R PREMDOR Range Guide 2013/14

www.premdor.co.uk

Masonite & PREMDOR a beautiful history

Manufacturing excellence comes from years of experience.

Masonite, founded in 1924 by William Mason, is today a leading global door manufacturer with products sold in over 70 countries from more than 55 global manufacturing facilities. Masonite serves over 3500 customers worldwide with more than 8000 employees. Today's product portfolio contains a broad product offering in virtually every door category including interior doors, entry doors, exterior doors, architectural doors and glass doors. We are continually updating and upgrading our product portfolio, production capabilities, technology and logistics. We pride ourselves on being at the forefront of this dynamic business.

The Masonite vision is to be the best provider of building materials in the eyes of our customers, employees, suppliers and communities as outlined in our Masonite Blueprint. We specialise in delighting our customers and creating excitement. We successfully supply to a number of major companies and are the company of choice for those who wish to deal with a professional, high level organisation.

Masonite globally is one the largest leading door manufacturing companies in the industry and supplies products to an extensive number of successful retailers, wholesalers and commercial builders. Successful companies understand the value of conducting business with a professional and trusted partner to ensure the quality and service they require. Our product range, manufacturing capabilities and our dedicated personnel enable us to be the best choice of provider to work with your organisation.

The Premdor standard

Premdor UK operates as part of the Masonite global organisation and upholds the high standards and values set by Masonite. Our commitment to quality manufacturing, dedicated customer service and innovative new product development makes Premdor the natural first choice in the eyes of our customers. Our new range of veneer match doors is just one example of all these high standards and values being out into practice.

For more information about Masonite and Premdor visit our websites:

www.premdor.co.uk www.masonite.com

Masonite is one of the world's leading manufacturers of interior doors and entry door systems.

Over eighty years later, Masonite has maintained its focus on leading-edge innovation, manufacturing excellence and superior customer service.

The Masonite Blueprint outlines the values and vision of Masonite.

PREMDOR 0844 209 0008 www.premdor.co.uk

Premdor, Birthwaite Business Park, Huddersfield Road, Darton, Barnsley, S75 5JS, Tel: 0844 209 0008, Fax: 0844 371 5333, Email: ukmarketing@premdor.com

Environmental Pledge

Our manufacturing and central warehouse facility in the UK is located at Barnsley and has been independently accredited to meet the requirements of the environmental management standard BS EN ISO 14001. The aims of our management programs and business leadership are to:

- Conserve natural resources by reusing and recycling materials, purchasing sustainable or recycled materials and using recycleable packaging.
- Reduce energy usage and promote the responsible use of energy throughout our business.
- Meet or exceed all legislative environmental requirements.
- Develop, manufacture and market products that conserve and can be disposed of safely.
- Minimise waste, prevent air, water and other pollution, dispose of waste safely and responsibly.

The directors and employees of Premdor are dedicated to the continuous improvement of the environmental management system and processes so that agreed environmental targets are met.

Premdor is fully committed to the principles promoted by the Forest Stewardship Council[®] (FSC[®]) and the Program for the Endorsement of Forest Certification (PEFC). All our timber and timber based material suppliers are obligated to ensure that, as a minimum, materials are sourced in accordance with legal forestry and logging controls.

Premdor has an extensive range of products available to supply customers with either FSC[®] or PEFC Chain of Custody, which offers assurance that an independently audited route to market is being followed. The process includes annotation of certification on all associated documentation. This process in particular guarantees that sustainable wood sources are being used.

The directors and employees are committed to expanding the Premdor 'Chain of Custody' portfolio and through this demonstrate their commitment to environmentally and socially responsible forest management.

All $\mathsf{FSC}^{\scriptscriptstyle(\!\!8\!)}$ and PEFC products within this Range

Guide are marked with the appropriate icon, based on information correct at the time of printing.

Moulded Panel

Premdor moulded panel doors incorporate quality FSC[®] accredited one piece facings* offering excellent appearance and performance. They are available in a wide choice of designs, sizes and core constructions, making them a versatile door choice. The range has third party environmental accreditation supplied with chain of custody.

Glazed Canadian Range

The Canadian range features individual bevelled glass pieces within chrome effect glazing bars.

Glazed Manhattan

excludes 5 panel smooth

Bold and impressive, the Manhattan range will add style to any home. The clean and simple lines give a modern finish to the range. Manhattan doors have plant on decorative lead effect on the glass, supplied in a choice of either satin white or chrome effect. This leading is not suitable for further finishing on site.

Masonite ladder moulded

Masonite ladder moulded

- An exciting shallow moulded design exclusive to Premdor.
- Ladder design gives a modern twist to a popular traditional timber door style.
- Smooth surface allows for a contemporary paint finish.
- Simple design suits both modern refurbishment and new build projects alike.
- Quality moulded panel facings.
- White base coated faces.
- Smooth faces suitable for paint finishing.
- Glazed versions available (see page 14 for suitable designs).
- For door pairs, see page 69.
- Option plus factory servicing is available, see page 74 for details.

- Factory machining for hinges and/or latches
- Supply and fit standard interior latches or lock
- Please see page 74 for further information
- Fireshield FD30 fire rated. Firemaster FD60 fire rated.
- Items shown highlighted are available on a reduced leadtime.

FSC[®] – applies to Standard Core unglazed range PEFC - applies to Semi Solid Core, Safe 'N' Sound and Fireshield ranges.

Interior 2 panel moulded

2 panel smooth

2 panel arch top textured

0

- Modern, contemporary designs available in a wide choice of sizes and core contsructions.
- Choose from the standard two panel smooth finish or the textured finish of the popular arch top design.
- All popular sizes available from stock.
- Available as a 30 or 60 minute fire door.
- Quality moulded panel facings.
- White base coated faces.
- Textured and smooth faces suitable for painting.
- Glazed or apertured options available.
- Mobility and fire door options.
- For door pairs, see page 69.
- Option Plus factory servicing is available, see page 74 for details.

- FD30 Fire doors are BWF Certifire approved.
- The range meets all the necessary fire requirements of the building regulations.
- For price and availability please contact our sales office.
- Now available as non fire rated Safe 'N' Sound doors.

32

All fireshield FD30 and firemaster FD60 fire doors are third party certified within the BWF Certifire Scheme. This means that every fire door is monitored and recorded throughout the production process, to arrive with the end user fully performance rated.

An important feature of the scheme is the unique BWF Certifire label. Designed to be tamper proof, this enables the door to be identified easily once installed. In addition, detailed information is supplied with each door, to assist installation

Apertures should not be cut in fire doors on site. By doing so performance in a fire situation can become seriously impaired, and the original door certification is invalidated.

Premdor moulded skin fireshield FD30 and firemaster FD60 fire doors are compliant with British Standard testing and supported under audit by the BWF/Certifire accreditation scheme. This scope of approval includes glazed designs.

Fireshield doors are glazed to ensure performance integrity in a fire situation. Unglazed fire doors are not available

Moulded door general specification

Door thickness

Imperial doors: 35mm (13/8")

Metric doors: 40mm

Fireshield doors: 44mm (13/4")

Firemaster doors: 54mm (21/8").

Modification

Doors are not suitable for rebating to form a pair. Fire doors must not be trimmed on top edge, and only up to 5mm on bottom edge and 3mm on stiles. Other doors can be trimmed by up to a maximum of 5mm off any edge.

Glazing

Non fire rated glazed doors are supplied with glass toughened to the requirements of BS EN 12600 and tested to BS EN 12150.

Door finishing

Moulded panel doors are suitable for paint finish only. Door faces are supplied with a white base coat ready for on site finishing. Base coat and priming does not seal the door fully against moisture penetration on site. For more details, please see page 74.

Touch up paint

43075 - Cans

Lock block location

The lock block position is 880mm from the top of the door to the top of the lock block. The lock block is 360mm long

Bi-fold doors

Bi-fold doors have the moulded panel design on both sides and are suitable for use as room dividers or wardrobe doors The doors are supplied pre-hinged with running gear included. Door sizes shown are nominal, with actual dimensions slightly smaller to allow for door gear and clearance

Standard core

Economy core specification, with single lock block, for light duty applications

Semi-solid core

Semi-soild doors are made with additional core components giving a heavier feel to the door.

Safe 'N' Sound

A solid core specification, in a standard thickness door, offering a substantial feel.

Fire door core

Moulded fire doors are constructed using a high density extruded chipboard panel within a timber frame.

For storage, handling, installation and maintenance information, please see page 41.

Environmental policy Moulded standard core doors are environmentally third party certified FSC (Excludes 5 panel smooth doors).

Semi-solid core. Safe 'N' Sound and Fireshield doors are all environmentally third party certified PEFC. (Excludes 5 panel smooth doors).

Our largest manufacturing and central warehouse facility in the UK is located at Barnsley and has been independently accredited to meet the requirements of the environmental management standard ISO 14001.

All of our timber based material suppliers are obligated to ensure that, as a minimum, wood is sourced in accordance with local legal forestry and logging controls, and is EUTR compliant. The majority of timber used in Premdor manufactured products is certified under FSC, PEFC, MTCC, CSA or SFI approval. These schemes are recognised under guidance issued by the Government's Central Point of Expertise on Timber (CPET), ensuring credible environmental control.

Shaker oak

The simple lines of the Shaker oak range offer a style that is both effective and refreshing. Offered as a 4 panel door and a matching glazed option, a FD30 fire door is also available. All shaker Oak doors are supplied unfinished ready for on site decoration.

Somerset oak

All Somerset oak range doors are unfinished offering the flexibility of onsite finishing with lacquer or stain. All glazing is factory fitted, featuring safety toughened, clear bevel edged panes. Where a timber boarded aesthetic is desired, the range has been extended to cover this option, using the Country design.

Wessex oak

The handsome Wessex oak range is highlighted by the deep grain of the natural oak appearance. Constructed from engineered timber components, feature panels are raised and fielded and set off by a planted perimeter bead section. Clear glazed bevel edge glass door options complete the package. Supplied unfinished, ready for on-site decoration with laquer or stain.

Pine

Supplied unfinished ready for onsite decoration, Pine doors are manufactured using dowel and glued construction from clear pine and overveneered solid timber components. Glazing is factory fitted.

General product specification guidance for this range can be referred to on page 41.

Interior shaker oak

- The simple styling of the shaker oak door is both contemporary and refreshing.
- Invest in Shaker oak doors to add both quality and value to a home.
- Premium quality with toughened paint and peel glass for ease of decoration.
- Available as a 30 minute fire door to complement the range.

- High quality oak veneered feature doors.
- Manufactured using solid timber components for additional stability.
- Unfinished, ready for finishing on site with lacquer or stain finish.
- Clear glass toughened to the requirements of BS EN 12600.
- · Paint and peel glass.
- Full FSC[®] chain of custody certification.

Timber door general specification

Door thickness

Imperial doors: 35mm $(1^{3}/_{8})$ or 44mm $(1^{3}/_{4})$.

Metric doors: 40mm (except Pine doors).

Fireshield doors: 44mm $(1^{3}/_{4}^{"})$. Timber doors can be trimmed by

up to 5mm off any edge.

Door finishing

Wessex, Somerset oak, Shaker oak and Pine doors are supplied unfinished and ready for finishing on site, with paint, lacquer or stain finish.

Pairs

Single doors featuring bevel edged or decorative glass should be hung selectively to ensure fully matched glazing if used as pairs. For door pairs, see page 69.

Options

Please note that Option Plus servicing is not available on timber doors.

Timber doors are not available for use as SpeedSet or SoundSecure doorsets.

Environmental policy

All Wessex oak, Somerset oak, and Shaker oak are environmentally third party certified FSC[®].

Guaranteed for ten years against manufacturing defects apart from all Pine doors which are guaranteed for two years.

Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage,

handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

Product availability

All items shown tint flashed are normally available ex-stock.

Ordering

Door prices exclude ironmongery and frames. Except where stated, doors supplied will require on site finishing. When ordering always state product codes. All prices exclude VAT Specifications may vary at our option.

Trademarks

Somerset oak is a Premdor trademark.

In order to gain the full benefits of Premdor's product guarantees and prolong life, it is essential that the following guidelines are adhered to.

Storage and handling

Doors should be stored and handled as prescribed in the BS Code of Practice BS 8000 Part 5 1990.

Doors should be laid flat and kept dry and clean inside any polythene packaging until immediately before painting/staining. Do not store or install in an area which may be subject to extremes of temperature. Use a dry, well ventilated building, in areas which have not been recently plastered.

It is essential that precautions are taken where there is a risk of moisture content build up. Particular care is needed in centrally heated or air conditioned buildings. Premdor must be informed at the time of tender and order whenever doors are needed for such buildings. The testing and rapid switching on and off of horting during the construction in

off of heating during the construction is detrimental to joinery. When stacking doors it is essential that at

least 3 load bearers are located along the door length to evenly distribute weight and avoid damage.

Doors should not be exposed to sunlight since natural shading or fading might occur. It is important that any packaging material (shrink wrap etc.) is left on

the door for as long as is practically possible to avoid damage to door surfaces. This is particularly relevant to fully finished products.

Installation

Doors should be fitted as prescribed in the BS Code of Practice BS 8000 Part 5 1990.

It is essential that doors be fully sealed and any air gaps plugged, immediately after delivery. They should be sealed and knotted and primed on both faces and all four edges, and should then be fully finished, preferably before installation. Edges of flush doors with lacquer finish should be sealed and if any surface is subsequently cut, it should be primed or lacquered before the door is fixed into position. This particularly applies when end grain is exposed.

It is essential that if the preservative seal is broken in any way (e.g. timmed, drilled or cut for letter box, hinges etc.) then any such exposed area should be preservative treated, painted/stained.

If, when installing doors, a reduction in overall size is required, it is important that equal amounts are taken from opposite edges. Allowable trim dimensions available on request.

When fitting locks and latches in doors, it is important to ensure that the construction and performance of the door is not

adversely affected.

If a mortice lock is to be fitted, it must not be located opposite the mid rail of the door. Letterplates, locks etc. should be installed prior to the door being hung. For lightweight interior doors use 1 pair 3" hinges. If the weight of the interior door exceeds 20kg, or if the door is to be hung between areas with different humidity levels, then $11/_2$ pairs of hinges are required. Fire doors must be installed in accordance with Certifire instructions that are provided with each door.

Factory finished products

Coated surfaces require regular maintenance and cleaning at least annually to remove surface pollution. Some 'chalking' of the finish may occur over time due to natural erosion of the microporous paint film. This does not detract from the systems protective performance.

On occasion timber products may exude resin after installation. Typically, if resin is present this 'bleeding' cannot be prevented.

Discolouration can occur which will require attention and maintenance to retain the aesthetics and integrity of the coating. Resin exudation is excluded from our performance guarantee.

Exposure conditions can vary significantly according to location. South facing elevations and coastal sites will reduce to some extent the finish life to first maintenance. Our guarantees are intended to cover reasonable average UK conditions.

Finishing

Decoration should be carried out in accordance with BS 6150: 1991 and BS 8000 Part 5: 1990.

Products must be clean and dry prior to finishing, having a moisture content which is no greater than the average for the intended location. Always follow the instructions provided with the stain or paint which is to be applied.

It is important that the finishing system is balanced by equal application to both sides at the same time to ensure that an imbalance of moisture does not occur, particularly in the decoration of doors.

The complete surface area should be fully treated with topcoat paint or stain prior to installation. To ensure adequate coverage at least three coats of topcoat paint/stain needs to be applied. All edges, rebates for glazing and any areas which have been cut, drilled, etc must be fully painted/ stained to the same standard as the rest of the door.

Premdor has no control over customer applied finishes of doors and therefore cannot accept any claims for problems of any type relating to customer finishing of the doors.

Maintenance

At annual intervals or more frequently if necessary, inspect and lubricate all ironmongery, hinges, pivoting and sliding parts.

Please note

Finger-jointed materials may be used in manufacture, enhancing product stability.

Interior flush doors

0

Veneer Match

Veneer Match is a brand new range of real wood veneered doors designed to eliminate the inconsistencies that can occur in grain pattern and colour. Ideal for corridor locations or any situation where consistency is paramount, each Veneer Match door offers uniformity of colour and grain pattern. Available in Oak, Ash and Walnut colours.

Innova™

Innova[™] doors are faced with panel effect veneers inlaid with real wood in a one panel design. Inlays are as follows: White oak is inlaid with Bubinga and Ash inlaid with American Walnut. Door faces are fully finished with a hard wearing lacquer to give a smooth, wipe clean surface.

Veneer Plus & Veneer

Natural wood veneers offer a luxury appearance from a cost effective flush door specification.

Veneer range door faces are fully face lacquered in clear satin finish. Vertical door edges feature timber lippings to complement the choice of either dark or light hardwood. Core options include certified fire doors.

For an enhanced weight door, offering a really robust feel and higher level of acoustic performance in use, Veneer Plus doors are the solution. This offers a solid core as standard within a 35mm door thickness.

Horizontal veneers, duo veneers and inlay options complete an expanded veneer plus range.

Foil & Foil Plus

Authentic appearance wood grain effect faces from our foil range require no further decoration. Matching appearance between doors is guaranteed. Clean lines make these products a popular choice for modern interiors with fire doors and standard glazed options available to ensure Building Regulation compliance.

For a more premium grade foil, foil plus doors offer an authentic grain appearance and solid core construction.

The HD oak door is a high durability laminate door manufactured using the latest innovative surface technology.

Paint Grade

The Popular paint grade door is ideal for basic applications, offering a timber veneered face surface ready for preparation, site priming and paint decoration. Popular paint grade doors are now available with PEFC chain of custody. Paint grade plus and high gloss paint grade doors complete this comprehensive offer.

new Interior veneer match

- Our new Veneer Match range offers a true veneer consistency of grain pattern and colour between each and every door.
- Ideal for corridor locations or any situation where a consistent appearance is essential.
- Made from real wood veneers and available in Oak, Ash and Walnut colours.
- Solid core construction and an improved smooth lacquer finish makes Veneer Match the obvious choice for quality and uniformity.
- Supplied with PEFC chain of custody. ٠
- Solid core, 30 & 60 minute fire doors and framed • 30 minute fire doors options available.
- Clear and Wired 16G Glazed doors fire doors available. For other glazing options see page 68.
- 35mm solid core construction offers added ٠ strength and acoustic barrier capabilities compared with a standard core construction.
- Choose Veneer Match when the variation that can occur with our standard veneer products needs to be elimated.

Interior flush veneer plus

- Our highest specification standard thickness veneered flush door manufactured with a solid core.
- As a solid core specification veneer plus weighs in at more than twice the weight of a 'hollow' standard veneered door, giving a much sturdier feel to the door.
- Stylish designs are ideal for modern new build developments.
- Solid core constructions provides enhanced quality.
- Supplied with PEFC chain of custody as standard, excludes Firemaster.
- Suited to the discerning ٠ specifier seeking a high quality veneered door.
- The 35mm solid core construction • offers added strength and durability when compared to the usual light duty construction of most domestic flush doors.
- · Veneer plus is ideal for environments where enhanced noise control and a little added door muscle can make all the difference.
- Lipped edge and inlay options ٠ now available.
- Improved acoustic barrier capabilities for when enhanced sound proofing is desired. Please contact Premdor for details.
- For door pairs, see page 69.

Interior flush veneer plus

- Latest veneer designs available in two distinctive line styles, and popular horizontal options.
- The oak duo combines two of the most popular veneer types in a single door, White oak and Walnut.
- Simple designs which provide a contemporary finish for high quality domestic situations.
- Glazed fire door options allow for a professional, high end commercial finish. See page 68.
- Supplied with PEFC chain of custody as standard, excludes Firemaster.

Walnut horizontal veneer plus

duo single line

Oak veneer plus duo double line

- The 35mm solid core construction offers added strength and durability when compared to the usual light duty construction of most domestic flush doors.
- · Veneer plus is ideal for environments where enhanced noise control and a little added door muscle can make all the difference.
- ٠ Improved acoustic barrier capabilities for when enhanced sound proofing is desired. Please contact Premdor for details.
- Clear glass toughened to BS EN 12600. ٠
- For door pairs, see page 69.

Interior flush veneer

- The attractive appearance of a traditional wood faced flush door remains a popular and practical choice.
- For replacement use or high quality new build applications wood veneered doors offer an established and 'no fuss' design solution.
- Door faces are fully factory lacquered and veneered edge to edge, masking the applied vertical edge lippings and presenting a clean smooth appearance, with the unique natural shade and grain variations of hardwood.
- Use veneered doors to create a co-ordinated wood ambience in your home.
- Supplied with PEFC Chain of Custody as standard.
- Select from a wide range of veneer options, to complement all types of project.
- Temperate grown timbers from Europe and North America are included in the range alongside cost effective alternatives from established and controlled tropical sources.
- Option Plus and factory servicing is available, see page 74 for details.
- All veneers are natural products and some variation should be expected.
- Wide range of factory glazed fire door designs available, see page 68.
- For door pairs, see page 69.
- Matching veneers are available. Contact the sales office.
- New framed construction Fireshield doors now available.

Interior HD oak

- Our 'highest specification' door. The HD oak is a high durability laminate door manufactured using the latest innovative surface technology.
- Textured effect surfaces are realistic, warm and pleasant to touch.
- With greater durability and scratch resistance than a foil door with the guaranteed colour consistency compared to a veneered door.
- Three times the scratch and scrape resistance of a standard foil door and twice the scratch and scrape resistance of a veneered door.
- Supplied with PEFC chain of custody as standard.
- Available in fully matched white oak finish.
- Our most realistic authentic grain appearance.
- Premium construction, combining a solid core as standard with a concealed lipping on two vertical edges.
- Innovative manufacturing technology uses electron beam-curing acrylate resins.
- For door pairs, see page 69.
- Wide range of factory glazed fire door designs available, see page 68.

Interior flush foil plus

- Foil plus flush doors combine state of the art reprographic technology suitable for modern new build or aspirational up grade use.
- Supplied in an enhanced solid core specification as standard, ensuring superior strength, operational robustness and noise reducing properties.
- The three dimensional wood grain appearance offers a superior finish compared with alternative foil doors, yet remains a cost effective alternative to authentic timber veneer.
- Supplied with PEFC chain of custody as standard.
- Premium grade foils provide enhanced appearance when compared with standard foil doors.
- An authentic natural grain appearance to complement timber or laminate flooring.
- Oak or Walnut options are fully matched, with ensured colour consistency and grained appearance.
- Vertical door edges have solid lippings.
- Full range available from stock.

White foil protective film coating

Interior flush paint grade plus

- Door faces are factory pre-primed to reduce decoration time and site cost.
 The surface is dense and very smooth, making it the perfect choice if easy on-site finishing is essential.
- Lipped version available for when lippings are essential to the specification.
- PEFC chain of custody certification.
- Where a simple or minimalistic door appearance is required or necessary, a trouble-free paint grade flush product remains the popular choice.
- Paint grade plus offers real value and a cost effective solution where the contract budget or time is tight.
- Door faces are factory pre-primed to reduce decoration time and site cost. The surface is dense and very smooth, making it the perfect choice if easy on-site finishing is essential (on lipped doors the lippings are supplied un-primed and require preparation and finishing on site).
- Full PEFC chain of custody certification is standard making this door ideal for when contractual environmental statutes or compliance exists. Excludes Firemaster doors.
- Smooth, high density faces ensure that paint grade plus doors have the optimum base for a high quality painted finish.

Interior high gloss paint grade plus

- A paint grade plus door which offers an impeccable high gloss paint finish.
- Each door comes with a protective film coating, safeguarding the door surface during the installation for removal at the point of handover.
- The high gloss finish gives a result that is almost impossible to achieve using traditional on-site painting methods.
- PEFC chain of custody as standard.
- Solid core construction.
- Full range available from stock.

- Factory machining for hinges and/or latches.

Options can be ordered on all doors

- Supply and fit standard interior latches or lock.

 Supply and fit intumescent seals to Fire doors. Please see page 74 for further information.

Fireshield FD30 fire rated.

Interior high pressure laminate (HPL)

- Premdor is now able to offer a full range of high pressure laminate (HPL) faced doors.
- Ideally suited for highly frequented areas where regular cleaning is essential or where there is a high risk of face damage.
- A popular choice in health, education, office and residential sectors.
- Available as single, pairs and apertured doors using traditional framed solid core construction, including 30 and 60 minute fire doors.
- Manufactured on a made to order basis, please contact the sales office for a competitive quote.

Protective surface impregnated with melamine resin (overlay) for printed finishes.

Available in 80 standard colours with additional options available on request, below is a selection of the most popular finishes.

Menu white	Caribbean blue	Macedoine oak	Meymac oak	White maple	Natural maple	Felt
Turtle dove	Nectarine	Grapefruit	Green apple	Cherry red	Wenge maple	Tobacco tulip

Excellent impact and scratch resistance.

Functional and hygienic in everyday use.

Exceptional reproduction qualities, especially for

woodgrain effects, creating an appearance that is

Superior durability and strength.

close to perfection.

Why use HPL:

Interior flush glazed fire doors

- Premdor Fireshield and suitable Firemaster doors (shown on pages 46-65) are available with this option.
- Glazing options available on veneer and paint grade doors with the most popular styles on a very short lead time.
- Ideal for communal areas where mobility is an issue.
- Glass is either fire rated clear wired glass, or clear glass. •
- Popular options now available with wired and unwired glass. ٠
- For non-stocked designs, price and availability on application. • For most popular styles and types use price table at bottom of page.
- 19G and 20G are not available in the Firemaster range. •

Non standard sizes

 Supply and fit intumescent seals to Fire doors Options can be ordered on all doors Please see page 74 for further information. Fireshield FD30 fire rated. Please check availability of new products prior to ordering. Firemaster FD60 fire rated. Items shown highlighted are available on a reduced leadtime.

 Supply and fit standard interior latches or lock ‡ Side margin variable according to door width. † Not available under 1981mm high door * Not available in doors less than 686mm wide.

- § Not available in doors less than 762mm wide.
- 1 610-686mm widths
- 2 726-926mm widths

Pair makers

- Pair makers allow for the creation of a door pair on any **35mm thick** internal door with our range.
- No rebating of doors required as the pair maker acts as the rebate.
- Available in Oak and White primed versions.
- Provides a flexible solution for converting two doors into a pair of doors.
- Pair maker can be fitted to enter left or right hand door.
- Simply fix the pair maker to the door you want to keep shut and allow the second door to open freely.
- Unbolt the second door to allow both doors to open simultaneously.
- For installation apertures add 10mm to the overall width of two doors (not including clearance).

the slave door and acts as a rebate to the other door.

Code	Description	Price
61569	White primed pair maker	£39.00
61570	Oak pair maker	£49.00

Flush pair example

The internal frame sizes (rebate to rebate) including the door pair maker and allowing for clearences are approximately as follows: Door size and door pair maker:

2 x 610mm doors plus door pair maker = 1236mm

 2×686 mm doors plus door pair maker = 1388mm

- 2 x 762mm doors plus door pair maker = 1540mm
- 2 x 838mm doors plus door pair maker = 1692mm

Interior lever furniture

A high quality range of lever furniture, locks & latches and door closers

All are designed to compliment any interior door and available in a wide selection of finishes.

Lever on rose designs

- A comprehensive array of designs and finishes sure to capture the imagination of any architect or interior designer.
- Luxurious single and dual finishes.

Interior option plus

Save time and cost by adding our factory options to your door. Prices are available on application.

Factory machining for hinges and/or latches

- A cost effective way to accurately machine mortices.
- Saves time on site and improves consistency and quality.
- Available on Moulded, Innova, Veneer, Foil and Paint grade plus doors.
- Custom machining available to match your hardware.
- Machining is not designed for ironmongery shown on pages 70-73.
- Premdor only service rounded hinges.

Supply and fit standard interior latches or locks

- In addition to machining we can supply and fit a standard range of latches and locks.
- Available with either chrome or brass face plates.
- Saves time on site and improves consistency and quality.

Supply and fit intumescent seals to fire doors

- Standard intumescent and combined intumescent smoke seal available.
- Saves time on site.
- Ensures that the correct seal is accurately fitted in line with fire test certification.

Non standard sizes

- If our standard sizes do not meet your requirements, non-standard sizes are available. Details and quotation available on request.
- Available on Moulded, Veneer, Popular Paint grade and Paint grade plus doors.

White factory paint face finishing

- Textured moulded panel doors can be supplied factory face finished in white satin paint (RAL 9003). Does not include edge banding.
- This option offers increased protection against moisture ingress.
- Cost effective solution, providing a high quality durable paint finish.
- Paint finish guaranteed for two years.
- 'Touch up' kits also available for site repair.
- Edge banding also available.

Factory glazing

- Doors can be supplied fully factory glazed.
- Available on both Safe 'N' Sound and fire doors.
- Glazed mobility fire doors meeting Building Regulation Part M available.
- Fire doors available with either clear or wired glass.
- Available on Moulded, Veneered, Foil, Foil plus, Popular Paint grade and Paint grade plus doors.

N.B. On moulded doors special sizes may be limited by the configuration of the mouldings.

Factory priming

- Textured and smooth moulded panel doors and Popular paint grade doors can be supplied factory primed.
- Reduces the number of coats of paint required on site.
- Saves time and reduces site painting costs.

Veneered & flush door general specification

Door thickness

Imperial doors: 35mm (13/8") or 44mm (13/4")

Metric doors: 40mm

Fireshield: 44mm (13/4") Firemaster: 54mm (21/8")

Glazino

Glazed non-fire doors are supplied with glass toughened to the requirements of BS EN 12600.

Pairs

Single leaf Fireshield doors, swung as single acting square meeting stile arrangements, are approved for fire control applications, providing the required installation criteria and intumescent seals are included. Please contact Premdor for advice before hanging fire doors as pairs.

However, Premdor cannot guarantee matching aesthetics on veneered or Innova pairs. In addition, rebated pairs, or pairs with a double acting hanging action must be ordered specifically. Contact Premdor for more advice

Veneers

Veneered doors are manufactured using commercially available veneer cuts and lippings.

As with any natural material, colour and graining does vary and should be expected, according to species

Our standard veneer cut specifications are:

Anegre - mixed crown, half crown & guarter cut Ash -mixed crown & half crown

Ash Innova 1 panel - crown or half crown centre panel. quarter. Cut stiles & rails

Steamed Beech - guarter cut only

Durador - rotary cut up to & including 826mm doors, above 826mm mixed crown & half crown.

Koto - quarter cut only

Maple - mixed crown, half crown & quarter cut Sapele - quarter cut only

White Oak - mixed crown & half crown.

White Oak Innova - 1p crown or half crown centre panel. quarter. Cut stiles & rails

Walnut - mixed crown & half crown

Walnut 2 stile - quarter cut stiles & cross pieces

White Oak 2 stile - quarter cut stiles & cross pieces

Veneer Match

Veneer Match doors are made with full chain of custody (FSC®), engineered veneers that provide an industry leading colour and grain match.

As with all timber products, prolonged exposure to direct sunlight may cause colour changes in these veneers.

Beading

Paint grade doors are supplied with beads unfinished ready for on site treatment. All other doors are supplied with beads to complement the veneer faces.

Guarantees

Guaranteed for ten years against manufacturing defects.

Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage, handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

For storage, handling, installation and maintenance information, please see page 41.

Standard core

Cost effective core specification, with single lock block at mid height, for light duty applications.

Fire door core

Flush fire doors feature either a modern, full, three layer, particleboard specification (PremCore), or a traditional framed up solid core. Either is used at Premdor's option, according to material availability and other production factors

Fitting FD30 glazing system

ExtraCORE

The ExtraCORE option is available in some ranges where extra trimming is required on site, such as with refurbishment situations. Approximately 40mm can be removed from each door stile or rail without affecting the integrity of the door. It is recommended that equal dimensions are removed from opposite edges. For full details please contact Premdor

ire doors

Premdor fire doors are compliant with British Standards and the BWF Certifire Scheme. See relevant data sheet for more details if required.

Fireshield is FD30 rated, when hung in appropriate frame with intumescent strips in jambs and head, or top and long edges of the door Fireshield pairs are factory fitted with appropriate

seals to meeting stiles. An additional 15 x 4mm strip is required to the hanging edge or frame jambs and also frame head rebate. Glazed Fireshield doors are supplied with clear (unwired) fire rated glass as standard. Popular fire doors are supplied with clear wired glass.

Firemaster is FD60 fire rated when hung in appropriate frame with intumescent strips in jambs and head, or top and long edges of door.

Apertures to fire doors must only be FAST 👌 First-hidd Aperture Service Team fabricators, operating as members of the BWF/CERTIFIRE scheme. Modifications made outside of this scheme will invalidate the product certification.

Location and contact details of "FAST" licensees available on reauest

Optional Premdor aperture details are shown on page 68

Glazed flush fire doors

Premdor flush fire doors are compliant with British Standard testing and supported under audit by the BWF/Certifire accreditation scheme. This scope of approval includes apertured designs.

Apertures must not be added retrospectively on site, as to do so will invalidate certification, and may impair performance under fire conditions.

A range of factory fabricated, fully glazed openings are available, as illustrated. These standard designs are typically practical as an addition to most fire doors, although some exclusions do apply.

For FD30 doors, we use an intumescent gasket system which ensures that the glazed area of the door maintains it's integrity in case of fire, and provides a superior finished appearance. Factory glazing is available with either wired or obscure clear fire rated glass options.

FD60 glazed doors incorporate a proprietary glazing system to ensure optimum performance in fire situations. Glazing systems used may vary from that illustrated

Building regulations

Flush doors are offered fully compliant with Building Regulations where applicable

Fire safety: Standard doors are tested against BS 476 Part 22 and certified for use meeting Approved Document B.

Mobility: The range includes size options and designs suitable for use under Approved Document M.

Effective visibility requirements for part M mobility doors.

Building Regulation Part M dictates the requirements for glazed doors in specific locations. The diagram (above) offers general guidance, but for specific information please check current Building Regulations

Acoustics: FD30 fire doors have demonstrated a sound reduction value of up to 30RwdB, which can assist in meeting the requirements needed for flat entrance systems against Approved Document E

In all cases doors require to be hung appropriately, in a suitable frame with fitted perimeter seals and compliant hardware. Please contact Premdor for details.

Scottish and Northern Irish Regulations may also be applicable on a Regional basis and doors are similarly compliant.

94 PEFC

Environmental policy

Doors indicated environmentally third party certified FSC or PEFC

Product availability

Items shown highlighted are available on a reduced leadtime.

Where indicated, door prices include glass, but exclude ironmongery and frames. Popular and Paint Grade doors supplied will require on site finishing. When ordering always state product codes. All prices exclude VAT. Specifications may vary at our option.

Trademarks

Popular, Fireshield and Firemaster are all Premdor trademarks. Durador and Innova are Premdor registered trademarks

SpeedSet Plus P78

SpeedSet Installation details P80

SoundSecure Doorsets P82

SpeedRobe sliding wardrobe systems P84

A range of innovative doorsets, designed for interiors and appartment entrances.

A new sliding wardrobe system completes this exciting product offer.

Help is on hand throughout the process – from specification support, to site assistance as required. Your door systems are manufactured individually to order within our production facility which features dedicated machinery and experienced staff. The DorFab concept can support you from the initial design stage of the project through to final completion.

Product benefits

By supplying a factory prepared door and frame package the system can be installed quickly and more simply.

On site benefits are significant, and include:

- Components machined and assembled removing these operations from site.
- Accuracy of machining and assembly – providing a high quality finished product.
- Delivery scheduled later in the build programme – reduces the likelihood of damage on site prior to handover.
- Simplified and quicker installation can be fitted using non-joinery skilled labour.

Benefits for all

For architects...

selection of doorsets simplifies the design and specification process. Brickwork opening sizes are standardised, allowing drawings to be prepared simply and accurately.

For quantity

surveyors... detailed itemisation of material requirements is negated by the selection of doorsets. Information will be required to confirm specification for the project, but once established the number of variable details are considerably reduced.

For housebuilders and developers...

forward thinking housebuilders and developers have recognised the benefits of doorsets. As well as reducing the number of components to order, and store on site, there is a simplified installation process and a more consistent, higher quality finished product. The systems are consistent with the modern methods of construction currently being adopted.

For registered social landlords...

To meet business targets, developers and housebuilders are increasingly required to deliver improved quality and productivity. At the same time shortages of skilled labour demands that on site

modern builder. It is suitable for a wide range of applications. Available to suit most common wall thicknesses.

SoundSecure apartment

The SoundSecure doorset offers a readily available solution to the complex performance demands

needed with Building Regulations Parts B, E and M. SoundSecure is

Secured By Design approval.

designed and tested to meet all these

entrance doorset

the upstream specification of door systems ensures that a consistent door installation is achieved and low maintenance benefits are derived over the long term.

Fire doors

Now with

Ordering information SoundSecure and SpeedSet Plus are available by quotation only, please contact Premdor for details. Specifications may

vary at our option.

Speedset plus - internal doorset system

The perfect solution for imperfect walls. Width Adjustability SpeedSet Plus can quickly and easily be adjusted by +/- 10mm to take u

SpeedSet Plus is unique:

- Adjustable doorset overcoming the problem of variation within a given wall thickness.
- Easy to adjust during installation.
- SpeedSet Plus is a cost effective way of fitting a door and frame.
- Rapid installation: doorsets can be installed in less than 20 minutes.
- Traditional costly joinery skills are not required to install SpeedSet Plus.
- Door supplied pre-hung with CE
 Marked latch and hinges as standard.
- Available with Premdor's Standard Core, Semi Solid, Safe 'N' Sound and FD30 fire doors.
- FD30 Fire doors are fully BWF Certifire approved.
- Approved document E compliant (29dB) option available.
- Hidden frame to wall fixings (supplied).
- Plated screws, no rust.
- Damage risk is reduced as SpeedSet Plus is fitted later in the building programme.

Moulded panel (pre-finished door option also available).

Manhattan

Foil

Veneered

Canadian

- SpeedSet Plus is a pre-fabricated doorset system developed for new build and renovation projects designed to significantly reduce door installation times and improve finished quality.
- SpeedSet Plus is a unique adjustable doorset, allowing easy adjustment to accomodate variations within a given wall thickness.
- Delivered to meet specific project requirements, the doorsets can be installed by non-joinery skilled labour.
- Door installations could not be simpler than it is with SpeedSet Plus.
- SpeedSet Plus arrives on site as a complete pre-assembled unit in plot lots. The unit includes your selected door, from the available interior door range, pre-hung and with factory fitted door latches or locks. Architraves are included and are pre-mitred for site assembly.

Frame finish:

- White re-coatable foil faced finish frame and architrave requiring minimum on site decoration.
 Significantly easier to paint than a traditional primed MDF or timber lining.
- Supplied with matching pre-mitred architrave.

Paint grade plus

ð

Full details are shown in our SpeedSet literature, please call 0844 209 0008 and ask for a copy or download from www.premdor.co.uk

Options can be ordered on all doors where suitable. • Factory priming (textured door faces only) White factory paint finishing (textured door faces only)
Non standard sizes Factory Glazing

• Supply and fit intumescent seals to Fire doors Please see page 74 for further information.

Speedset plus

Hinges

Doors are factory pre-hung on CE Marked chrome effect, brass effect or white hinges.

Lining Manufactured from 25mm moisture resistant medium density fibreboard. FD30 doorsets come complete with intumescent strips fitted to jambs and head.

Fixing brackets and screws

All fixing brackets and screws required are supplied with SpeedSet Plus. Fixing brackets and fixing screws are hidden by the architrave.

Ironmongery

Various pre-fitted CE Marked latch/lock options available.

NB. Door handles are not provided.

Product designed for easy fitting – no doorset is more accommodating

- Allows for rapid installation by lower skilled workers.
- Can be delivered direct to site in plot lots and fitted late in the building programme.
- Full estimating service and on site support available.
- Doors SpeedSet Plus can be supplied with most of the door options shown in the Premdor Range Guide, including FD30 fire doors.
- Door Stop 12mm factory fitted door stops as standard.
- Delivery SpeedSet Plus can be delivered in plot lots as required by your build programme. Individual doorsets are packaged and braced for safe transportation and storage.

Architraves

Architraves are supplied unassembled, but cut to length, pre-mitred and machined for 'butterfly' joining clips to connect the components together.

Final installation on site is completed by gluing the architrave into the pre-machined architrave groove in the door lining using a 'no nails' type adhesive. Architraves are available in a choice of styles.

Architraves and linings are supplied in white re-coatable foil for easy on site finishing. (some caulking of joints may be required prior to painting).

10000 Exterior entrance doors for use in all new build housing associated with planning consent require to carry a thermally efficient 'U' value. In England and Wales, this minimum performance level is included in Building Regulation Part L, and is set at 2.00 W/m²k. All door designs in the Premdor Oak Feature range carry 'U' values that meet this requirement. Note: Usually doors incorporated as part of a home extension require a lower, (1.8 W/m²k) 'U' value for compliance.

Exterior softwood panel

- For a cost effective replacement or refurbishment door, Premdor exterior panel doors are available in a number of traditional designs.
- Available from stock, softwood panel doors help retain the traditional features of your property during refurbishment.
- Supplied pre-beaded for easy on-site glazing.
- Matching door frames available, see page 100-101.
- · It is advised that this range is used for refurbishment and replacement projects only and not on new builds.

- · Doors in this range are not typically Building Regulation Part L compliant, (see page 108 for further details).
- Dowel and glued construction.
- Softwood panel doors are not available factory glazed, finished, serviced or as a doorset.
- · Selected softwood material, with engineered components, used at our option.
- Doors are unfinished ready for on site paint or stain finishing.
- Doors supplied un-glazed.
- · Glazing beads supplied as standard.

Exterior flush and glazed fire

- This popular and cost effective door is ideal for commercial applications.
- Ideal for locations where a practical, cost effective door is required.
- Flush doors are lipped on the long edges, the Standard core specification is cellular and blocked where appropriate for ironmongery.
- A range of complimentary door frames are available, see pages 100-101.
- It is advised that this range is used for refurbishment and replacement projects only and not on new builds.
- Doors in this range are not typically Building Regulation Part L compliant, (see page 108 for further details).
- Flush doors used in exterior positions face particularly harsh performance requirements.
 Please note variance in temperature and moisture levels between the outside and inside faces can often be considerable, causing distortion in the door, which is excluded from the Premdor guarantee.
- · Fire door option available on selected items.
- Flush doors are ready for on site paint finishing and must be fully finished on faces and all edges **before** installation.
- · Glass openings have equal side margins.
- Standard core doors are supplied apertured only, un-glazed.
- Fireshield doors are supplied with clear wired fire rated glass.
- Option Plus factory servicing is available on application, (see page 74).

Options can be ordered on all doors where suitable.

Non standard sizes.

Factory priming (F1X face only).

Factory glazing.

 Factory machining for hinges and/or latches.

- to Fire doors. Please see page 74 for further information.

Exterior french and folding doors

The attractive french and folding range is affordable luxury at its very best.

Through this range you will receive a beautiful product which doesn't compromise on quality, safety or performance.

Sets are supplied 'ready to assemble,' with most components pre-machined at our factory. This ensures ease of installation on site and the process also becomes easier for fitting the special hardware, locks and handles.

The doors are 54mm thick. Doors and frames are manufactured using a modern engineered construction for stability, and have a solid hardwood core and 3mm slices of oak or 3mm hardwood veneered on each visible surface.

The set has been factory finished with 3 coats of high build micro porous finish applied and ready to install on site without further finishing. One total immersion dip coat and 2 top coats. The finish incorporates maximum UV protection.

Our sets come complete with doors, frame, cill, hardware, threshold, locks, handles, weather and draught seals.

Exterior oak french & folding doors

- Premdor french doors are high specification systems which make an impressive statement as part of any home.
- All of the timber components are manufactured using the latest technology to reduce warping or twisting.
- The doors are 54mm thick, and both the doors and frames are built using a modern engineered construction, with a solid hardwood core and 3mm oak surface.
- Sets are supplied 'ready to assemble,' with most components pre-machined at our factory.
- The 24mm double glazed units incorporate special Low 'E' thermal glass, which is toughened to BS EN 12150 and BS EN 12600.

- Supplied unassembled for on site assembly, with full fitting instructions included.
- Our sets incorporate double weather and draught seals.
- Supplied with polished chrome hardware.
- Doors are open out only, the main opening door can be left or right.

Door size	Code	Price
1190mm x 2074mm (4ft approx)	FDPFO4	£1,872.00
1490mm x 2074mm (5ft approx)	FDPFO5	£2,068.00
1790mm x 2074mm (6ft approx)	FDPFO6	£2,345.00
2390mm x 2074mm (8ft approx) includes 2 side lights	FDPF08SL	£3,250.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 109 for brickwork openings.

- Our elegant folding doors are perfect for any domestic environment where you wish to bring the outside in.
- These pre-glazed oak veneered sets are unique in that they are reversible, allowing the choice of right or left hand opening.
- Folding doors allow uninterrupted access to your garden or patio in a stylish and elegant way.
- All sets incorporate a 3 point insurance rates PAS 23/24 tested lock on the main access door and lockable slide bolt on the inside.
- Supplied unassembled for on site assembly, with full fitting instructions included.
- The doors are 54mm thick, and both the doors and frames are built using a modern engineered construction, with a solid hardwood core and 3mm oak surface.
- Oak folding doors are supplied with a fully finished oak cill with aluminium sub cill for drainage.

Door size	Code	Price

3590mm x 2090mm (12ft approx)	54PFO12	£5,941.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 109 for brickwork and for door opening configurations.

Exterior hardwood french & folding doors

- Premdor french doors meet the requirements of 'Part L' building regulations.
- Manufactured from excellent value fully finished hardwood supplied white as standard.
- All of the timber components are manufactured using the latest technology to reduce warping or twisting.
- The doors are 54mm thick, and both the doors and frames are built using a modern engineered construction, with a solid hardwood core and 3mm hardwood veneered surface.
- Sets are supplied 'ready to assemble,' with most components pre-machined at our factory.

- The 24mm double glazed units incorporate special Low 'E' thermal glass, which is toughened to BS EN 12150 and BS EN 12600.
- Supplied unassembled for on site assembly, with full fitting instructions included.
- Our sets incorporate double weather and draught seals.
- Supplied with polished chrome hardware.
- Doors are open out only, the main opening door can be left or right.

Door size	Code	Price
1190mm x 2074mm (4ft approx)	FDPFW-1L-4	£1,773.00
1490mm x 2074mm (5ft approx)	FDPFW-1L-5	£1,969.00
1790mm x 2074mm (6ft approx)	FDPFW-1L-6	£2,252.00
2390mm x 2074mm (8ft approx) includes 2 side lights	FDPFW-1L-8SL	£3,113.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 109 for brickwork openings.

- Premdor folding doors are exceptionally affordable without compromising on quality and specification.
- Our hardwood folding white doors are fully finished using a 3 coat Hi Build Microporous Wood Coating System, so they are ready to install on site without further finishing.
- Manufactured using FSC[®] certified material.
- Sets are fully reversible so can be hung to operate from right to left or left to right.

- The set includes a 3 point locking system plus internal keyed drop bolts for extra security. The 3 point security locks are PAS 23/24 tested.
- Supplied unassembled for on site assembly, with full fitting instructions included.
- The doors are 54mm thick, and both the doors and frames are built using a modern engineered construction, with a solid hardwood core and 3mm hardwood veneered surface.
- Folding doors are supplied with a fully finished hardwood cill with aluminium sub cill for drainage.
- Supplied with polished chrome hardware.

Door size	Code	Price

3590mm x 2090mm (12ft approx)	54PFW12	£5,245.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 109 for brickwork and for door opening configurations.

Exterior door general specification

Door thickness

Standard doors: 44mm (13/4")

Firemaster: 54mm (21/8"). Fireshield: 44mm (13/4").

Reading

Traditional hardwood, panel, flush and glazed fire doors are supplied with bead packs as standard

Glazing suitability

Exterior feature and panel doors are suitable for double glazing up to 14mm thick, unless indicated for single glazing only, 'Part L' compliance or supplied factory glazed.

Traditional feature doors are not available factory glazed, finished or serviced or as a doorset.

Exterior flush Fireshield, Firemaster and ExtraCore doors are supplied with clear wired fire rated glass as standard. Standard core doors are supplied apertured only Garage doors are suitable for either single or 14mm double

Door finishina

glazing, with beading supplied.

Traditional hardwood feature and panel doors require full decoration prior to installation. Please note that hardwood products may vary in finished appearance due to colour variation in timber materials.

By popular choice Hemlock panel doors are often stain finished on site, however, as ply panels may not match timber framing, and visible finger joints may occur, this type of decoration may not achieve a satisfactory finish. The use of paint finish is therefore recommended.

Matchboarded doors are supplied ready for prompt on site paint finishing. Appropriate stain finishes may also be used but natural timber appearance and factory applied surface filler may be visible after decoration. Exposed face knots should be sealed prior to decoration to reduce the risk of resin 'bleed' which may occur naturally. This is excluded from our guarantee cover. Matchboarded doors contain staple holes from the production process. These will require filling prior to painting.

No factory applied preservative treatment is applied as part of any standard door specification. Protection against moisture ingress is essential to the longevity of any exterior product, and initial decoration must be appropriately applied and coating maintained for the installed life of the unit. Premdor warranty cover is specific to this point

Pairs

Pairs of doors are supplied rebated at meeting stiles and open right hand pull first. See diagram for clarification.

Interior Exterior

Example shown is open out configuration.

Weather protection

To ensure door and door frame provide adequate performance in exposed situations, it is recommended that installation is within a porch or canopy. This is particularly critical with open in doors and pairs.

Letterplates

When installing flush or fire doors, if a letterplate is required this should be of the sleeved type to ensure protection against water ingress into the exposed door core. In fire doors letterplates must also be of an approved fire resisting design.

Storage, handling, installation, maintenance and use

Storage and handling

Doors and doorsets should be stored and handled as prescribed in BS Code of Practice BS 8000 Part S 1990.

Doors and doorsets should be kept dry and clean inside the polythene packaging until immediately before painting/staining. Do not store or install in an area which may be subject to extremes of temperature. Use a dry, well ventilated building, in areas which have not been recently plastered

It is essential that precautions are taken where there is a risk of moisture content build up. Particular care is needed in

Face fixed weatherboards

On timber doors the addition of a face fixed weather-board is recommended, supplied loose, 930mm wide.

Hardwood: Code 46979 Price £10.00. Softwood: Code 45179 Price £10.00.

Premdor fire doors are compliant with British Standards and the BWF Certifire Scheme. See relevant data sheet for more details if required.

Exterior Flush fire doors feature a traditional framed up solid core.

EXTRACORE Exterior doors can be reduced in size to suit most refurbishment situations. FD30 rated, when hung in appropriate frame with intumescent strips in jambs and head or top and long edges

of the door They can be reduced by up to 40mm from any side, whilst retaining their fire rating, provided the BWF Certifire label is not removed from the top edge of the door.

Fireshield FD30 rated, when hung in appropriate frame with intumescent strips in jambs and head, or top and long edges of the door. Glazed Fireshield doors are supplied with clear (unwired) fire rated alass as standard.

Firemaster FD60 fire rated when hung in appropriate frame with intumescent strips in jambs and head, or top and long edges of door. Single FD60 exterior flush doors cannot be used to form pairs.

Thermal efficiency

'U' values are indicated alongside products in this section for guidance only. All values shown are manufacturers calculations, based on material content for an 838mm size door within a doorset. The 'U' value indicates the thermal efficiency (w/m²/k) the lower the 'U' value the greater the energy saving. For further details, see Building Regulations 'Part I'

Oak Part L doors are compliant with the mandatory thermal efficiency level for doors in new build dwellings. They are also ideal for refurbishment use where a thermally insulating door is preferred or beneficial

As used primarily within outbuildings, matchboarded doors are not offered with any formal 'U' value accreditation

Building regulations

Installation

CP151

Exterior entrance doors for use in all new build housing associated with planning consent require to carry a thermally efficient 'U' value. In England and Wales, this minimum performance level is included in Building Regulation Part L, and is set at 2.00 W/m²K. All door designs in the Premdor Oak Feature range carry 'U' values that meet this requirement. Note: Usually doors incorporated as part of a home extension require a lower, (1.8W/m²K) 'U' value for compliance.

Hardwood feature, softwood panel and exterior flush

Doors in these ranges are not compatible with the formal thermal requirements of the Building Regulations as defined for use in new build projects. However these long established product designs are appropriate to, and popularly selected

> all four edges, and should then be fully finished, preferably before installation Any surface subsequently cut should be primed before the door is fixed into position. This particularly applies when end grain is exposed.

It is essential that if the preservative seal is broken in any way (e.g. trimmed, drilled or cut for letter box, hinges etc.) then any such exposed area should be preservative treated, painted/stained.

Decorative finished products

Coated surfaces require regular maintenance and cleaning at least annually to remove surface pollution. Some 'chalking of the finish may occur over time due to natural erosion of the microporous paint

for repair work and replacement door applications, which are generally exempt from Regulation providing the door design used has less than 50% of glazed area.

Guaranteed for 1 or 2 years against manufacturing defects.

Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage, handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

Product availability

All items shown tint flashed are normally available ex-stock. Some designs may be discontinued during the life of this Range Guide

Ordering

Door prices exclude glass, letterplate aperture, ironmongery and frames unless where otherwise stated. Doors supplied will require on site finishing. When ordering always state product codes. All prices exclude VAT. Specifications may , vary at our option.

Timber door frames

Weather protection

To ensure doors and door frames provide adequate performance in exposed situations it is recommended that a porch or canopy is installed. Door frames are supplied with factory fitted weather strip

One hour fire door frame with a 57mm x 90mm head and jamb has 25mm (1") rebates. Half hour fire door frames have the option with or without cill. The cill is flush 50 x 78mm with the head and jambs 57 x 78mm.

Weatherbar set

Gold coloured aluminium low level weatherbar supplied loose for on site fitting as standard on mobility frames

Frame finishing

All softwood frames are vacuum preservative treated. Softwood frames are supplied with a 'Honey' prime finish. Hardwood cills are supplied without a base coat stain.

Building regulations

Premdor offers an exterior mobility door frame range which will allow these requirements to be met assuming the hardwood threshold (where fitted) is installed in accordance with the "Guidance for House Builders and Designers" document available from: www.tso.co.uk

The vulnerable under door area is protected by a low level aluminium weatherbar for site screw fixing, which makes the frame suitable for Part M Regulations, when specified with suitable width doors. For more details, please contact Premdor.

Guarantees

Guaranteed for 30 years against fungal attack and rot (softwood only).

Guaranteed for ten years against manufacturers defects

> film. This does not detract from the systems protective performance.

On occasion timber products may naturally exude resin after installation. Typically, if resin is present this 'bleeding' cannot be prevented and Premdor are unable to accept liability.

Discolouration can occur which will require attention and maintenance to retain the aesthetics and integrity of the coating. Resin exudation is excluded from our performance guarantee.

Exposure conditions can vary significantly according to location. South facing elevations and coastal sites will reduce to some extent the finish life to first maintenance. Our guarantees are intended to cover reasonable average UK conditions.

Composite doors.

All exposed timber after trimming or machining for hardware must be primed and painted to prevent moisture ingress. Failure to do this could invalidate warranty. It is recommended that dark coloured doors are not fitted on south facing elevations as the doors could expand & contract making operation difficult. In order to maintain the door guarantee the supplied or suitable rain deflector must be fitted to the bottom of every door.

Care of your composite door

It is recommended that the door surface is regularly washed with warm soapy water using a lint free cloth. Frequency will depend on location, for example a door in coastal regions, industrial areas or close to a main road will need more frequent cleaning. Never use abrasive cleaners or scouring pads on the surface as this could remove the top coat of the finish and accelerate deterioration. Never use high pressure jet washing devices or steam cleaners. Never use any type of bleach or solvent such as white spirit, paint thinners or cosmetic varnish removers as they will take away the top coat of the finish exposing the skin. Avoid any type of adhesive or temporary 'tac' substance as this could remove the top coat of finish. Failure to follow the above could invalidate any warranty.

French and folding doorsets

Doorset

The finished frame height is 2074mm for french doors and 2090mm for the folding doors.

Handing

French sets open outwards and thanks to our unique reversible technology, either the left or right door can be used as the main opening door.

Folding sets are reversible from the same set for left or right opening which can be chosen on site.

Glazing

The 24mm Double glazed units incorporate special Low 'E' thermal glass with an argon filling to enhance the thermal performance, the double glazed units are fitted into the doors so there is no glazing required on site. The glass is toughened to the 2 latest European standards BS EN 12150 and BS EN 12600.

Finishing

The sets have been factory finished with 3 coats of High Build microporous finish applied and ready to install on site without further finishing. One total immersion dip coat and 2 top coats. The finish incorporates maximum UV protection.

It is very important that the finish on your door set is checked and re-coated after 12 months (six months in coastal areas). This will maintain the decorative finish and ensure that no moisture enters the timber of the doors and frames during the life of the product.

The length of time between re-coating depends greatly on exposure to weather and the direction the sliding/folding doors face. The coating will last longer in a sheltered or north facing site. However, if the site is south facing, or in a heavy weather exposure area, we recommend checking for break down every six months after purchase and re-coating if necessary.

We recommend that your door set is maintained and refinished using medium or high build microporous wood finishes. In addition, it's better to refinish as soon as you see any breakdown of the finish. Don't wait until it's too late and the finish has completely broken down allowing moisture into the wood.

We do not recommend the use of yacht varnish, waxes or oil applications to pre-finish our door sets for external use.

Brickwork sizes and how your folding doors open

6' 3 door configuration

Brickwork size 1800 x 2100mm

Looking from outside left hand folding

Looking from outside right hand folding

Finishing

Decoration should be carried out in accordance with BS 6150: 1991 and BS 8000 Part 5: 1990.

Products must be clean and dry prior to finishing, having a moisture content which is no greater than the average for the intended location. Always follow the instructions provided with the stain or paint which is to be applied. Where necessary, Shellac knotting may be applied to honey primed door frames to aid resistance to resin staining subsequent to paint finishing.

The use of dark coloured paint finishes should be avoided on all softwood external joinery to minimise solar gain. A neutral Inside

Looking from outside left hand folding

Looking from outside right hand folding

colour undercoat should be considered when it is desired to finish frames in pastel shades.

It is important that the finishing system is balanced by equal application to both sides at the same time to ensure that an imbalance of moisture does not occur, particularly in the decoration of doors.

The complete surface area should be fully treated with topcoat paint or stain prior to installation. To ensure adequate coverage at least three coats of topcoat paint/stain needs to be applied. All edges, rebates for glazing and any areas which have been cut, drilled, etc must be fully painted/stained to the same standard as the rest of the door.

Weather protection

All of our sets incorporate double weather and draught seals.

Locking systems and ironmongery

The doorsets are supplied with a multi-point locking system. The handles are of a chrome effect and are supplied loose, ready for fitting on site.

Thermal efficiency **10**000 The Building Regulation Part L rating of the whole set is 1.7W/m²K which passes the regulations for refurbishment, extensions to existing

dwellings or new build homes. The Low 'E' glass used has a 1.1W/m²K rating. Please note that the 'U' Values are indicated alongside products for guidance only. Values shown are independently tested by an accredited testing company. The 'U' value indicates thermal efficiency (W/m²K). The lower the rating the greater the energy saving. For further information see Building Regulations Part L.

'U' Values

Guarantees

Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage, handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

<u> </u>	

Guaranteed for 10 years against doors and hardware manufacturers defects.

Ordering

All prices exclude VAT. Specifications may vary at our option.

Handings and brickwork sizes:

Choose between left or right handing – There is no need to order left or right opening sets as our folding sets are all reversible and this can be chosen when the set arrives on site. All our folding doors fold outside to allow maximum use of space in your room.

10' 4 door configuration

Brickwork size 3000 x 2100mm

Looking from outside left hand folding

Looking from outside right hand folding

Maintenance

At annual intervals or more frequently if necessary, inspect and lubricate all ironmongery, hinges, pivoting and sliding parts. Inspect the condition of the decorative and glazing systems on all external joinery at maximum intervals of one year and carry out remedial work as required.

Weather protection

It is recommended that exterior doors which are to be located in exposed areas should be protected by a canopy or porch.

Please note

Finger-jointed materials may be used in manufacture, enhancing product stability.

12' 5 door configuration

Brickwork size 3600 x 2100mm

Looking from outside left hand folding

Timber door frames

If stored outside, the frame should be placed on level bearers and protected by a tarpaulin. There must be space for air to circulate around and between the frames.

Check that the frame is perfectly square by measuring the frame diagonals. These are exactly the same length if the frame is square.

NOTE: On external door frames for fire doors, the gap between the frame and brickwork must be packed with a noncombustible material, for example, mineral wool fibre.

Premdor's high performance timber windows are an investment that can last a lifetime, that's why all our products are factory finished as standard and supported by a series of performance guarantees. Slide & Tilt P134

Timber windows guide

Your guide to window types

Fully Finished

Fully finished glazed windows have a white factory paint finish with a 10 year guarantee. Saving time on site and ensuring a consistent quality finish. Fully finished windows also include security casements with multi-point locking systems, have easy clean hinges and our standard casement windows have an energy rating 'A' as standard.

Fully Finished Secured by Design

Our highest specification window. With the benefits of a white factory paint finish with a 10 year guarantee, saving time on site and ensuring a quality consistent finish.

These windows also have our highest security specification and are third party security accredited and independently certified to BS7950. Enhanced multi-point locking system and the extra security of hinge locks to stop the window from being levered open if under attack are fitted as standard. Fully finished Secured by Design windows also feature easy clean hinges and our standard casement windows have an energy rating 'A' as standard.**

Warranties

The following warranties are offered as standard on Premdor products. 30 years against rot and fungal attack on windows. 10 years against glass unit failure on factory fitted double glazing.10 years against manufacturing defects. 10 years on ironmongery.10 years on fully finished paint systems.10 years on fully finished stain systems.

How to order

- Choose the style of window you need, for example Casement & Vent.
- Select the window specification, for example Secured by Design.
- Turn to the relevant page and select the window size and order via the relevant product code.

Environmental policy All timber used in Premdor

softwood windows is sourced from forests certified by the Forest

Stewardship Council®.

The mark of responsible forestry

Premdor timber windows are an investment that can last a lifetime, that is why all our products are factory finished as standard, surpass UK building regulations and are backed with a series of performance guarantees.

Premdor windows are available in a wide variety of styles and types. On the following pages you will see that we have categorised our windows into the different specifications that we offer.

Energy Conservation

Heat loss through windows can account for up to 30% of the total heat lost from a house. Installing Premdor energy efficient windows can significantly reduce heat loss, saving energy, reducing greenhouse gasses and increasing comfort.

Standard Casement windows come with an 'A' rating for energy.

Window Energy Rating

Dual turn p132

Traditional styling with superb energy-efficiency

Echoing the elegance of the late Georgian period, our sash windows combine traditional styling with superb energy-efficiency.

Vertical sliding sash

- Factory finished with high-performance, low maintenance treatment.
- Manufactured from FSC® Scandinavian redwood.
- Concealed ventilation.
- 22mm 'Low E' argon filled double-glazed units as standard.
- All standard units include high performance black warm edge spacers.
- Sashes are hung using pre-tensioned spiral balances allowing effortless 'fingertip control'.
- Easy slide system provides exceptional watertight seal and silky smooth, rattle free operation.
- Fitted with brass ironmongery as standard. Also available in other options.
- Available in 8 high quality paint or stain finishes.
- Average 'U' value 1.4

Bay Windows

Bay windows offer a great opportunity to create a home with a high quality individual appearance.

Splay bay windows

- The basic code for a splay bay with 45° bay is 45DER for two returns and 45SER for one return.
- Use these references followed by the window components required.
- View from left to right from the outside.
- All windows used must be the same height.

Style A 45 degree bay Window Double End Return (DER)

Number of front lights	Number of windows	Code	Return Window Width mm	Front Window Width mm	Overall External Width	Depth
2	3	45DER	625	1200	2169	458
3	3	45DER	625	1777	2745	458
4	3	45DER	625	2353	3321	458

Style B 45 degree bay Window Single End Return (SER)

Number of front lights	Number of windows	Code	Return Window Width mm	Front Window Width mm	Overall External Width	Depth
2	2	45SER	625	1200	1682	458
3	2	45SER	625	1777	2258	458
4	2	45SER	625	2353	2834	458

Square bay windows

- The basic code for a square bay with double end return is 90DER, and for single end return 90SER.
- Use this reference followed by the window components required.
- View from left to right from the outside.
- All windows used must be the same height.

Style C 90 degree bay window Double End Return (DER)

Number of front lights	Number of windows	Code	Return Window Width mm	Front Window Width mm	Overall External Width	Depth
2	3	90DER	625	1200	1332	688
3	3	90DER	625	1777	1908	688
4	3	90DER	625	2353	2484	688

4

Style D

90 degree bay Window Single End Return (SER)

Number of front lights	Number of windows	Code	Return Window Width mm	Front Window Width mm	Overall External Width	Depth
2	2	90SER	625	1200	1264	688
3	2	90SER	625	1777	1840	688
4	2	90SER	625	2353	2416	688

How to order

- 1 Choose the bay lay out Style A–D.
- 2 From the relevant table select the dimensions and number of windows required to make up your bay.
- Refer to our window range on pages 110-135 to select the type, height and specification of windows required, for example: Direct glazed casement, Horizontal bar etc.
- When selecting windows choose components from left to right as if viewing the completed bay from the outside.
- 5 All Bay windows are price on application and includes costs of windows plus bay posts.

3

Cavity closers

A Cavity Closer System is an easy, reliable way to achieve Building Regulation compliance when closing the cavity around window openings. At the same time, it provides a strong, accurate, self supporting sub-frame that can be used as a template or frame former for first or second fix installation windows.

When installing windows with cavity closers, consideration must be given to sub-sill projection, which is dependant on the position of the window in the cavity.

The system is a multi-chambered profile that forms a continuous cavity closer around door & window openings. This prevents cold bridging, damp penetration, air infiltration and condensation. It is NHBC approved and Agrément certified, can be used on all reveals or cavities, and is suited to all types of Premdor windows.

Few of the many 'ad hoc' methods of closing cavities conform to the Building Regulations, and can cause problems associated with cold bridging.

Compared to other methods the Premdor Cavity Closer is highly flexible, providing a single solution suited to all possible applications.

It is more effective than cut brick or block when closing the cavity, and avoids the need for frame-formers to be fabricated on site in the case of second fix installations.

Key Points

- Assembled closer, suitable for Premdor standard window sizes.
- Cavity closer and opening former in one.
- Available to suit cavity widths of 75mm and 100mm.
- Rigid PVCu construction.
- Universal profile for timber frame or traditional masonary construction.
- Prevents moisture penetration, mould, . condensation and staining.
- BBA certified to all weather ratings, including severe' and 'very severe' categories (BS5628).
- Cavity closers are also available for shaped & multi-unit configurations. Price on application.

Installation Guide

Ensure throughout the installation the cavity closer is checked at regular intervals so it remains true and square. Failure to do this will result in twist and poor window installation.

Build up the coursework

around the cavity closer

by 1 course ensuring the

cavity closer is still true

and square.

Step 3

Step 1

Step 2

- Before installation of the cavity closer, build your wall to the height of the window.
- Ensure the wall is level.
- Using the size table opposite, select the cavity closer size.
- Position the cavity closer in the window or door reveal between the cavity
- To ensure the cavity closer remains plumb use a prop (see illustration).
- Prop
- Step 4
- Use fastening ties in inner and outer mortar courses every 225mm.

Step 5

- Build the brickwork up to the lintel. Locate the lintel and bed into the mortar.
- Allow mortar to set before removing the prop.

Options and Accessories

- The following are available as options on our standard casement windows.
- Many options can be added with our standard delivery leadtimes.
- Contact your distributor for full details.
- Options are also available individually to buy as spares or replacements.
- Please note that there is a nett cost of £15 for carriage on window accessories.

Window Options

Casement window options:

- Cill options: 25, 47, 62, 87, 114mm.
- Weather Strips: White or Brown
- Vents: White, Brown - £11 extra per vent, Chrome - £56 per vent.
- Ironmongery: White, Brown.
 Gold, Chrome £10 extra per opening casement
- Non Locking Ironmongery: White, Brown - £2 extra per opening casement Gold, Chrome - £10 extra per opening casement
- Colour finishes: White, Cream, Basalt Grey, Muted Olive, Light Oak, Teak, Mahogany, Walnut.

Other colours available POA.

- Hinges: Restricted £27 extra per side hung casement
- Egress £36 extra per side hung casement
- Obscure Glass:
 - Costwold £30 extra per unit
 - Stippolyte £30 extra per unit
 - Autumn Leaf £30 extra per unit
 - Alternative obscure glass POA
 - Alternative glass configurations POA
- Other options available POA
- · Swept heads
- Window surrounds
- Extended cills
- Size and configuration variations

Accessories (supplied loose for on site fitting).

General Technical Information

Timber Windows:

High performance window, factory double-glazed and finished.

Windows are constructed with finger jointed timber for stability. Two piece head and two piece cill sections are used. No extended horns to head and cill sections.

This means that windows keep their shape, strength and performance qualities.

Windows are manufactured and accredited to BS644: for construction specification.

Materials:

To BS EN 942. Timber species: European redwood from selected sawmills, timber sources from sustainable managed forests with a minimum of 70% FSC material

Preservative treatment:

Organic solvent as NBS section Z12 Table 25 of the British Wood Preserving and Damp-proofing Association manual 1999. Moisture Content on delivery: 13 - 19%

Noisiure Content on delivery. 13 - 19

Manufacture:

Construction is accredited to BS 644 Adhesive to BS EN 204, Part 1, Group D4. Fully tested to BS6375 Pt 1,2 & 3.

Security:

Windows are Q-mark accredited to BS 7950 specification for enhanced security performance of windows for domestic applications when specified. Manufactured within a 'Secured by Design' Licence.

Glazing

Factory glazed to meet current thermal regulations with double-glazed units, manufactured and kite marked to BS EN1279 and factory fixed in accordance with BS6262.

Dry glazed system with double-sided security tape and timber drained and ventilated bottom bead.

Low'E' glass enhances the heat retention performance of the glazed unit by reflecting the heat back into the dwelling.

Coatings:

Fully factory finished. Water-borne decorative paint or stain finish (colour to be chosen by client). Total dry coating minimum 120 microns.

Ironmongery/accessories:

As standard multi-point locking systems with push button handles are included.

When specified hinge protectors and security locking systems to meet BS 7950 are used. Trickle Ventilation: Ventilators to be fitted as standard to head of frames to meet statutory requirements:

Standard - 4600EA or 4000mm2 Free area Optional - 4300EA or 4000mm2 Free area

Performance:

Windows are tested for weather tightness and meet the requirments of BS6375:

Part1: for severe weather rating BS6375 Pt 2 & 3.

Window Sizes:

All sizes shown are norminal. The actual window frame sizes are 5mm less in height and width.

- 9. Deadlight Glazing Bead

Glazing, Decoration, Cills & Other Options

Glazing Bars

The Georgian bonded bars have an integral bar between the panes, to give the effect of individual glazing units, making them difficult to differentiate from through bars. This also allows the high performing, drained and vented, glazing system to remain intact and do its job without having a detrimental effect on appearance of the product.

Glass

Windows are glazed to: BS 6262 Ref. 9.3.3.7 (Drained & Vented Glazing System BS 8000 Ref. 3.4.1.2 (Glazing Techniques) GGF Manual Section 4.2 Ref. IG2 NHBC Chapter 6.7 Clauses D7, D4 Building Regulation Part N (England) and Section 4 (Scotland) - Where specified.

Cill Extensions

The cill extensions are all designed with a large radius edge to ensure good paint coverage. The underside of the cill extension has rebates to allow concealed fixings and to stop the water travelling back towards the fabric of the building.

Note: Consideration should be given to cill width when designing a building which incorporates timber windows.

Decoration

Cream (1015)

Grey (7040)

Mahogany

Muted Olive

Walnut

Wide cill extensions in timber have a higher chance of failure as coatings need to adapt with the timber to seasonal changes, they will expand and contract more, leaving the coating vulnerable to breakdown over time which can lead to timber being exposed to moisture. Designing a building with a cill extension of less than 100mm will greatly improve the life of the cill extension.

General Technical Information

Delivery, Storage & Handling

Windows should be lifted by the outer frame, not by the opening sashes, ironmongery, or decorative / solid glazing bars. They should be carried vertically to avoid any tendency to twist or distort the outer frame and cause damage to the connecting joints. Particular care should be taken when handling large frames.

The extended use of metal containers for site storage is not advised as this can lead to extreme conditions being created within, which is detrimental to the performance of our products.

Stack inside on a least 3 level, full-width, evenly distributed bearers, in a dry shaded area and keep clear of the ground. If our products are required to be stored outside, ensure they are protected from the elements with a waterproof cover such as a heat resistant tarpaulin or equivalent and allow air circulation clearance between products.

Where products are supplied on a pallet or shrink-wrapped, ensure that adequate air circulation can be allowed to flow freely to all products on the pallet and avoid storage in direct sunlight.

Products should not be stored in a room or building where excessive moisture levels will be present. in particular, where plastering work is being carried out as the drying of the plaster pushes lots of moisture into the atmosphere. Avoid storing our products flat as the factory applied surface coatings and factory glazing systems have been developed for vertical or angled drainage away from the wetted surface. Any period of time spent with water lying on a horizontal window will cause swelling of the timber, poor operation of opening/closing and will invalidate any warranty on that product.

Protective wrapping should not be removed until the products are ready for installation or until absolutely necessary. Caution must be shown when using sharp objects such as knives etc. to remove packaging so as not to cause damage to the product or paint finish.

Regularly inspect the products whilst in storage to ensure the correct conditions are being met and to check the base coat, primer or finish coats are in good condition. Remove products from pallet by lifting not dragging, and avoiding damage to or from projecting ironmongery or fittings.

Our joinery products are manufactured to a carefully controlled moisture content in line with the requirements BS942. Should additional moisture be allowed to come into contact with our products whilst in storage or during installation, this may result in distortion or swelling of the products. This could affect the functionality of the operating mechanisms or components, leading to long term or lasting damage and possible degradation of the overall appearance/finish.

Glazing

All factory glazed products undergo strict quality checks before leaving the factory, the responsibility is with the installer to ensure that windows and doors are adequately protected against site activities that may pit, mark or scratch the glass surfaces.

Should the glass surface become contaminated, do not use sharp instruments or abrasive pads to remove the contaminate from the glass surface. Following the revision to the building regulations 1991 Approved Document N1 for glazing into critical locations, the responsibility is with the customer to indicate whether factory glazed windows are required to be supplied to conform to critical locations as defined by this revision.

Our 10-year guarantee covers only units that have been factory glazed and have not been subsequently deglazed. Where joinery is supplied unglazed, the following recommendations should be followed:

For further glazing information please refer to: BS8000 Part 7 1990, BS6262 Glazing in Buildings, NHBC Standards Charter 6.7

Installation

Please use guidance from BS8213 Pt4 - Code of practice for survey and installations of windows. All joinery items are recommended to be fitted as soon as practical after delivery to site.

Correct installation of our products is vital to ensure proper performance now and in the future. All our joinery products should be fitted into preformed openings at least 10mm larger (5mm all round) than the overall frame size and not built in as the work proceeds.

In timber-framed buildings, openings should allow for differential shrinkage as guidance given in NHBC Standards Chapter 6.2S2

Framed products should be installed plumb and square using a metal fixings or perimeter battens. Fixings should not be over tightened and surrounding brickwork should abut the frame only lightly so as not to distort the frame. We recommend that frames are fixed using screws through the frame into the brickwork.

Before final fixing, check that opening sashes have equal clearance on both sides. Mullions of multi-light windows MUST be supported to avoid sagging.

A minimum of two fixing points per side (depending on height) should be used. These should start between 100 & 200mm in from the corners.

As a rough guide the minimum number of fixing points in height:

Below 1000mm	= 2 per side*
1000 to1600mm	= 3 per side*
1601 to 2100mm	= 4 per side*

over & above = Installer responsible

*Ground level only

Any gaps between the outer frame and the reveal, to the external face, should be filled with a non-setting suitably approved sealant to BS5889.

Warranties

The following warranties are offered as standard on Premdor products.

30 years against rot and fungal attack on windows 10 years against glass unit failure on factory fitted double glazing

10 years against manufacturing defects

10 years on ironmongery*

10 years on fully finished paint systems**

10 years on fully finished stain systems**

- * The guarantee does not cover for any tarnishing that may occur.
- ** Fully finished products are guaranteed against peeling, cracking, blistering, premature erosion of the film exposing bare timber, flaking,damage caused by fungal growth within the coating. It does not guarantee against natural resin exudation, movement or extractive staining around knots.

Decoration & Finishes

The Factory-applied coatings are an integral part in the performance of our joinery products. Painting the products on site will never be as effective as painting within the controlled environment of the factory.

For any paint or decoration paints or stains which are suitable for timber and described as moisture vapour permeable should be used.

Advice on the choice of suitable coatings for timber can be obtained by referring to BS EN 927-1: 1997 When a factory fully finished product is supplied, care must be taken that damage to the finished surfaces does not occur during installation as this may invalidate the guarantee.

Mortar or similar must not be allowed to be in prolonged contact with the paint finish. Any droppings must be removed immediately with water and the area washed with clean water. Any finishes applied to our products should be strictly in accordance with the paint or stain manufacturer's instructions. All surfaces of our products should be painted in dry weather and at the same time to help avoid creating a moisture imbalance within the timber

Q-Mark

The Q-Mark is readily identifiable as a market leader in the certification of timber related products and a growing range of other construction materials.

Product certification provides assurance to specifies, contractors and purchasers that our products will perform to an agreed standard.

Coatings Maintenance Guidelines

End Users

Window frames treated with a finishing coat shall be checked annually, the first time not later than after 2 years. Bistering, cracking, flaking or if the coating has been damaged in any other way, should be dealt with immediately, as follows: Wash the window frame with a mild alkaline cleaning solution. Sand away cracked and flaking paint, and scrape off any resin that may have seeped out of the wood. Fill any cracks that may have developed in the corner joints of the frame/casing, or on the windowsill, with elastic filler. Spot repair the freshly sanded surface, using an exterior primer as specified below. Repaint the entire exterior of the window using top coats specified below.

Suggested redecoration cycles for pigmented coating system applied on a timber window.

Harsh / Rough Climate (This would include area within 5km of coastline) Moderate Climate (This would include non coastal areas at low altitude) Extreme Climate (Any areas of high altitude, or exposed coastal areas) Construction Sheltered (e.g. beneath porch or large roof overhang) 5 Years 5 Years 3 Years Partly Sheltered (e.g. window built back in reveal) 5 Years 3 Years 2 Years 2 Years Unsheltered (e.g. face of buildingl) 2 Years 3 Years

Suggested redecoration cycles for stain + lacquer coating system applied on a timber window

Construction	Moderate Climate (This would include non coastal areas at low altitude)	Harsh / Rough Climate (This would include area within 5km of coastline)	Extreme Climate (Any areas of high altitude, or exposed coastal areas)
Sheltered (e.g. beneath porch or large roof overhang)	10 Years	10 Years	7 Years
Partly Sheltered (e.g. window built back in reveal)	10 Years	7 Years	5 Years
Unheltered (e.g. face of buildingl)	7 Years	5 Years	5 Years

*Only dark stain are allowed

This guide is based on EN927-1 (Paints and varnishes – Coating materials and coating system for exterior wood – Part 1: Classification and selection)

Recommended maintenance products:

Acrylic /alkyd paint (for example "Hicksons Décor") Application as specified on label and technical data sheet

Q Mark for Trada High Performance Scheme

BS644: Q Mark for Timber Windows

BS7950: Q Mark for Enhanced Security Windows

Secured By Design License Holder

General Maintenance

It is recommended that surface coatings, glazing and ironmongery supplied with our products are inspected annually. The decorative finish applied to our products must be maintained in the service and moisture should not be allowed to penetrate into the timber throughout its life.

Areas of general wear and tear such as window edges etc. should be made good and touched up as necessary. Refer to paint manufactures guidelines for re-application of finishes. If the product has been supplied fully finished, see coating maintenance guidelines for remedial instructions.

General cleaning should be carried out regularly (minimum twice a year) using a non-abrasive cloth with mild detergent and warm water (ph. neutral solution) to remove contaminates, whilst frequently changing the water. Under no circumstances should aggressive alkaline or acidic cleaners be used.

Ironmongery

All ironmongery to our windows is factory fitted where practical. Adequate care should be taken to ensure that other trades avoid scratching or contaminating the surfacesand operating mechanisms as this can invalidate the guarantees. Brick acid and other site cleaning activities can cause corrosion, discolouration and pitting of the surface of ironmongery. Should the ironmongery become contaminated, use a soft cloth to remove any building debris, but do not use abrasive cleaners. If in any doubt, temporary removal of the ironmongery by competent site personnel should be considered. Particular attention should be given to brass and chrome fittings, which are vulnerable to scratching or tamishing. Moving parts on hinges and locks may require occasional lubrication with a silicone-based lubricant.

Interior surfaces normally require no special maintenance beyond an occasional clean with water and an appropriate detergent Location of the window frame in the building, climatic conditions, whether shaded or exposed to the sun – all these factors affect the finish. A south facing window frame/door will require the more frequent maintenance than its north facing counterpart. Avoid painting in the rain or when the window frame/door is damp.

Bayou P145

Whether your project is a complete washroom system or a simple cubicle installation – Hills has the product range for you. Hills offer the ultimate one stop shop for cubicles & washroom systems.

Made to measure range P144

cubicles & washroom systems

Why Hills?

Historically, the Hills name has been associated with quality joinery products. In 1849 Francis Hills started a small joinery company supplying the Durham mining industry. Over 60 years later the company was producing large quantities of shell boxes for the fighting forces in World War 1 and looking ahead to diversification in the future.

The business literally 'took off' in the mid thirties with the production of the 'Hillson Praga' aeroplane, recording many sports successes. This was followed with production of aircraft and propellers during World War 2.

After the war the Hills joinery business really expanded and, taking joinery innovation further, a range of cubicle and washroom systems was developed and launched in the early 1950's.

Now, our research and development teams have brought this ethos right up-to-date, creating products which look to the future of washroom environments. For the proof, just take a look at our new ranges such as Glacier, Cove and Ridge.

But at Hills we know that a good product is only part of the story – so we offer the full range of support from a no-obligation quotation and design service, through to technical assistance.

And, as we all operate in a competitive world, we are always committed to realistic pricing and high levels of customer service.

Product range – wide ranging and innovative. From the comprehensive to the simple, our products cover most requirements. Many are completely new and offer concepts to make a real difference to your project.

Design support – we provide a no-obligation quotation and design service, allowing us to optimise your washroom layout and propose design features to enhance the facilities. In more complex washrooms we can incorporate ducting and wall panels as well as lockers, vanitory units and pelmets. Our support also includes advice on relevant building regulations.

Customer service – as well as offering competitive supply leadtimes, we always aim for on time delivery – full and complete. When it comes to customer service we believe that hills is hard to beat.

Quality – we manufacture our cubicle systems from quality components, and can therefore offer meaningful performance guarantees.

Technical back up - advice is available

from our experienced sales desk team. Alternatively our technical guide provides a useful reference tool, with in-depth information on specification and technical issues, as well as advice on designing cubicle and washroom systems.

So, whether you are an installer or specifier of cubicle products, with Hills you really can maximise your washroom project every time. Contact us today...

Mix 'n' Fix

- 'Off-the-shelf' availability from selected stockists.
- Standard components available in a variety of dimensions, including mobility requirements.
- 18mm MFC doors, fascias and partitions provide rigidity in service.
- V313 core material provides additional moisture resistance.
- Height adjustable legs assist installation.
- Aluminium ironmongery is hardwearing and practical.
- · Hinges can be installed fall open or fall shut as required.
- Optional outward opening doors.
- Three year guarantee.
- See page 147 for colour availability.

- The cubicle in component form has been developed to meet the requirements of an increasingly style conscious market demanding system solutions for washrooms. Hills cubicle range offers standard sized off the shelf components Mix 'n' Fix. These cubicles are based on a standard structure which ensures stability and finished installation quality.
- Mix 'n' Fix components are available off the shelf, via regional distributors. The components provide the opportunity to create a number of layouts, some of which are shown in the Hills Technical Guide.
- Mix 'n' Fix is a modular cubicle system for applications where a mix and match choice of colours for doors, partitions and fascias may be desired and prompt availability is required.
- Installation is straightforward as all MFC components are pre-drilled, and ironmongery is supplied in pack form as required.
- However, with Mix 'n' Fix specification is not compromised in the search for practicality – the V313 MFC core material provides improved moisture resistance, helping to prolong service life.

Additional products

Vanitory tops and pelmets

Design and specification of a complete washroom system will usually incorporate features such as vanitory units, pelmets, ducting and lockers. Care should be taken to establish access points for services including water, waste and electricity. Once confirmed these components can be designed into the washroom in the most appropriate layout. Dependant on the cubicle systems specified these items will vary in appearance and construction.

Vanitory tops are normally fitted onto a skeleton frame (manufactured on site by a contractor), allowing for access to plumbing and other services.

Apertures for sinks and other ancillary items can be cut on site in the correct location during installation. However, in order to ensure integrity of the construction it is advisable to inform Hills of this detail during the quotation and ordering process.

Generally vanitory tops with access panels are specified in two standard heights. For adult situations, 850mm is standard height, reducing to 600mm for junior requirements. Any height in between these can be accommodated, subject to sanitaryware requirements.

There is a choice of basic vanitory top types, to match the different ranges of cubicles.

Pelmets are available for use in vanitory unit situations for concealing lighting. Generally pelmets are specified to standard dimensions of 150mm x 150mm, and installation usually undertaken with angle brackets or proprietary fixing systems. There are four basic types of pelmet.

Lockers

Lockers are a changing room 'essential' for storage of personal items. Hills can offer a variety of locker types, all with features to make life easier for the user. The lockers can be supplied manufactured with solid laminate or steel frontages.

Benches

Benches can be specified in a number of formats, for use in a variety of locations, such as changing facilities or communal areas. They can be wall mounted or located in island positions. Support brackets are supplied as required for the chosen arrangement.

Ducting & wall linings

Ducting and wall linings can be supplied to match your projects requirements. See diagrams [below] for construction specifications and cross sections.

CUBICLE & WASHROOM SYSTEMS

Hills Cubicles & Washroom Systems, Units 1–4, Stadium Court, Wallis Road, Skippers Lane Industrial Estate, Middlesbrough TS6 6JB

Facsimile: 01642 467711

Email: sales@hillscubicles.co.uk

Please ensure all orders are coded. This helps us to supply the correct product.

How to code your order

Door orders

- 1. Select the numeric code for the chosen door; Interior 6 panel moulded 762 x 1981 x 35mm = 12411
- 2. Select any options required e.g. white factory paint face finishing.

Window orders

- 1. Select the code for the chosen window; e.g. Casement window = 207C.
- 2. Select any extra options required e.g paint colour.

How to place your order

- Orders can be placed in various ways:
- 1. Order by fax.
- 2. Order by post.
- 3. Order by email
- 3. Order by E.D.I. (contact us for details).

Full information about our Sales Office is shown above.

- The information needed to process your order:
- 1. Your company name and address.
- 2. An order number.
- A postcoded delivery address (including a contact name and telephone number).

For each item ordered:

- 1. The product and any option.
- 2. The quantity required.
- 3. The price per unit.
- 4. Quotation number if relevant.

Prices

All prices shown in this catalogue are exclusive of VAT. Prices are subject to alteration without notice and goods will be invoiced at the prices prevailing at the time of despatch. This priced catalogue supersedes all previous price lists.

Product availability

Items shown tint flashed green are normally available ex-stock. Items shown highlighted are supplied on a reduced leadtime. Details of leadtimes for other items can be obtained from the Sales Office. Our order acknowledgement, issued after your order has been processed, will confirm our anticipated delivery date.

Delivery leadtimes

Delivery leadtime indications are given subject to the availability of materials and production loadings. Whilst every effort will be made to achieve these dates, they may vary without notice.

Amendments and cancellations

Any order amendment or cancellation will not be accepted without prior written agreement, and a charge will be levied for any specific costs incurred.

Delivery

Premdor delivers across mainland UK on a published multi-drop schedule based on key order days for the delivery address postcode area. Please note that delivery dates may change and will vary around bank holidays. Details of the current delivery arrangements can be obtained from Premdor.

Please supply post code details when ordering to avoid unnecessary delay.

Deliveries made on our scheduled delivery service to distributors' yard are free of charge.

For site deliveries please contact the sales office for prices and terms and conditions..

After sales

Premdor prides itself in providing a complete after sales package. Our after sales service can be contacted through the Sales Office.

Environmental chain of custody

Please note that where products are supplied with third party environmental accreditation, it is the purchaser's responsibility to ensure continuity of certification as required through the supply chain.

General Information

Door thickness

Please note that Premdor door products are manufactured to the dimensional tolerance requirements of EN951 & EN952. These European standards allow a thickness, width and length tolerance of +/- 1.5mm for all interior and exterior doors.

Reproduction

Drawings and photographs are intended as being illustrative only and do not represent a product offering. Colours and photographs depicted are as accurate as photographic and printing processes can allow.

Illustrations

Products are shown glazed and fully finished for illustration purposes only. To confirm details for particular products please check within the relevant specification section.

Catalogue supplies

For merchant customers who wish to receive copies of our catalogues, please request with your order, or email ukcatalogues@premdor.co.uk

Symbols

Symbols shown on each page are intended as a guide only. They refer to some but not necessarily all the products shown in the section.

Trade Descriptions Act 1968

In the interest of continuous product design and improvement, Premdor reserves the right to alter specifications and descriptions or withdraw products without prior notice.

The current specifications of any product are available on request and whilst every effort is made to produce up to date literature, this catalogue should only be regarded as a guide to current specifications.

It does not constitute an offer for the sale of any particular product.

Important Information

Doors have a single lock block. The side of the door that the lock block is situated is indicated on the top of the door. On the veneered doors the lock block is positioned centrally. On moulded doors, the top lock block is 880mm from the top of the door. The lock block is 360mm long by 80mm deep (+/-15mm)

Flush and moulded panel: standard and special core types

Choice of door should include consideration of core type. If specific performance is required such as fire resistance this is particularly important. The details shown are for guidance only, actual core constructions may vary at our option.

For further details, please contact your Premdor distributor.

Standard Core

- A multi-cell or spacer pad core for light duty, non fire rated applications
- Suitable for domestic use

Specification for catalogue standard

Actual core construction may vary.

Semi Solid Core

Offering additional weight to the standard 35mm door, this specification is optional on moulded panel doors in styles and sizes shown in this Range Guide.

Actual core construction may vary.

Safe 'N' Sound

Solid core material in a standard thickness door, offering the best specification.

Actual core construction may vary.

PremCor FD30 / FD60

PremCor is a high density core material which requires no timber framing. This proven construction, when correctly installed with suitable intumescent strips. will provide certified fire resistance This specification may be used on Fireshield and Firemaster doors at

our option. Actual core construction may vary. Note: The minimum screw for fixing the

hinge into the door is a 50mm x size 8 (4mm) fully threaded type screw.

Moulded Fireshield FD30

A high density particle board surrounded by substantial framing.

When correctly installed with suitable

intumescent strips as a doorset assembly the door will provide certified fire resistance.

This specification may be used on Fireshield and Firemaster doors at our option.

Actual core construction may vary.

Framed FD30 / FD60

When correctly installed with suitable intumescent strips as a doorset assembly the door will provide certified fire resistance.

This specification may be used on Fireshield and Firemaster doors at our option.

Actual core construction may vary.

Terms and Conditions

1. GENERAL

(1) 'The Company' means Premdor Crosby Ltd and shall include any principal agent successor or assignee of the same and 'the Customer' means the person, firm or company to whom a quotation is addressed or whose order is accepted by the Company and 'the goods' means the product of the Supplier which is the subject of such quotation or order.

(2) All prices quoted by the Company are based upon these Conditions of Sale and reflect the limitations upon the Company's liability which they contain. Should any customer wish to contract with the Company otherwise than on the terms of such Conditions of Sale special arrangements can be made and a revised price quoted by the Company.

(3) In the absence of any such special arrangement (which shall not bind the Company unless made in writing and signed on the Company's behalf by a person duly authorised for that purpose) all quotations given and all contracts made by the Company and any additions or amendments thereto shall be subject to these Conditions of Sale which supersede and shall be taken to override any terms or conditions proposed or stipulated by the Customer.

(4) No agent or salesman of the Company has authority to give any guarantee or warranty on behalf of the Company or to transact business other than on the (unamended) terms of these Conditions of Sale.

2. LIMITS OF CONTRACT

No binding contract is created until an order is accepted by the Company and all prior correspondence or oral communications are to be regarded as superseded and not forming part of the contract. Prices quoted are subject to revision for errors and omissions at any time.

3. AGENTS

The term 'agent' as applied to those persons firms or companies either in the United Kingdom or elsewhere with whom the Company has made arrangements for the sale of its goods is a nominal one, and indicates only that they are local representatives appointed for the convenience of customers and through whom enquiries or orders may be received and dealt with by the Company.

They are not authorised by the Company to incur any liability, give any guarantee or warranty, make any representations or transact any business whatsoever on behalf of the Company other than the offering for sale of the Company's goods upon the terms of these Conditions.

4. TECHNICAL DATA

All drawings, descriptive matter, price lists or advertisements, whether or not supplied with this quotation or tender are approximate only and intended merely to give a general idea of the goods described therein and shall not form part of the contract. The Company offers its designs for the Customer's approval. Unless supplied or approved by the Company it undertakes no responsibility for sites or foundations, or for any framework or support, or for compliance with any local bye-laws or statutory regulations, or for the fulfilment of any special requirements which the Customer may be bound to observe or fulfil. Copyright in any such items as are referred to shall remain with the Company.

5. TITLE

The implied undertakings as to title etc. set out in Section 12 of the Sale of Goods Act 1978 shall be express terms of the contract between the Company and the Customer.

6. PRICE

(1) Unless a quotation or tender has been submitted the price of the goods shall be the price ruling at the date of despatch notwithstanding any price specified in any order or order acceptance.

(2) If a quotation or tender has been submitted by the Company it will accept orders which are received within the time limit specified therein at the price stated in that quotation or tender.

(3) The price of the goods shall be subject to the addition of value added and other taxes and the cost of any special packing required by the Customer.

(4) Any increase in costs or expenses arising from any act or omission or any special requirements of the Customer or any modifications made at the Customer's request may, at the Company's option, be charged to the Customer. (5) A delivery charge will be payable where the order value is less than the minimum order value required at time of ordering as stated in the Company's 'Delivery Charges' document, available on request. The Company shall determine the route and method of carriage and any special requirements of the Customer shall be subject to an additional charge.

7. VARIATIONS TO SPECIFICATIONS

The Company reserves the right to constantly review its products and to alter and improve the specifications or dimensions of the components or materials used to substitute other components or materials of similar strength, specification, dimensions or quality, either when the components or materials specified are not readily available or the Company considers that the substituted components or materials are a reasonable alternative or improvement to the components or materials specified.

8. DELIVERY

(1) Any time or date for the despatch or delivery for goods or for the completion of work whether specified in the Company's quotation or otherwise given by the Company shall be taken as an estimate made by the Company in good faith but shall not be binding upon the Company either as a term of the contract or otherwise. In no circumstances shall the Company be liable for any loss or damage sustained by the Customer in consequence of failure to deliver within such time or by such date or in consequence of any other delay in delivery however caused.

(2) Unless otherwise agreed in writing delivery shall be made at the premises specified by the Customer or the Customer's carrier. Subject to Condition 8 (4) the risk in the goods shall pass to the Customer upon delivery. It is the Customer's responsibility to dispose of all packaging after delivery.

(3) The Company may deliver the goods in installments and separate contract upon the terms of these Conditions of Sale.

(4) If delivery of the goods is delayed through any act or omission of the Customer, the Company may put the goods into storage at the Customer's risk and expense.

(5) The customer undertakes to inspect the goods upon delivery and shall be deemed to have accepted the goods upon the earlier of payment in full for the goods or 5 days after the delivery has been made, if the Company has (i) not been notified of the Customer's refusal to accept the goods or (ii) pursuant to such a claim has not complied with condition 9 below.

9. LOSS OR DAMAGE IN TRANSIT

(1) Where the Customer wishes to adjust the invoiced value for goods delivered by the Company, in respect of a claim against the Company for (i) goods lost in transit or (ii) edge damage to goods in transit or (iii) any other damage to goods that is reasonably identifiable at the time of the delivery, then the Customer must provide details of the claim in writing on the face of the delivery note that accompanied the goods.

(2) Where the Customers claim relates to (i) damage that cannot be reasonably identified at the point of delivery or (i) the goods delivered are incorrect in that they vary in style or description from the Customer's order or the details contained in the delivery note, then the Customer must inform the Company in writing within 48 hours of the delivery being made.

(3) Any liability which the Company may incur for loss of or damage to the goods whilst in transit shall in no case exceed the invoice value of the goods and in no circumstances shall the Company be liable for any indirect or consequential loss however caused.

10. PAYMENT

(1) Unless otherwise agreed in writing, all accounts shall be paid net at the Company's registered office on or before the last day of the month following the date of the Company's invoice. Cheques and money orders shall be made payable to or to the order of the Company. Only the Company's official receipt will be treated as valid. Time shall be of the essence.

(2) The Company shall be entitled to charge interest on all overdue accounts at a rate of 2% per month above the base rate from time to time of National Westminster Bank plc on the outstanding balance.

11. PASSING OF PROPERTY

(1) The goods shall remain the sole and absolute property of the Company until such time as the Customer shall have paid to the Company the agreed price together with the full price of any other goods the subject of any other contract with the Company provided that the Company at its sole discretion may upon expiry of the six month period from the date of the Company's invoice release its title to the goods the subject of the invoice without notice to the Customer.

(2) The Customer acknowledges that the Customer is in possession of goods solely as bailee for the Company until such time as the full price thereof is paid to the Company together with the full price of any other goods the subject of any other contract with the Company.

(3) Until such a time as the Customer becomes the owner of the goods, the Customer will store them on his premises separately from the Customer's own goods or those of any other person and in a manner which makes them readily identifiable as the goods of the Company.

(4) The Customer's right to possession of the goods shall cease if he, not being a company, commits an available act of bankruptcy or if he, being a company does anything or fails to do anything which would entitle a Receiver to take possession of any assets or which would enable any person to present a petition for winding-up. The Company may for the purpose of recovery of its goods enter upon any premises where they are stored or where they are reasonably thought to be stored and may reposses the same.

(5) Subject to the terms hereof the Customer is licensed by the Company to agree to sell the Company goods, subject to the express condition that such an agreement to sell shall take place as agents and bailee's for the Company whether the Customer sells on his own account or not and that the entire proceeds thereof are held in trust for the Company and are not mingled with other monies and shall be at all times identifiable as the Company's monies.

(6) If the Customer has not received the proceeds of any such sale, he will upon being called upon so to do by the Company, within seven days thereof assign to the Company all rights against the person or persons to whom the Customer has supplied the goods.
12. SUSPENSION OR CANCELLATION

OF DELIVERIES

(1) If the Customer shall fail to pay to the Company on the due date any sum payable hereunder, or shall have a receiving order in barkupty made against him, or make any arrangement with his creditors, or being a body corporate shall have a receiver appointed or if any order shall be made or any resolution passed for winding up the same, the Company may, without prejudice to its other rights, demand immediate payment by the Customer of all unpaid accounts and suspend further deliveries and cancel this and any other contract between the Company and the Customer without any liability attaching to the Company in respect of such suspension or cancellation and debit the Customer with any loss sustained thereby.

(2) If the Customer cancels his order the Company shall be entitled to recover any loss sustained thereby from him.

13. RETURNS

The Company's policy on returns is covered in the "Product Returns Procedure" document, available on request, which should be considered part of these Terms and Conditions.

14. GUARANTEE

(1) The Company undertakes to repair or replace, at the option of the Company, any goods manufactured by the Company which are shown to be defective in materials or workmanship within the warrenty period for the applicable goods as defined in this range guide or on your sales order form the date of delivery. Provided that the Company shall be under no liability under the said guarantee if (a) the Customer has not paid in full for the goods or (b) the Customer has executed or attempted to execute repairs or alterations to the goods which are not authorised by the Company or has failed in any other respect to store the goods correctly or has mishandled the goods or failed to adhere strictly to the terms of hereof or (c) the Company has not been notified of any defect within one month of the defect becoming apparent.

(2) Any claim against the Company under Condition 14 must be made in writing to the Company on a 'Customer Care Application Form' which forms part of the Company's Quality procedures and will be made available by the Company in a timely manner. (3) Should a Customer claim, made against the company under the terms of the Guarantee, be rejected by the Company, then the Company reserves the right to levy an administration fee, equal to the costs incurred by the Company during the processing of the Claim or £100, whichever is the higher value. The Customer must pay the administration fee within 30 days of the Customer being notified by the Company that the claim has been rejected.

15. EXCLUSION OF LIABILITY

(1) The Company's guarantee is provided by the Company and accepted by the Customer in substitution for all express or implied representations conditions and warranties statutory or otherwise as to (a) the stated quality satisfactory nature fitness for purpose durability or performance of the goods and (b) the stated and of the Company's workmanship and the stated quality satisfactory nature fitness durability or performance of any materials used in connection therewith and all such representations conditions and warranties are hereby expressly excluded.

(2) Except for any liability which it may incur for death or personal injury resulting from negligence the Company shall not be liable in any manner whatsoever whether in contract, in tort, in misrepresentation or otherwise for any consequential or other loss damage or injury however caused which may arise out of or in connection with the supply of goods to or the execution of any work for the Customer (including goods supplied and work executed under the said guarantee).

16. LIEN

The Company shall have a general lien in respect of all sums due from the Customer upon all goods to be supplied to such Customer or upon which work has been done on the Customer's behalf and, upon 14 days written notice to the Customer, may sell such goods and apply the proceeds towards the satisfaction of the sums due to the Company.

17. FORCE MAJEURE

If the performance of the contract by the Company shall be delayed by any circumstances or conditions beyond the control of the Company the Company shall have the right at its option (a) to suspend further performance of the contract until such time as the cause of the delay shall no longer be present or (b) to be discharged from further performance of and liability under the contract and if the Company exercises such right the Customer shall thereupon pay the contract price less a reasonable allowance for what has not been performed by the Company and the Company shall not be liable for any loss other than the price already paid for any goods not supplied less the Company's expenses.

18. SEVERANCE

If any condition herein shall be deemed void for any reason whatsoever, but would be valid if part of the wording thereof were deleted any such condition shall apply with such modifications as may be necessary to make it valid and effective.

19. 'DEALS AS CONSUMER'

Nothing in these Conditions shall affect the statutory rights of a customer who in relation to the Company 'deals as consumer' as defined in Section 12 of the Unfair Contract Terms Act 1977 or any amendment or modification thereof.

20. LEGAL CONSTRUCTION

This contract shall be constructed in accordance with English Law and shall be subject to the jurisdiction of the English Courts.

21. EXPORT TERMS

(1) Where the goods are supplied for export from the United Kingdom, the provisions of this clause shall apply subject to any special terms agreed in writing between the Customer and the Company.

(2) The Customer shall be responsible for complying with any legislation or regulations governing the importation and/or sale of the goods into or in the country of destination and for the payment of any associated duties or taxes.

(3) The Customer shall arrange for testing and inspection of the goods prior to collection/ delivery and the Company shall have no liability in respect of any defect in the goods which would have been apparent on inspection and which is claimed after delivery, or in respect of any damage during transit.

(4) Unless otherwise agreed in writing the goods shall be delivered ex-works and the Company shall not be obliged to give notice to the Customer that the goods have been so delivered.
