

DE-ICER

FROST AND ICE BUSTER FOR FROZEN WINDSCREENS

PART OF THE PROFESSIONAL CLEANING RANGE

A concentrated, spray applied de-icer to defrost windcreens and frozen glass surfaces.

Uses: When your windscreen is all iced up, it might seem like pouring a kettle full of boiling water over it is the best solution. Doing that might be quick, but it can also lead to a cracked windscreen - and a massive bill to replace it. Use Bond Its De-Icer to melt frozen ice quickly and safely.

Benefits:

- **Quickly clears frost and ice from vehicle windows.**
- **Prevents refreezing.**
- **Works down to -15°C.**
- **Non-smear formula.**

Caution:

It is an offence to drive without properly defrosting or demisting your vehicle and the police can fine you for relying on 'porthole vision' - where drivers leave a gap big enough to see out of but not the whole windscreen.

Using a vehicle with parts or accessories in a "dangerous condition" could result in a fine of £60 and three penalty points.

SPECIFICATION SUMMARY

Flammability	Flammable
Flash point	~22.5°C (lit. value)
pH	5.15
Solubility in water	100%
