

Matacouta[®] Heavy

Matacouta natural slate has a reputable history in Scotland and is highly regarded for its blue-black colour, traditional riven texture and characteristic grain. Often used on buildings of historical importance, Matacouta is the perfect choice for any project.

Product information

Product profile

SSQ Matacouta slate is mined exclusively for SSQ from the La Baña region in North-West Spain. SSQ's long-term relationship with the Matacouta quarry has led to the production of exceptionally high-quality roofing slate and exclusive distribution rights within the UK. SSQ Matacouta roofing slate has been accepted in the past for use on restoration projects or within conservation areas in Scotland.

In addition to passing SSQ's own, rigorous quality control tests, SSQ Matacouta Heavy roofing slate has been tested in accordance with EN 12326, carries the UKCA marking and is classified as 'W1-T1-S1'.*

* Test results are available on request

Minimum headlap for fixing slates with nails or hooks according to BS 5534: 2014+A2:2018 Code of Practice for Slating and Tiling

Moderate exposure (< 56.5 l/m2 per spell)*
