Description: Reliance Valves Easifit Thermostatic Mixing Valve (TMV) 2in1 must be TMV3 & TMV2 accredited, WRAS approved and comply with NHS and HTM04-01-D08 regulations. The TMV must be suitable for BREEAM projects and work to a 10:1 pressure differential. The seals must be Viton and the internal components must be scale resistant. The water inlets must have integral strainers and check valves, and compression style connections with integrated flat faced unions on all connections.
