easy handling and a comfortable mix position; the new design handle helps protect the power tool motor from damage Both mixers have robust well proven motors, soft start switches and MR3 130 spiral mixer paddles

The simple robust designs make them powerful and reliable power tools for plastering and building trades

- heavy duty motor & long life gearbox
- D back handle, easy handling
- high torque & slow speed for heavy materials
- large range of paddle sizes & designs
- reliable power tool with fast service backup
- guaranteed German made mixer drill & paddles

The MM29 is a single speed power mixer with slow speed, high torque gearbox, 1800w motor, soft start variable speed switch and spiral mixer paddle

The D handle gives easy handling and a comfortable mix position

This design has been a particular favourite with the rendering trade for many years

It's simple robust design makes it a powerful and reliable power tool for contractors mixing large volumes of heavy materials

It is supplied with an MR3 160G 6¼" paddle and is best for mixing heavy materials including render and monocouche, hardwall and bonding, polymer renders, floor screed, epoxy and repair mortars

EPI MIXER THREADED PADDLES

- trade quality technically designed paddles
- generate a thorough mix action
- threaded shaft to fit directly into mixer drill
- largest range of designs & sizes
- guaranteed German made quality

Threaded EPI mixer paddles fit directly into the front end M14 thread of the mixer drill

The paddles are of proven design to give efficient mix action; they are produced to ensure a perfectly balanced shape that eliminates paddle wobble

MR3 paddles with negative top to bottom mix action are the most popular design for a wide range of bagged materials, plaster, cements, resins, coatings, wet and pourable mixes. The mix action is thorough and consistent; the paddle floats in the mix making handling easy

The MR3R paddles are the same design but with a right hand spiral and positive bottom to top mix action

The MR4 design are a screw spiral, turning and lifting the material. The MR4 paddles are for stiffer mortars and epoxies

The MR1 hoop paddles whisk the mix and are used for lighter weight powder mixes

The MR8 paddles are an impellor design that generates a semi-dispersion mix for paints and coatings

- ✓ mix liquids & powders
- ✓ plasters & textures
- ✓ renders & lime mortars
- ✓ paints & coatings
- ✓ cements & mortars
- ✓ resins & epoxies
- ✓ latex & screed
- ✓ tile cements & adhesives

MIXING TUBS

- heavy duty plastic tubs
- for mixing & gauging
- plaster & cement
- epoxy & mortar
- can be used for material handling & transport

The black mixing tubs are produced in heavy gauge plastic and are tapered for easy stacking

The narrower 32 ltr tub with hoop handle is often used for finish plaster and coatings

The white plastic mixing tubs are produced from rigid plastic with a heavy gauge wall thickness

They are designed for site use, handling and mixing construction materials

The tubs have moulded side handles and are used for mixing plaster, render, mortar and epoxy

The Mack bucket scoop is designed by Andy McKay from Ringwood and is available to buy on the REFINA website

EHR750B PETROL MIXER

- powerful 4 stroke petrol engine
- supplied with a 140mm spiral paddle
- electronic ignition
- more powerful than battery mixers
- easy & comfortable handling
- high torque, slow speed for powerful mixing
- produced by EIBENSTOCK Germany

This hand held petrol powered mixer is recommended for external use mixing mortar and epoxies
The mixer is ideal for external work involving bridge and road construction, concrete repair and renovation
The EHR750 will mix monocouche and one coat (OCR) renders

FLOORMIX MOBILE MIXER

- heavy duty motor
- two mechanical speeds
- additional electronic speed reductions
- 5 x 20kg capacity for pourable cement floor toppings
- large diameter stirring paddle
- centrally located paddle gives full sweep of material
- paddle mixes right to the tub base & edge
- no unmixed powders at the tub base
- connection for dust extraction
- drive unit & paddle easily removed
- mobile mix & pour station
- inexpensive additional tubs

The FloorMix will thoroughly and quickly mix up to 5 x 20kg bags of liquid cementitious materials

The centre mounted full sweep paddle ensures a thorough mix with no unmixed pockets

A range of paddles are available for floor paints and pourable epoxies

Mixing and placing of floor toppings is easy and fast, boosts productivity, lowers labour costs and reduces physical effort

It will mix, transport and pour directly onto the floor

The FloorMix is designed for self levelling floor compounds but will mix a range of pourable floor paints, coatings and grouts

There is a dust extraction port for vacuum connection. The mixer top is partly covered to reduce air born dust. There is an additional removable cover for dust and splash reduction fully enclosing the mix

The mixer will run off 110v construction site electrics using a 32 amp 5kva transformer or 6kva generator

DAINES® MR40 MIXER

- compact forced action mixer
- simple L shape paddle for thorough mix action
- light weight & easy to use
- easy clean & low maintenance
- produced in the UK

The DAINES Mixal MR40 drum mixer is solidly built with a rigid grp shell, L shape paddle, 32 litre metal drum and simple basket drive. It is easy to clean and gives an excellent mix

The rotating drum produces a centrifugal action and the paddle mixes from the outside in

The mixer uses a 32 ltr steel drum with pail type handle and is for one bag mixes of mortar and epoxy, floor paints and coatings

The new MR30 mixer is built around the same grp shell but includes a tapered 32 litre plastic tub and tapered drive basket

RM65 & RM90 ROTAMIXER®

- robust forced action paddle mixers
- stainless steel adjustable paddles
- twin paddles for thorough mix action
- radial & axial mix, turns & lifts material
- easy clean for epoxies & cements
- produced in the UK

The RM65 and RM90 mixers are robust forced action mixers designed for those materials that can't be successfully mixed in a conventional free-fall cement mixer

The rotating drum produces a centrifugal mix and the technically designed paddles generate a radial and axial action

The machines are easy to clean and maintain, and replacement mixing tubs are economically priced. The machine includes a stainless steel L shaped side paddle and a rotary claw paddle which will mix right up to the tub centre, sides and base

The RM65 is a compact forced action mixer for up to two bags of repair or fibre filled mortar, grout, epoxy, screed, flooring latex and coatings, cements, tile adhesives and special plasters. The RM90 can mix up to three bags

These mixers are produced with a 110v high torque motor and sealed gear box; 230v and 415v motors are also available for both models

RMX120 RESIMIXER®

- heavy duty rotary paddle mixer
- removable 120 ltr stainless steel drum
- 4 x 25kg bags of aggregate mix capacity
- adjustable stainless steel mixer blades
- uniform & consistent mixing
- bottom outlet for discharge into barrow
- easy to clean, no centre mixing shaft
- produced by REFINA in the UK

The RMX120 is produced in the UK and is the first machine designed to mix aggregate and resin material used for resin bound surfaces and driveways

The rotary paddle forced action mixer will mix resin bound aggregates, driveway materials, resins, rubber crumb and playground surfaces

The machine has a removable stainless steel drum and paddles for easy cleaning

The motor and gearbox is mounted on the top of the mixer drum and is removed for cleaning

It has two adjustable paddles and is driven by a powerful electric motor and sealed gearbox

The mixer is supplied with a 1.5kw 110v motor. The 110v mixer should be used with a 5kva transformer and only one 4mm 32amp extension lead

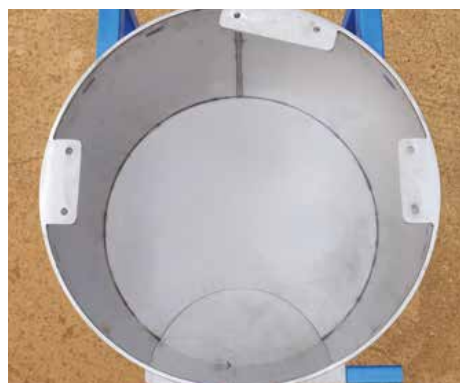

A 230v motor is available for domestic building work

The mixer will run off 110v construction site electrics using a 32 amp 5kva transformer or 6kva generator

RMX140 ROTAMIXER®

- heavy duty rotary paddle mixer
- three adjustable mixer blades
- uniform & consistent mixing
- bottom outlet for discharge into barrow
- for dry & bulk mixes
- easy to clean, low maintenance

The RMX140 is a rotary paddle forced action pan mixer with large capacity drum

It will mix mortars and external colour through renders including monocouche and K-Rend

It has three adjustable paddles and is driven by a powerful electric motor and sealed gearbox. This mixer is powerful enough to mix the heaviest render, mortar and screed

The RMX140 can mix materials with aggregate up to 8mm. The mixer is supplied with a 1.5kw 110v motor; a 230v motor is available for domestic building work

It will mix 5 bags of mortar or a 4 to 1 sand and cement mix

The mixer will run off a good 110v construction site electrical supply using a 32amp 5kva transformer or 6kva generator. The 110v mixers are not designed to run off a domestic 13amp supply

For refractory cements use a 415v three phase machine

- ✓ monocouche & ocr render
- ✓ sand & cement renders
- ✓ colour through & polymer renders
- ✓ polymer screed & mortars
- ✓ repair mortars & cements
- ✓ sand & cement screed
- ✓ refractory cements
- ✓ six to one screed mixes

RMR230 ROLLER PAN MIXER

- mill type roller pan mixer
 - heavy twin grinding rollers
 - for use in historic building refurbishment
 - conservation & refurbishment trades
 - schools & training institutions
 - reworking lime mortars & putties
- This roller pan mixer uses twin 85kg rollers that will turn and mix lime mortars and putties, renders and plaster, rework traditional and reclaimed materials, crush and rework old and reclaimed materials
- The mixer is supplied with mesh lid and guard
- The 110v model is fitted with a 32amp plug and needs to run off a 5kva transformer

- ✓ lime mortars & putties
- ✓ sand & cement renders
- ✓ polymer screed & mortars
- ✓ repair mortars & cements
- ✓ refractory cements
- ✓ reconstituting heritage mortars

RENDER SPRAY GUNS

- high volume, lightweight air powered spray gun
- single & three nozzle gun for sand & cement renders
- four nozzle long arm gun for higher volume applications
- compressor produced in the UK

The single hopper render spray gun is simple and effective to use and is one of the few spray guns that will spray apply sand and cement renders

The gun will spray render and dash with an aggregate up to 5mm

The finish can be altered by adjusting the mix or aggregate used

A range of textures and finishes can be achieved; spraying at a lower air pressure (2-3 bar) will give a more textured finish

After application, the render can be ruled flat with an aluminium straight edge and finished with a steel trowel, plastic or wooden float

Render can be applied in one or two coats, normally up to 12mm to 15mm

The hopper spray guns will spray renders, waterproofing and tanking render, spritz and bonding mortars, concrete repair and cementitious coatings

The single nozzle spray gun will run off a 15cfm compressor

The four nozzle gun will give the best results using at 30cfm or a one tool site compressor

- ✓ spraying sand & cement renders & slurries
- ✓ cement based repair mortars
- ✓ lime mortars & putties
- ✓ stucco & plasters
- ✓ spritz & bonding mortars
- ✓ waterproofing & tanking coatings
- ✓ scratch coats & textures
- ✓ fine finishes & top coats
- ✓ structural waterproof render

STX410 SPRAY PUMP

- hopper feed screw pump
- stainless steel hopper
- easy to use & clean
- 110v available as standard
- quick release rotor & stator assembly

The STX410 is a mini screw pump that will spray finish coatings and plasters, thin coat and external wall coatings, fireproofing and intumescent paints

The 110v pump will work off a standard domestic supply 3kva transformer and is ideal for spraying finishing plasters in new build and domestic building refurbishment

The screw pump uses the mono pump principle, with a rotor and rubber stator to pump and spray finish plasters and waterproofing render, fireproofing and textured paints and cementitious coatings

The lance spray gun is supplied with a 8.5mm nozzle
Other nozzle sizes available

The pump, gun and hose are supplied with brass claw couplings as standard, alloy camlock fittings are available.

ACF405 PERISTALTIC PUMP

- hopper feed roller & tube pump
- for refurbishment & repair trades
- heritage & conservation
- bridge & stone reinstatements
- waterproofing & brick pointing

The ACF405 peristaltic electric pump has a metal hopper, variable speed output that can pump up to 5 ltr/min

Pointing machines work best pumping pre-bagged mortars and grouts that have been produced for mechanical application

Mortars mixed on site using sharp builders sand are not suitable for pump application

The peristaltic pump is a positive displacement pump and used for pumping a variety of flowable mortars and grouts. The material is drawn down from the hopper into a roller and tube mechanism. This compresses the flexible tube, forcing the material out towards the gun

The 110v peristaltic pump will run off a 13amp supply and 3kva transformer

EPO180H-SRX SURFACE SCABBLER

- rotary surface scabbler
- replaceable cutters
- solid tungsten cutters or tct cutters
- for paint, render & refurbishment trades
- dust free with vac

The EPO180H with scabbler head will clean, key and prepare interior and exterior wall and floor surfaces. The scabbler is excellent for stripping exterior facades and interiors before refurbishment or replastering, keying cellar walls for tanking

The scabbler uses freely rotating cutters to key and peen the surface. The cutters are replaceable

C6 tungsten carbide tipped scabbling cutters, for render and plaster; leaves a rough finish

C4 solid tungsten carbide claw cutters are for shaving off coatings; leaves a peened finish

C5 solid tungsten star cutters are for keying hard coatings; leaves a keyed surface

EBS1802H 5" DIAMOND GRINDER

- powerful hand-held grinder
- fitted with low vibration handle
- removable front guard for edging
- dust free with dustex vac

The EBS1802H is a powerful 1650w 5" diamond grinder, supplied with a segmented diamond disc. The new generation of diamond discs are excellent for prepping a wide range of difficult to remove materials including thick and elastomeric coatings, cement adhesive, bitumens and hardened epoxies

It is produced with a reduced vibration H-handle for easy and smooth working on hard floors. The diamond grinder has a dustex guard and the front is removable for edging. The grinder-planer will level floors, slabs and walls, stone, curbs, stairs and pillars; face off shuttered concrete lines and pour spills; remove hardened epoxies and stone paints; smooth out trowel marks from screed and latex; cut back carpet adhesive and tile cement residues; skim off traffic markings and thermoplastics

A range of specialist application diamond discs are available. Only 5" discs will fit the EBS1802H

EPO1310 SURFACE BLASTER

- powerful rotary surface prep machine
- rubber mounted tungsten points
- dust free with dustex vac

The surface blaster discs have rubber mounted tungsten points for fast cleaning of coatings and rust from steel and marine surfaces, pipes and weld joints

The surface blaster discs will cut through and remove sticky residues including chewing gum, bitumens, sealants, adhesives, elastomeric and rubberised paints

The power tool will prep structural steel and tanks, keying the surface for anti-corrosion coatings

Individual discs are mounted on a hex shaft

EIBENSTOCK

- ✓ blast off paint & rust
- ✓ cleaning inside tanks & bunds
- ✓ remove rust from checker plate
- ✓ prep before recoating
- ✓ clean large pipe joints
- ✓ for use by marine repair trades
- ✓ pipework contractors

EPG400 POWER FLOAT & SPONGE

- slow speed finishing
- float up to 60 sq metres per hour
- range of discs & floats available

The EPG400 is a hand held rotary power float and sponge for finishing external renders and monocouche

A float disc and medium sponge are included with the machine

The power sponge uses a slow speed motor to sponge or float finish large areas of spray or trowel applied backing coat plaster or one coat render

The toothed scraper disc is for scraping back monocouche render, it is effective where the render has gone off and it is hard to hand scrape. It can be used on new precast concrete

The sanding and tungsten discs are for use on insulation board

ELS225 9" DRYWALL SANDER

- with quick change flexi joint
- no tool needed for changing the flexi joint
- powerful large area sander
- cushioned velcro backing pad
- large holes for effective dust control
- easy handling for wall work
- removable guard side for edging

The ELS225 is a long reach sander with a simple and light handle extension. The sander head has a flexi joint that can be simply replaced without tools

The sander is used for sanding back and smoothing drywall joints; prepping and sanding walls and ceilings prior to painting and decorating. It is lightweight and comes complete with dust guard allowing dust free operation when coupled with a suitable vac

Due to the suction force of the VacuGlide-System it allows the long reach sander to hold on the wall or ceiling and can be guided without problem

The edge of the dust guard is cut away allowing sanding right to the edge

The range of discs are velcro backed

- Render Scrapers & Rasps
- Feather Edges & Box Rules
- Spike Rollers & Floor Paint Rollers
- Notched Trowels & Pin Levellers
- Squeegees & Coving Trowels
- Screed Placers & Levellers

SUPERFLEX® SKIMMING TROWELS

- flexible chrome stainless steel
- range of sizes & blade widths
- rounded corners & finished blade edges
- for finishing & smoothing
- skimming plasters & internal wall finishes
- special finishes for walls & ceilings
- produced with soft composite blue rubber handle
- wood, composite leather & cork handles in stock

The SUPERFLEX trowels are produced with a flexible stainless steel blade, alloy bracket and moulded soft grip handle

These trowels are lightweight and easy to use on multi-finish, skimming and board finish plasters

The SUPERFLEX 1 & 2 are both produced with a semi-flexible 0.4mm blade

The SUPERFLEX2 has a slightly narrower blade making the trowel slightly stiffer

These are the most durable flexible plastering trowel available

SUPERFLEX is a registered brand of REFINA Ltd

Additional replaceable handles include leather, cork and wood available at £6.00 each

FINATEX® TROWELS

- hand finished premium trowel blade
- super flat plastering trowels
- the straightest finishing edge
- slightly radiused corners
- machine chamfered side edges
- chrome stainless steel, rust free
- produced with soft composite blue rubber handle
- wood, composite leather & cork handles in stock
- made in Germany

These trowels are premium quality trowels for plaster, rendering and cement trades

They are made from the finest and flattest chrome stainless steel for rust free use, manufactured using the most modern production techniques and hand finished to ensure the finest trade quality trowel

The newly improved and lightweight trowels are produced with a slimmer shape handle and are mechanically broken in. The soft blue composite handle has been redesigned, is comfortable on the hand, easier to grip and reduces muscle and joint strain

The new canvas multi-trowel holder can fit up to three trowels. It has strong buckle fasteners and carry handles and can be folded to go in to a bucket or can be hung up from the two corner eyelets

CEMENT, RENDER, POOL & FLOOR TROWELS

- chrome stainless steel trowels, rust free
- soft composite rubber handle
- cement trowels have narrower stiffer blades
- range of sizes & designs
- available with traditional wooden handles
- new composite leather & cork handles
- for cement & render
- screed & epoxy

These are a range of premium quality trowels produced for trade use on render and cement

The trowels are slightly narrower and more rigid than the wider more flexible plastering trowels

They are made from the finest chrome stainless steel for rust free use

The trowels are produced with a blue composite rubber soft handle. The soft handle is comfortable and easy to grip

The soft handles are not resistant to solvents

The pool trowels are supplied with either long shank for stiffness or short shank for a more flexible finishing trowel. They are rounded at both ends and used on specialist floor & wall finishes

The pointed end floor trowels have a long shank for stiffness

Our range of additional handles include wood, leather and cork that can be easily changed

These cement and render trowels are produced with a 0.6mm blade

As a general guide the narrower the blade, the stiffer the trowel

PLAZIFLEX® FLEXIBACK® TROWELS

- new more durable construction
- replaceable blades & range of sizes
- excellent finish & lightweight to use
- no need for splashing water on final coat
- cover large areas with less trowel pressure
- easier on the arm & joints
- flexible blade suitable for curved surfaces
- for multi finish & skimming
- PLAZIFLEX blades are produced in the UK

These PLAZIFLEX skimming trowels are for finishing and trowelling up topcoat plasters and finishes

They are lightweight and easy to use leaving an excellent finish on the final skim coat

The trowels have a flexiback design that gives flexibility across the blade width but rigidity along the length

The trowel body has a stainless steel blade with alloy shank and soft handle; it slots into the plastic blade holder bracket on the flexible plastic blade

Use the PLAZIFLEX after the wet trowel (normally steel trowel) application then dry trowel and final cross trowel to finish

It's a lot easier going on the arm, the plastic just glides over the surface and brings up the surface to a tight polished finish

The plastic blades allow easier and faster closing in and flattening of the final finish coat. There is less need to wait for plaster to pick up, and can be used effectively when plaster is still wet

PLAZIFLEX® SKIMMING TROWELS

- plastic faced trowel blades
- semi flexible trowel blades
- replaceable blades & range of sizes
- excellent finish & lightweight to use
- cover large areas with less trowel pressure
- easier & faster closing in and flattening
- for multi finish & skimming
- white cements & renders
- produced in the UK

These PLAZIFLEX trowel blades are slightly stiffer than the flexiback trowel blades and are for finishing and trowelling up finish plasters and coatings

They can also be used to achieve special finishes with external renders. The trowel can be used on decorative wall and floor finishes and epoxy quartz

Use the PLAZIFLEX after the wet trowel (normally steel trowel) application then dry trowel and final cross trowel to finish

It's a lot easier going on the arm, the plastic just glides over the surface and brings up the surface to a tight polished finish

The plastic blades allow easier and faster closing in and polishing of the final finish coat. There is less need to wait for plaster to pick up, and can be used effectively when plaster is still wet

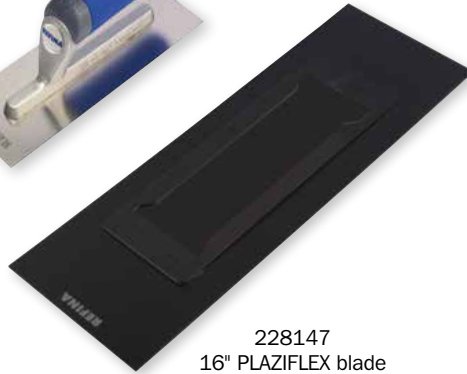

The new PLAZIFLEX mini trowel has a push stainless steel finger trowel and flexiback replaceable blade for use like a pipe trowel

The mini spatula is used for flattening small areas

The new PLAZIFLEX darby-spatulas can be used one or two handed for flattening

PLAZI® SKIMMING SPATULA-RULES

- plastic faced blades
- roll grip handle
- clip on angle handle & extension pole available
- for finish & skim plaster

The PLAZI spatula-rule has a roll grip frame which is both rigid and lightweight compared to metal frame rules. A clip on adjustable angle handle and extension pole are available for ceiling work.

These spatula-rules are now produced with an extruded blade.

The PLAZI spatula-rules are used for flattening and levelling.

Plastic blades will 'pull' less on the surface.

ERGO GRIP SPATULA-RULES

- flexible stainless steel blades
- rigid plastic profile
- lighter weight than aluminium rules
- rounded edges & tapered blade
- ergo grip h frame
- for finishing & smoothing
- walls & ceilings
- plasters & special finishes

The skimming spatula-rules are produced with a flexible stainless steel blade and ergo grip lightweight rigid handle. The semi-flexible bladed spatula-rules have a thicker stainless steel blade and are for flattening. The smaller mini-spatulas are for fine detailing, smoothing and micro-cement work.

The larger skimming spatula-rules are for finishing larger areas and ceilings.

The rigid plastic ergo grip frames are 30% lighter than comparable rules with metal frames.

SKIMMING SPATULAS & KNIVES

- stainless steel finishing blades
- for smoothing & flattening
- wall & ceiling coatings
- plasters & spray finishes
- multi finish & board finish

The skimming spatulas are produced with a rigid aluminium bracket and stainless steel blades for flattening and smoothing plasters

The spatulas with a 50mm deep 0.5mm blade have a stiffer feel for crossing in and levelling

The spatula knives blade have a thickness of 0.5mm but with the deeper 100mm blade are more flexible

MIDGET PLASTERING TROWELS

- stainless steel, rust free
- range of narrow & small finishing trowels
- soft composite rubber handle
- for plaster & cement finishes
- working round pipes & reveals

These are a range of small sized plastering trowels

The trowels have composite soft moulded handles and are produced in stainless steel for rust free use

They are used for finishing small areas or tight, narrow strips around doors, frames or switches

These midget trowels are a useful addition to any plasterer's tool kit

These midget trowels are produced from 0.8mm stainless steel with short tangs and narrow blades giving them a stiff blade

POLISHING TROWELS & SPATULA KNIVES

- highly polished trowel blades
- mirror finish stainless steel finishing blades
- polished tang & bracket
- for smoothing & flattening
- burnishing & finishing
- Venetian & fine plasters
- Marmorino & medium texture finishes
- lime based & stucco plasters
- veneer plasters & decorative finishes
- marble based coatings
- micro cements
- jointing compounds, fillers & putties

The polishing trowels and spatula knives are produced with mirror finish stainless steel blades in both flexible (0.3mm) and semi-flexible (0.6mm) blades

The flexible blades are generally used for finer grain Italian plasters and micro cements

The stiffer bladed trowels have a firmer feel and are for burnishing and trowelling up and for the application of marble grain polished plasters. The stiffer bladed trowels have rounded corners and bevelled edge blades

Trowels for Italian type plasters tend to be smaller than standard plastering trowels for the final application, polishing and burnishing of polished plasters, lime based and stucco plasters

The spatula knives are high grade putty knives available with both flexible (0.3mm) and semi-flexible (0.6mm) blades and are ideal for applying Venetian plaster and special finishes. The stiffer knives have milled edges and a mirror finish polished blades

There are a wide variety of Italian style Venetian plasters, from very fine, to marbled and more textured Marmorino and internal stucco finishes

Micro cements are hard wearing decorative finishes available in various colours and can be finished with a polished, matt or lightly textured finish. They are normally applied at about 2mm thick

SMALL APPLICATOR PLASTERING TROWELS

- polished stainless steel, rust free
- flexible & semi-flexible blades
- polished tang & bracket
- range of narrow & small finishing trowels
- soft composite rubber handle
- for plaster & cement finishes
- working round pipes & reveals

These mini trowels are a range of small sized, high quality plastering trowels with polished mirror finished, flexible and semi-flexible stainless steel blades

The trowels have composite soft moulded handles and are produced in stainless steel for rust free use

The trowels with a 0.3mm stainless steel blade will be ultra-flexible while the 0.5mm stainless steel blades will be semi-flexible for finishing

PLASTIC PVC TROWELS

- plastic faced trowels
- range of different sizes
- for white cements & renders
- acrylic & silicone thin coats
- non marking on epoxies
- special finishes on render
- Venetian & fine plasters
- Marmorino & medium texture finishes
- lime based & stucco plasters
- veneer plasters & decorative finishes
- marble based coatings
- micro cements
- fillers & putties

The new PVC trowels are for finishing thin coat, silicone and acrylic render topcoats

The trowels with orange plastic handles have a stiffer PVC blade that is solvent resistant and can be used on decorative finishes and epoxy quartz

The trowels can also be used on decorative wall finishes, micro cement and coatings

CLIKCLAK PLASTIC ABS TROWELS

- plastic faced trowels
- range of different plastic trowel blades
- for white cements & renders
- acrylic & silicone topcoat renders
- special finishes on render

These trowels are used to trowel up and finish external top coat finishes, silicone, acrylic and bucket coat renders

The CLIKCLAK three trowel kit includes blades for 1, 2 and 3mm grain silicone finishes

The blades are replaceable and the trowel handle is "clicked" into the blade

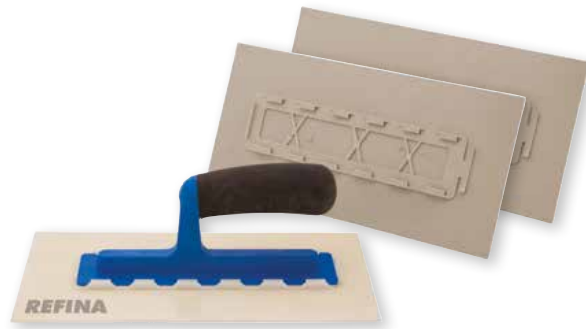

The CLIKCLAK kit is an economical system for testing the finish achieved with the different blade hardnesses

The trowel with flexible clear plexiglass blade is for white cements and acrylic renders

The grey bladed trowel is for OCR render

The range of trowels with black soft handles are for external render finishes and interior decorative coatings

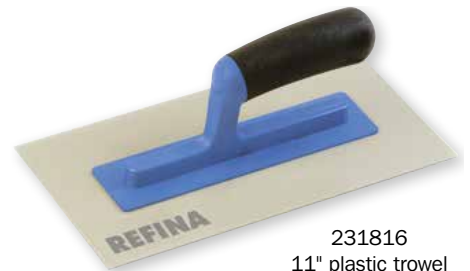

Plastic trowels are used mainly to avoid surface discolouration and blade transference from steel trowels

CLIKCLAK® SPONGE FLOATS

- range of sponge types & sizes
- fine, medium or coarse rubber sponges
- for smoothing plaster & cement surfaces
- opens up the surface before final finishing
- helps remove trowel marks
- sponges out pockets from sprayed & one coat plaster

The Clikclak sponge floats have a quick change plate with sponge attached that allows easy changing between sponge densities so as to evaluate different achievable finishes

The Clikclak kit is an economical system for testing the finish achieved with the different sponge densities

The orange sponge floats are produced with fine, medium and coarse 15mm thick sponge faces

They are the trade standard for sponging up plaster surfaces before final trowelling

The dense sponge floats are used more often on render and cement surfaces

SPONGE FLOATS

- range of sponge types & sizes
- fine, medium or coarse rubber sponges
- for smoothing plaster & cement surfaces
- opens up the surface before final finishing
- helps remove trowel marks
- takes out air pockets from sprayed plaster

The orange sponge floats are produced with fine, medium and coarse 18mm thick sponge faces

They are the trade standard for sponging up plaster surfaces before final trowelling

Sponge floats are often used in conjunction with a water brush to dampen the surface, or a large stainless steel spatula to smooth and level the surface

The smaller floats with denser sponge faces are for use on wetter plaster or cement surfaces

The blue sponge floats have a medium hard sponge with fine 14mm thick sponge face

The grey sponge floats have a denser quality than the blue sponge floats

The three orange sponges are available as a CLIKCLAK kit to evaluate different finishes

The blue and grey sponges are available as a two sponge kit

PLASTER & RENDER SPONGE FLOATS

- range of fine & medium orange rubber sponges
- for sponging plaster & render surfaces
- peel off adhesive backed replacement sponges
- opens up the surface before final finishing
- helps remove trowel & water marks
- takes out air pockets from sprayed plaster
- leaves a more uniform finish

The orange sponge float is produced in medium and fine rubber qualities

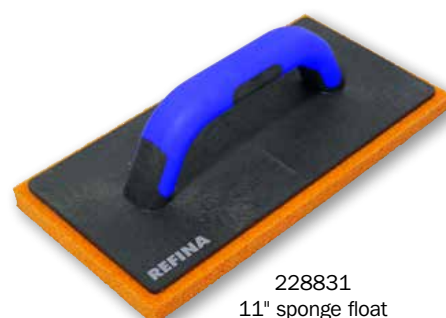

Replacement rubber sponges are available with a peel off adhesive back

The narrow sponge float has a CLIKCLAK push in trowel handle

Also in the range is a mini corner sponge for internal corners

PLASTER & RENDER SPONGE FLOATS

- super white sponge foam
- adhesive backed replacement sponges
- range of sponge sizes
- for sponging plaster & render surfaces
- opens up the surface before final finishing
- helps remove trowel & water marks
- leaves a more uniform finish
- sponges out air pockets from sprayed plaster
- the fine white sponge is for plaster finishes

The fine white foam sponges are suggested for finish plasters

The medium white foam sponge floats are excellent for cements and renders

The sponge floats have replacement sponges with a peel off adhesive back

The narrow sponge float has a CLIKCLAK push in stainless steel blade and blue composite handle

The white 13" sponge float with tilting bracket is for ceiling work

The round white sponge float is normally used as a jointing sponge

RENDER SCRAPING TOOLS

- for scraping monocouche renders
- range of tooth shapes & lengths
- gives scraped finish for colour through renders
- removes surface laitance

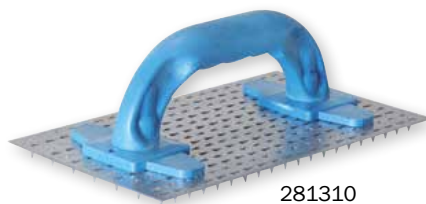

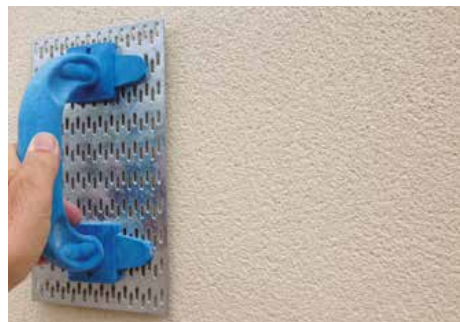

The scrapers are for giving renders a scraped finish and are used before the final set

The surface laitance is scraped back exposing some of the aggregate and leaving a decorative finish

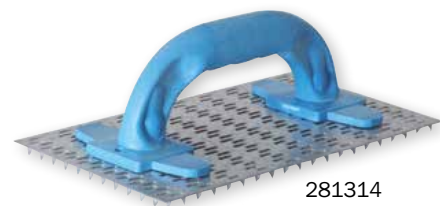

The sharp tooth scraper tends to be less aggressive. The twist tooth scrapers are harder wearing

The comb type scarifier has steel prongs that will score undercoat and backing plasters

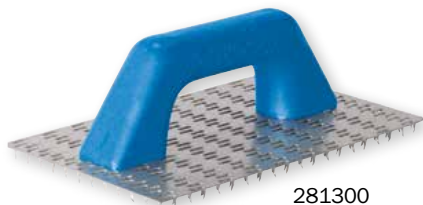

The angle plane is for reducing high spots and plaster wall surfaces, cleaning angles, beads and reveals

- large size hand rasps
- for keying back aircrete blocks
- used on external insulation & finishing systems (EIFS)
- aluminium tools for use on render
- serrated spatula for flattening render

The metal and plastic rasps can be brushed clean and are durable in use

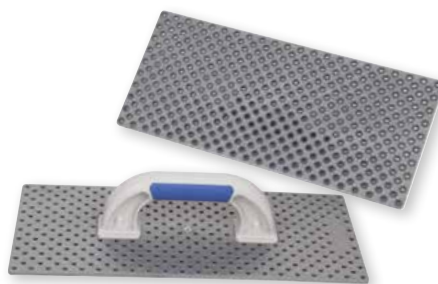

The ashlar cutters are used to create recessed joints and profiles in external render to replicate the appearance of traditional ashlar masonry and ground floor elevations

Square and V shaped blades available

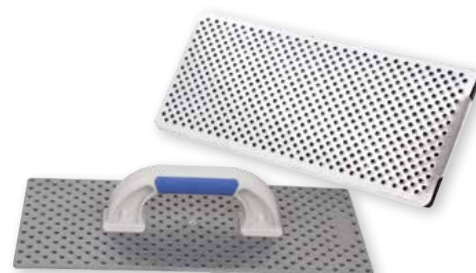

The stainless steel harling trowels are for throwing spar dash and pebble dash onto newly applied sand and cement renders

The serrated spatula is produced with a stainless steel blade and is for levelling monocouche renders

The serrated feather edge when used on newly applied render will level the surface, remove air pockets, identifying hollows and low spots without bringing cement rich laitance to the surface

STRAIGHT EDGES & LEVELS

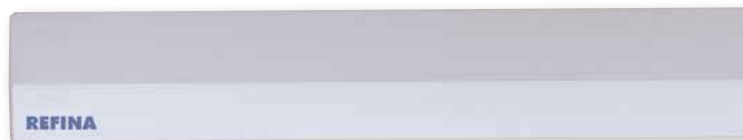

- full range of shapes & sizes
- for levelling & ruling off
- plaster & render
- floors & walls
- I beam for scraping & levelling render

The trapezium profile feather edges and box section rules are produced from precision aluminium extrusions and have plastic end caps

They are for finishing and levelling plaster and render, wall and floor surfaces. They help to identify hollows and high spots before sponging and trowelling up

The h profile feather edge is often used with projection plasters

The I profile aluminium straight edge is used for scraping back polymer and colour through renders, improving the flatness and uniformity of the scraped finish

SPIKED ROLLERS

- sizes from 7" to 30"
- freely rotating & replaceable discs
- for rolling out air bubbles
- levelling & moving
- epoxy coatings & self-levellers
- produced in the UK

The spiked rollers have individual discs that freely rotate on the centre bar

They are produced with spike lengths of 15mm with an overall diameter of 75mm

There are two new 10" rollers with fixed discs that make a one piece roller. Available with standard and long spikes
Order rollers and frames separately

PIN & NOTCHED LEVELLERS

- adjustable height coating & topping gaugers
- used for setting various material depths
- aluminium frame & slotted stainless steel blades
- with stainless steel hardened pins
- adjustable end skids
- produced by REFINA in the UK
- for epoxy coatings & latex
- pumped screeds & self-levellers

Made
In UK

The pin leveller uses a set of hardened pins with an adjustable stainless steel plate to gauge and level floor toppings and coatings. The pins will wear down with regular use and the pin bar is easily replaceable. The depth is adjustable from 1mm to 20mm

The skid leveller has the same adjustable stainless steel blade but also two end anchor type skids. It is more suitable for working on rough and uneven floors. The depth is fully adjustable from 10mm to 30mm

The hook leveller uses rounded loop shaped pins to run over the floor surface

The notched levellers are used for pulling out floor surfaces to a precise depth and for putting down scratch coats

A range of notched blades can be fitted to the notched leveller

Square notch 3.0mm, 4.0mm, 6.0mm, 8.0mm, 10.0mm

Round notch 10.0mm, 12.0mm, 15.0mm, 20.0mm
