

WE **MANUFACTURE** AND
DISTRIBUTE EUROPE'S WIDEST
RANGE OF MDF PROFILES

It's over six decades since our W.Howard journey began. Since then, we've evolved into the manufacturer and distributor of Europe's widest range of MDF profiles. Our name is synonymous with quality, service and respect for the environment.

This brochure is our showcase. It's where we present our products and allow you to get a taste of the transformative effect that our top quality MDF profiles can bring to all kinds of living and work spaces. From classic period designs to cool, contemporary styles, our products are designed to make a stunning difference to every interior.

Remember, too, that as you browse through our brochure, our team is always ready to answer your questions and talk through your plans. Superb customer service is at the heart of what we do, and we look forward to helping you in any way we can.

Taking a responsible approach to our environment has been at the heart of W.Howard for many years. It's a commitment that remains as important to us as it always has done.

As a responsible business, we make it a priority to work as sustainably as possible, making a positive contribution to reducing our impact on the world around us. By focusing on important environmental standards and working to achieve the appropriate accreditations, we continue to play our part in promoting sustainable design and construction.

RESPECT FOR OUR ENVIRONMENT

At the core of our business are the MDF profiles we manufacture and distribute – products that live up to our environmental ambitions. Our MDF is made from wood fibres and other by-products, a process that helps us minimise waste and makes efficient use of resources. Producing 1m³ of MDF stores 1.1 tonnes of CO₂, making MDF profiles an environmentally conscious choice.

Our environmental commitment is also underpinned by our careful management of our manufacturing and distribution. By working to established standards, we make sure that we're aligned with sustainable practices – from the production of our MDF profiles through to the ways we get them to our customers.

QUALITY ASSURED

Central to our dedication to sustainability is our adherence to quality assurance standard ISO9001 – evidence of our commitment to high quality standards, and to making sure our products are durable and fit for the long-term. This reduces the need for frequent replacement, and ultimately means that waste generation is reduced.

We're also proud to have achieved the prestigious environmental standard, ISO 14001. This recognises our commitment to minimising our environmental impact, from our sourcing of raw materials to the end-of-life management of our products.

We also make sure that the MDF and real wood veneers we use are certified by the Forest Stewardship Council (FSC). This FSC certification guarantees that the wood originates from responsibly managed forests, where replanting and conservation efforts are upheld. By supporting the FSC, we help to preserve forests, biodiversity, and the livelihoods of local communities.

LOOKING AFTER OUR WORLD

With over six decades of experience behind us, we know it's critical to look after our world. That's why we've worked hard to take account of the environment in all our operations, and why we believe our stringent environmental standards really matter. As all of us evolve our business practices to meet the demands of our planet, we're proving that sustainable working and high-quality production can go hand-in-hand for a cleaner, greener future.

We continually support our local community, as well as supporting environmental causes and reducing waste across all our manufacturing processes while maintaining the very highest quality standards.

As part of our commitment to actively reduce our carbon footprint, we are delighted to be working in partnership with Innovative Energy.

ENVIRONMENT

Becoming a true industry leader takes time. It demands years of dedication and exceptional service, and a commitment to quality that keeps customers returning time and again.

That's what you get with W.Howard.

For well over six decades, we've set standards of excellence that have seen us become one of the leading names in MDF profiles, renowned as an innovative and independent British brand. We're proud to have earned our position as a trusted supplier to customers across the UK, and our unrivalled expertise has made sure that W.Howard is a business that's built to last.

YEARS OF EXPERIENCE

Originally founded in 1958, our journey has seen us evolve into the manufacturer and distributor of Europe's widest range of MDF profiles – a range that includes skirtings, architraves, window boards, wall panelling, door linings and bespoke products. Designed to enhance all kinds of living and work spaces, our MDF profiles give any interior a quality touch – plus they're a dream to install and maintain.

Back in the 1950s, we initially focused on serving customers local to our original Manchester base, but we've since grown to become a nationwide supplier with five sites across the UK. As a proud British brand, all our products are manufactured in the British Isles – either within the UK in Manchester and Powys, or at our state-of-the-art site in Kildare in Ireland. Our commitment to domestic production keeps the quality high and helps us make a valuable contribution to the economy.

EXCEPTIONAL PRODUCTS

We have over 100 stock lines in our range, with products to suit every style of interior – from classic period designs to the latest contemporary looks. As well as a variety of aesthetic choices, we offer a range of functionality options, including primed profiles with a paint-ready surface, real wood veneers that have the look of solid timber, and foil-wrapped profiles that need no painting or finishing. We also offer our exclusive KOTA™ products – tough and elegant profiles that are quick and simple to install.

Our W.Howard team is driven by passion for what we do and by our deep concern for our environment. Through decades of expert craftsmanship and business development, we've refined our manufacturing processes and built an enviable distribution network, enabling our customers nationwide to take advantage of the very best MDF profiles whenever they're needed. Visually appealing and highly durable, our products give every project a real stamp of quality.

DEDICATED TO YOU

The W. Howard story is one of unwavering dedication to our customers and to delivering exceptional MDF profiles every time. Whatever the nature of the project, our expanding product range offers the perfect solution for a wide variety of interior design and decoration needs. Plus, as technology and our sector continue to evolve, we're proud to remain at the industry's forefront, setting new standards and shaping the future of MDF profile innovation.

KILDARE

LONDON

ASTLEY

MANCHESTER

POWYS

For over 60 years, W. Howard has understood the importance of great customer service. Making sure our customers get what they need, when they want it, is a principle that has driven our success. It simply wouldn't have been possible to become one of Europe's leading manufacturers and distributors of MDF profiles without our belief in putting customers first.

EFFICIENT DELIVERY

Smooth and timely delivery of every order is a driving principle – a commitment that sees us go above and beyond every day. With a major distribution centre in Cheshire right at the heart of the UK motorway network, we supply customers across England Wales and Scotland, while our London distribution centre serves merchants around England's south east.

Operating our own vehicle fleet gives us direct control over the entire logistics process, with efficient and reliable deliveries making sure our customers get their products fast. So wherever you are in the UK, you can trust us to deliver the quick and convenient service you need.

A TEAM YOU CAN TRUST

Of course, high-quality customer service is about much more than efficient delivery alone. We're also hugely proud of our incredible external and internal sales teams – they're the friendly experts who work tirelessly to help keep customers' shelves fully stocked. Maintaining adequate inventory is so important, and our sales teams are always ready to respond.

We offer superb marketing support too to help our customers build their businesses. Comprehensive brochures showcase our unrivalled product range, while high-impact point-of-sale materials and quality samples help sales grow.

THE HIGHEST STANDARDS

We believe superb customer service goes hand-in-hand with product quality, and we go the extra mile to make sure our MDF profiles meet the highest standards. Our manufacturing sites have achieved important accreditations including ISO9001, ISO14001 and ISO45001 – evidence of the value we place on production standards, our environmental responsibility, and the health and safety of our teams. Plus, all the MDF we use is FSC-certified, and we work in accordance with the British Woodworking Federation's Code of Conduct.

Excellent customer service really is at the core of the way we work. With our dedication to prompt and reliable deliveries, a supportive and knowledgeable sales team, proven production processes, and a focus on our environment, we work hard to exceed customers' expectations day in, day out.

As we continue to grow and evolve, our customer service commitment remains as strong as it's ever been, cementing our position as your trusted industry partner.

SLATTED

**NEW
PRODUCT**

WALL PANNELING — SLATTED

Transform any space with one of our easy to install wall panelling sets

Create a stunning slatted screen feature on any wall with our new Oak slat set.

The individual slats feature an MDF core which are finished with a real wood Oak veneer on both the top face and sides.

Our Real Wood veneered profiles offer the same look and feel as solid timber with all the benefits of MDF.

The slats provide the flexibility to create a completely bespoke feature, whether its a feature panel, wall or complete room renovation.

Each slat will have natural characteristics and slight colour variation.

If required the natural Oak veneer allows for the slats to be stained or painted to match existing decor or create a stand out feature to any room.

Each set contains eight slats which can cover up to a 0.5m width of wall space with suggested spacing of 20mm between each slat. The slats can be fitted using adhesive or a hammer and pins.

MDF WALL PANNELLING KIT

Transform any space with one of our easy to install wall panelling sets

The MDF Wall Panelling Kit from W.Howard offers a simple way to add period style to any room.

The Kit comes complete with everything needed to fit tongue-and-groove style panelling to any wall, and needs no special equipment to install.

It is suitable for use in newbuild and existing properties, bringing a touch of elegance to bathrooms, kitchens and hallways in particular.

Each kit contains two packages – one containing a ready primed skirting and dado rail, and one including eight primed MDF beaded panels, which can cover up to 2.32m of wall space. The panels can be fitted using adhesive and mitre glue, or a hammer and pins.

A 10mm rebate lip designed into both the skirting and the dado rail helps each panel slot into place and ensures a neat, straight edge.

Once installed, the panelling is instantly ready to paint in any colour to match the existing décor.

Our meticulously crafted moisture-resistant MDF window boards give any window an exceptional finish – and as with all our MDF profile products, they don't warp and are defect-free.

Available in a range of thicknesses and lengths, our window boards are primed and ready for painting – perfect for fuss-free installation and finishing. We offer flexibility too, with custom lengths cut to your specification along with cross cut and returned end options.

Experience outstanding durability and elegance with our exclusive KOTA™ MDF profiles. These high-quality interior profiles benefit from a smooth and silky finish that does not require painting, thanks to the application of advanced Eastman Cerfis™ polymer coating technology.

The simple three-step installation makes our KOTA™ profiles an efficient and effective solution in all kinds of home and work interiors. They're VOC-free too, so they can be installed with confidence wherever you need beauty and resilience.

KOTA™ — CHAMFERED & ROUNDED

A tough impact resistant solution with a unique white smooth coating that does not need painting

DOOR LININGS & CASINGS

Our range of door casings and linings have been designed to complement our range of architraves and help achieve a beautiful co-ordinated interior whilst offering hard wearing durability.

Our door casings are supplied with an integral door stop whilst door linings have a door stop that will need to be fitted to the lining, allowing for flexibility.

What's more W.Howard Limited is CERTIFIRE approved to manufacture MDF door linings and casings for use with specified fire doors.

Technical Terminology

Face Edge Corners: Face edge corners are machined to a 2mm radius for linings and 3mm radius on the shoulder for casings.

Door sizes: Can be manufactured in both imperial and metric door sizes.

Door stops: Available to order in 12mm x 25mm x 2.13m and 12mm x 32mm x 2.13m. Alternative sizes are available to order.

Certifire: W.Howard is CERTIFIRE approved to manufacture MDF door lining and casing sets for use with specified fire doors.

Fire Rating: Our primed FD30 casings and linings are ½ hour fire rated and comply with the requirements of BS476: part 22.

Grooves are 4mm deep x 15mm wide.

Hanging Tolerance: Sets are machined to provide a hanging tolerance, over and above door size, of 3mm either side, 3mm to the head and 18mm beneath the door. Hanging tolerance can also be specified to accommodate your individual requirements.

DOOR LINING STANDARD

Designed to complement
our range of architraves

OPTION 1 LENGTHS

- 25mm available in 5.10 & 5.49 metre lengths
