WELCOME TO OUR NEW CATALOGUE

FULL OF EXCITING NEW SOLUTIONS,
CRACKING PRICES ON A DIZZYING
RANGE OF WONDERFUL PRODUCTS... ALL
DESIGNED TO MAKE YOUR LIFE EASIER!

HOW TO ORDER!

1. FIND YOUR PRODUCTS

In our catalogue, online, or by simply calling us.

2. CHECK DETAILS

More information is held online with data sheets or call.

3. CHECK PRICES

On the price sheets, or on your customer portal online.

4. ORDER BY TELEPHONE, EMAIL OR WEB

Always use our product codes when ordering by phone or email to ensure error free processing. If you want to order using our Online Portal, give us a call and we can set this up for you.

TILE RITE

TILE RITE

WHO WE ARE...

We are a well-established family run business supplying specialised tiling tools and accessories to the retail trade.

WHAT WE DO...

Tile Rite strive to source and manufacture exciting new solutions for all your tiling needs. We believe in providing a personal service to our customers, building relationships and providing human touches. Tile Rite are well established, we have grown over the past 30 years and want to help you grow too.

WHY WE DO IT...

Our Managing Director has over 40 years' experience in sourcing tiling accessories and has extensive knowledge when it comes to manufacturing aluminium profiles, ensuring that we provide the highest quality at the best possible prices. We also believe in relationships and providing a personal service, which is ever more important to us in this digital age.

WHERE WE ARE...

We are based in Staffordshire, but our sales team is nationwide. Pick up the phone and give us a call.

OUR TEAM

Our 'On the Road' Sales Team

Our long serving sales team have a wealth of knowledge and are generally likeable too! It's nice to talk to a person especially in this digital age, and we have 8 of them Nationwide to make your dealings with us easy!

We also have a dedicated team of merchandisers to increase your sales and buyer attention thorough creating attractive visual displays.

Our Office Team

We believe familiarity is important to our customers, so you can be sure of speaking with a dedicated member of staff every time you pick up the phone. Our Office Manager David Montgomery is your man for orders, Marion Yarsley for anything regarding Shipping, Gill Lake for Accounts, Laura Harbidge for Marketing and Roberto Harbidge for everything else!

REASONS TO CHOOSE TILE RITE

NEW EXCLUSIVE PRODUCTS

We are constantly striving to source new and exciting solutions for all your tiling needs. Look out for our 'NEW' icon for all of our latest product launches.

FANTASTIC VALUE AND SAVINGS

For quantity discounts and information on current offers please contact your sales representative.

TRUSTED FOR 30 YEARS

We have spent the last 30 years building a company that you can feel secure about. As one of the leading brands within this sector, we have the expertise to help you grow too!

SPEEDY AND RELIABLE DELIVERY

Lead times may vary during busy trading periods, however we always aim to deliver by the next working day, with orders placed before 2pm.

EXPERT ADVICE ON HAND AT ALL TIMES

Both internal and external sales staff are on hand to offer sales and advice on our products. Detailed product information is also available on our website. www.tilerite.co.uk

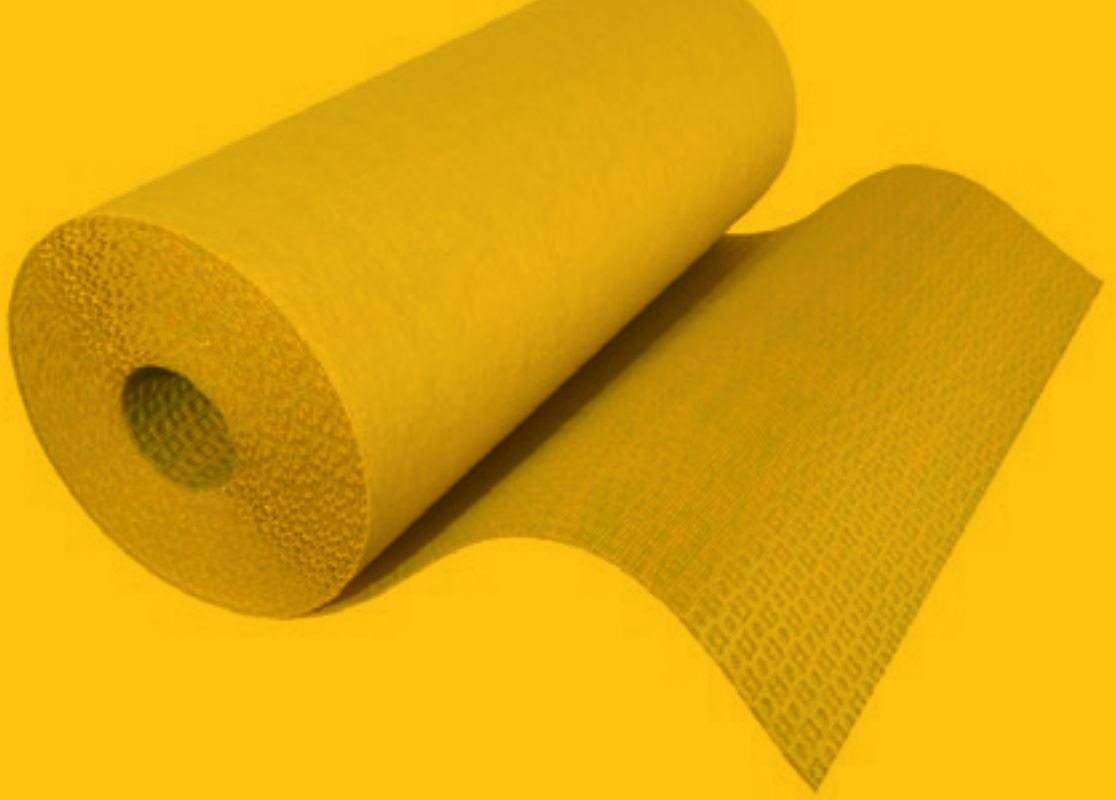

QUALITY APPROVED & ACCREDITED PRODUCTS

Tile Rite products are ethically sourced from quality approved manufacturers in England, Europe and China.

ANTI CRACK MATTING

ANTI CRACK MATTING

**UNDERLAY MATTING
FOR THE DECOUPLING
& WATERPROOFING OF
TILED SURFACES.**

THE PROBLEMS

- ✓ **CRACKS IN THE SUB FLOOR.**
Cracks in both existing and new sub floors can be transmitted into the newly tiled surface.
- ✓ **STRESSES IN THE SUB FLOOR.**
Subfloor stress can occur for many reasons; concrete floors will continue to shrink and expand for long periods of time after installation. Wooden substrates can be affected by moisture in the air. Underfloor heating will also dramatically increase the degree of movement within such floors. This "hot and cold" cycle places great stress on the tiled covering.
- ✓ **DAMP FROM THE SUBFLOOR.**
Residual moisture from the screed itself can collect under the tiles and cause damage to the adhesive layer.
- ✓ **MOISTURE MIGRATION.**
Damage caused when tiled bathrooms and wet areas are not sealed properly resulting in damp patches on ceilings below bathrooms, damage to timber frames & building joists etc.

THE SOLUTION

- ✓ Using anti crack matting will absorb substrate movement to prevent surface cracks & the delamination of tile and stone. The matting decouples the tiles, bridges any cracks in the substrate, provides waterproofing (when used with waterproof joint tape) and facilitates compensation for water vapor pressure if residual moisture is present.

PRO+MAT ANTI CRACK FLOOR MATTING

This Newly developed waterproof heavy duty anti crack mat is used under tiles to prevent surface cracks, moisture migration and the de-lamination of tile & stone. Can be applied over challenging substrates such as green screed and single layer plywood.

USES:

Tile Rite Pro+Mat is elastic, rot proof and resistant to aggressive substances and liquids such as alkalis, solvents and oils. It bridges cracks, uncouples floor assemblies from their substrates and is suitable as an underlayment for floor tiles.

AREAS OF USE:

For interior and exterior applications: Concrete (green screed, mortar beds, masonry, lightweight concrete and/or air entrained concrete, primed gypsum underlayment (minimum 200 PSI cured), post tension concrete), exterior grade plywood (ECP), OSB, exterior decks, ceramic tile, resilient flooring, cutback adhesive and poured asphalt tarmac.

WATERPROOFING:

Tile Rite Pro+Mat is waterproof and offers vapour management. For a waterproof installation, apply Tile Rite waterproof seam tape evenly over seams & changes in plane. Preformed internal & external corners are also available to achieve a watertight seal.

ANTI CRACK MATTING

DURABASE CI++ ANTI CRACK FLOOR MATTING

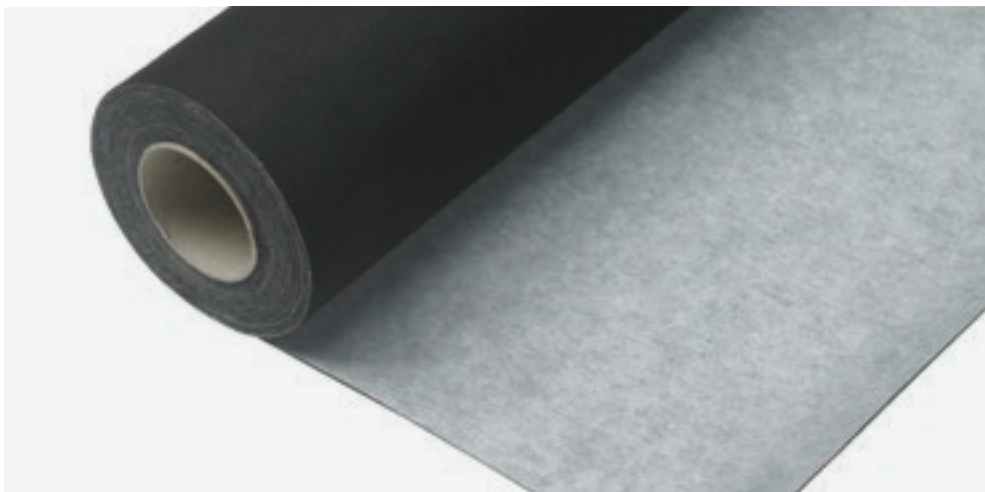

Used in conjunction with tiles, DURABASE CI++ decouples the tiles, bridges any cracks and has a waterproofing function.

- ✓ It also facilitates compensation for water vapour pressure if residual moisture is present.
- ✓ Ideal for renovation work.

ANTI CRACK WATERPROOF FLOOR MATTING

Use under tile or stone over any 18mm substrate, e.g. over cement, CDX or OSB board.

- ✓ Quick & easy to install.
- ✓ The mat prevents surface cracking by compensating for shear forces between tiling & the floor.
- ✓ 100% waterproof when used with joint tape & accessories.
- ✓ Can be laid on wood, concrete & cement.
- ✓ No waiting or drying time! You are able to install tiles immediately once matting is applied.
- ✓ Ideal for use with underfloor heating.

0.85mm THICK &
COMES WITH A 10
YEAR WATERPROOF
GUARANTEE!*

*Use in conjunction with waterproof floor matting & accessories for a 10-year guarantee.

WATERPROOF MATTING

**WATERPROOF YOUR BATHROOM
100% GUARANTEED**

WHAT'S THE PROBLEM?

- ✓ Water penetrates or seeps into the wall / floor joints.
- ✓ Leaks in bathroom which have built up over time.
- ✓ Bathrooms not sealed properly.
- ✓ Damp patches in rooms below from leaks!

WHY DOES THE PROBLEM EXIST?

- ✓ Grouts & adhesives are only water resistant...not waterproof!
- ✓ Over time grout joints will allow water to penetrate below the tile.
- ✓ Water & Moisture can still migrate to the substrate below
- ✓ Mastics & Silicones can crack, and seals can be broken.
- ✓ Subsidence can cause seals to break & tiles to move & crack.

WHY IS MATTING THE SOLUTION?

- ✓ Waterproofing against water & moisture is critical to protect any construction or building and helps to prevent the following:
- ✓ Water penetration to other living spaces.
- ✓ Expensive repairs.
- ✓ Cracks in walls.
- ✓ Cracks in the ceramic layer.
- ✓ Ceramic tiles may lift off.

AREAS OF APPLICATION

Any area to be tiled that is subject to dampness!

- ✓ **INTERIOR USES:**
Bathrooms / Showers /
Wet Rooms / Changing Rooms /
Laundry Rooms / Doorways.
- ✓ **EXTERIOR USES:**
Decks / Patios /
Terraces / Balconies.

WATERPROOF MATTING

WATERPROOF WALL MATTING

Tile Rite waterproof wall matting is your simple solution to permanent waterproofing.

THE PROBLEM

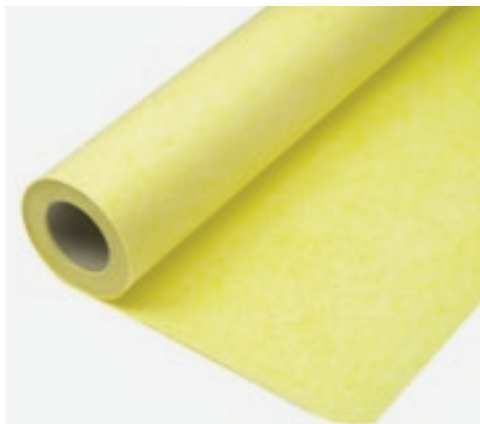

Damage caused when tiled bathrooms and wet areas are not sealed properly, resulting in damp patches on ceilings below bathrooms and damage to timber frames, building joists and plasterboard etc.

THE CAUSES

Moisture migration through permeable tiles and grout lines. Water seeping behind dry, cracked and broken mastic or silicone seals around baths & showers. Moisture seeping behind tiles that have delaminated from their original position.

- ✓ Quick & easy to install.
- ✓ Your wet room or walk in shower will be completely sealed from water & moisture penetration to the surfaces beneath.
- ✓ No waiting or drying time! You are able to install tiles immediately once matting is applied.
- ✓ Only 0.7mm thick with no weak points.

CODE	BARCODE	LENGTH	WIDTH

FLEXIBLE WATERPROOF JOINT TAPE

This seam tape should be used to cover any joints between waterproof wall and floor matting or Pro+Mat to create a watertight seal.

The premium material allows for more 3D movement, eliminating the risks of leaks. Apply using a powder-based adhesive. Always centre the tape over the joint and ensure 100% contact.

CODE	BARCODE	LENGTH	WIDTH
FJT465	5019788004655	5m	120mm

FLEXIBLE INTERNAL CORNER

This preformed corner piece is used to cover any internal corner joints between waterproof wall & floor matting or Pro+Mat.

The premium 3D material allows for more 3D movement, eliminating the risk of leaks. Always centre the corner over the joint and ensure 100% contact. Apply using a powder-based adhesive.

CODE	BARCODE	LENGTH
FIC467	5019788004679	ONE SIZE

FLEXIBLE EXTERNAL CORNER

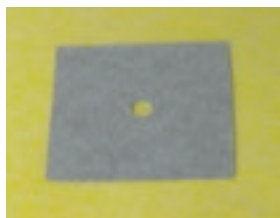

This preformed corner piece is used to cover any external corner joints between waterproof wall & floor matting or Pro+Mat.

The premium 3D material allows for more 3D movement, eliminating the risk of leaks. Always centre the corner over the joint and ensure 100% contact. Apply using a powder-based adhesive.

CODE	BARCODE	LENGTH
FEC466	5019788004662	ONE SIZE

FLEXIBLE PIPE COLLAR

Use the flexible pipe collar around the base of 15-18mm water or radiator pipes. The premium 3D material allows for more 3D movement, eliminating the risk of leaks.

Use with Tile Rite waterproof matting to create a permanent waterproof seal. Ensure 100% contact. Apply using a powder-based adhesive.

CODE	BARCODE	LENGTH
FPC468	5019788004686	ONE SIZE

BATH & SHOWER SEAL TAPE

Use on the outside of bath or shower trays prior to installation for a waterproof seal.

For best results use in conjunction with waterproof wall matting & accessories. Apply by fixing the self-adhesive strip to the outside of the bath/shower tray where it will meet the walls. Overlap with the waterproof wall matting to completely cover your wall.

CODE	BARCODE	LENGTH	WIDTH
BST130	5019788001302	3.5m	120mm

DURABASE (WP) SEALING TAPE

This waterproof seam tape should be used at matting junctions and changes of plane to create a watertight seal.

Apply centrally over the joint using a powder-based adhesive.

THERMABOARD

THERMABOARD

THERMABOARD IS YOUR COMPLETE COST EFFECTIVE SOLUTION FOR WATERPROOFING & INSULATION IN ONE SIMPLE OPERATION.

Thermaboard can replace plasterboard and plywood on a structurally secure substrate and are ideal surfaces for thin bed tiling on walls and floors, and can be fixed to any suitable framework such as brick, concrete, wood or metal. It is simple and easy to fix, and is lightweight and easy to cut with a saw or knife. Thermaboards are completely water resistant when joints are sealed with Tile Rite water proof joint tape.

Thermaboards can also improve under floor heating efficiency up to 50%. The thicker the board the greater the thermal properties. Thermaboards can hold a tile weight of 62kg/m².

INSULATING & WATERPROOF TILE BACKER BOARD

- ✓ Thermaboard is ideal for many applications including waterproofing, insulating and dry lining.
- ✓ Thermaboard can be used to insulate and waterproof walls, floors and ceilings and are available in 6, 8, 10, 12 & 20mm thicknesses. The thicker the board the greater the thermal properties.

WHAT ARE THERMABOARDS MADE FROM?

- ✓ Thermaboards are made from extruded polystyrene with high water proofing and insulation properties. Each side of the board is covered with a fibre mesh (to provide mechanical resistance) and embedded in a polymerised cement mortar. This combination provides to the system a very good mechanical resistance, waterproofing and bond to tile adhesive.

THERMABOARD BENEFITS

- ✓ Versatile: Can replace plasterboard & plywood on a structurally secure substrate to provide a smooth surface to tile on to.
- ✓ Waterproof: Totally impervious to moisture, providing a waterproof barrier when used in conjunction with waterproof joint tape.
- ✓ Insulating: Creates a thermal layer improving under floor heating efficiency up to 50%.
- ✓ High Strength: Tested to hold a tile weight of 62kg/m².
- ✓ Suitable for use with all types of under floor heating.
- ✓ Boasts sound reduction properties.
- ✓ Lightweight and easy to cut making preparation time faster .
- ✓ Rigid and strong providing a stable surface to tile on to.
- ✓ Rot-proof

THERMABOARD

Tile Rite Thermaboard is an insulating, rot proof, waterproof tile backer board ideal for many applications including waterproofing, insulating and dry lining.

Thermaboard can be used to insulate and waterproof walls, floors & ceilings. The thicker the board the greater the thermal properties.

- ✓ **Versatile:** Can replace plasterboard & plywood on a structurally secure substrate to provide a smooth surface to tile on to.
- ✓ **Waterproof:** When used with waterproof joint tape.
- ✓ **Insulating:** Creates a thermal layer improving underfloor heating efficiency up to 50%.
- ✓ **High Strength:** Tested to hold a tile weight of 62kg/m².

LEVELLING SYSTEMS & TILE SPACERS

LEVELLING SYSTEMS & TILE SPACERS

TILES EXPAND & CONTRACT EVEN WHEN FIXED. IF TILES WERE NOT SPACED THEY WOULD PUSH AGAINST EACH OTHER, CRACK AND COME LOOSE. TILE SPACERS MAKE SURE THAT YOUR SPACES ARE EVEN AND GIVE A PROFESSIONAL LOOK TO THE FINISHED INSTALLATION.

Spacer width is a personal preference however traditionally 2mm was used for walls and 3mm for floors.

Check out our Levelling Spacer System for even grout lines and no lippage! The levelling spacer system gives you PERFECT tile-to-tile alignment.

Within this section

- ✓ Levelling Spacer System
- ✓ Long Legged Tile Spacers
- ✓ Specialist Spacers
- ✓ Traditional Spacers

LEVELLING STARTER KIT

The Tile Rite Levelling Starter Kit ensures that your large format Porcelain, Marble or Stone tiles are perfectly aligned and held level.

The spacer ensures even 1mm or 2mm grout lines, and the wedge pulls the tile level to eliminate any lippage.

Kit comprises of 100 spacers, 100 wedges and a pair of pliers.

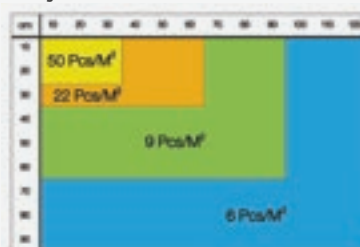

This easy to use system benefits from these key features.

- ✓ Prevents uneven tiles.
- ✓ Ensures even grout lines.
- ✓ Easy to use.
- ✓ For floor & wall tiles.
- ✓ Holds tile level.
- ✓ Perfect tile to tile alignment.
- ✓ For tiles from 2-12mm thick.
- ✓ May be combined with regular tile spacers for joints up to 6mm wide.
- ✓ Guiding spine in centre of wedge works with groove in spacer to ensure wedge stays straight, level & secure when fitting.
- ✓ Spacer size stamped in to top of spacer.
- ✓ Notches in side of spacer ensures a clean detachment of the spacer top from the base.
- ✓ Starter kit available with 1mm or 2mm spacers.

DID YOU KNOW?

The tile spacer was Tile Rite's first ever product back in 1989.

Did you know they can be left in place and grouted over.

Visit our website for more facts!

WWW.TILERITE.CO.UK

LONG LEG TILE SPACER BUCKETS

Tiles expand & contract even when fixed. If tiles were not spaced they would push against each other, crack and come loose.

Tile spacers make sure that your spaces are even and give a professional look to the finished installation. Spacer width is a personal preference however traditionally 2mm was used for walls and 3mm for floors.

- ✓ Long Leg tile spacers are the professionals preferred choice.
- ✓ The benefit of using long leg tile spacers are that they are easier to pick up and handle and you are less likely to loose them behind the tile.

TILE SPACER WEDGES

Tile spacer wedges are used for wall tiling situations when you are putting bottom cuts in above any uneven surface like rough concrete etc.

- ✓ Spacer width from 1-5mm.
- ✓ Use stacked on top of each other for heights over 5mm.
- ✓ Great for marble wall tiling where each piece varies slightly and standard spacers will not work.
- ✓ Removable & reusable.

CODE	BARCODE	SIZE	PK QTY
TSW279	5019788002798	1-5mm	250pcs

TILE SPACER PEGS

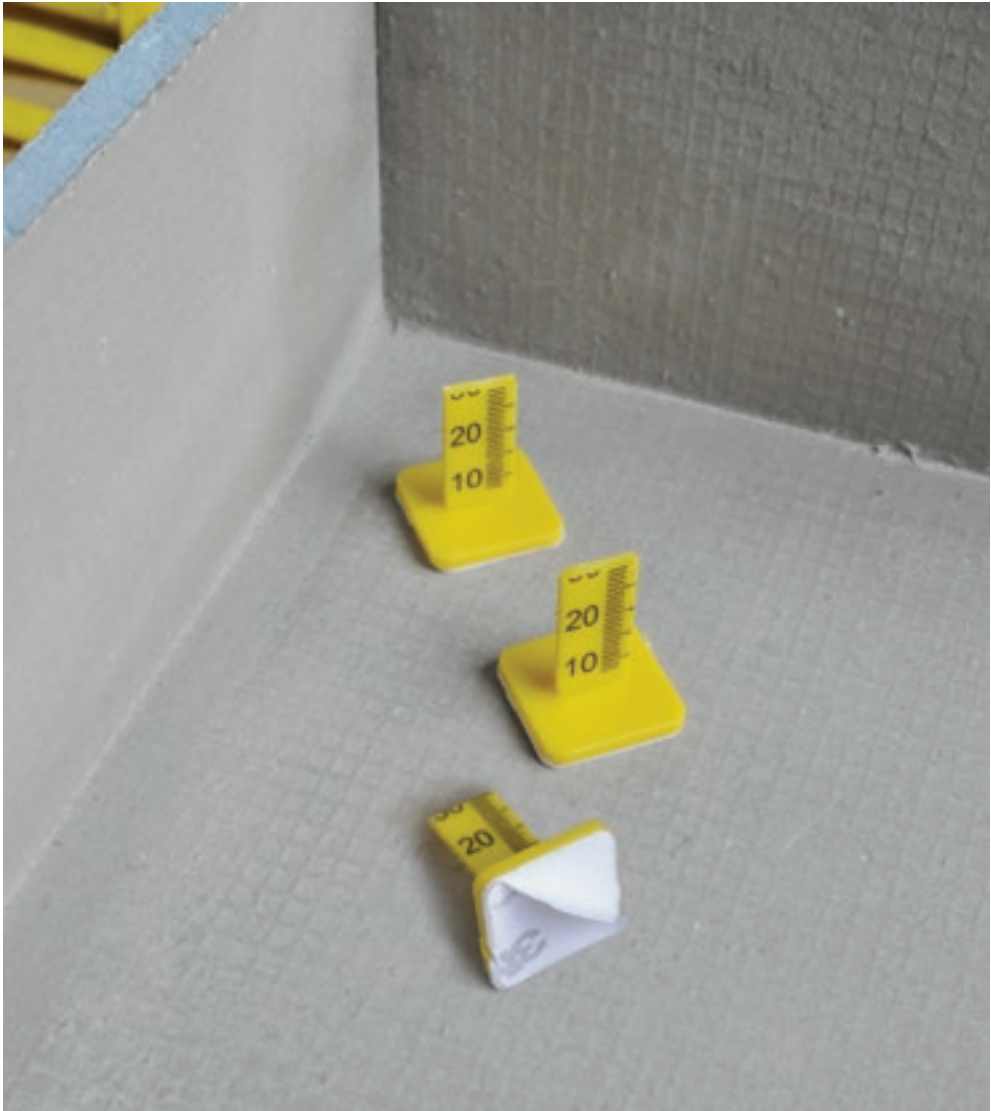

Tile spacer pegs are used as an alternative to spacer crosses to evenly space out wall tiles for an even grout line.

- ✓ These tile spacer pegs are 2mm in diameter and have a hollow section.
- ✓ Spacer pegs must be removed before grouting.

CODE	BARCODE	SIZE	PK QTY

LEVELLING SYSTEMS &
TILE SPACERS

Plastic, self-adhesive height measurement pins for use with self levelling screed.

- ✓ Using these levelling pegs is a very time & cost effective way of building new subfloors or levelling old uneven floors.
- ✓ High adhesive strength. Engineered to stay straight up and locked in place during a pour.
- ✓ Easy to read 10-100 millimeter scale.
- ✓ No holes to drill.
- ✓ Bright yellow colour making them easily visible.

CODE	BARCODE	SCALE	DESCRIPTION	PACK SIZE
FLP887	5019788008875	10-100mm	floor levelling pegs	200 pcs

2MM TRADE TUB

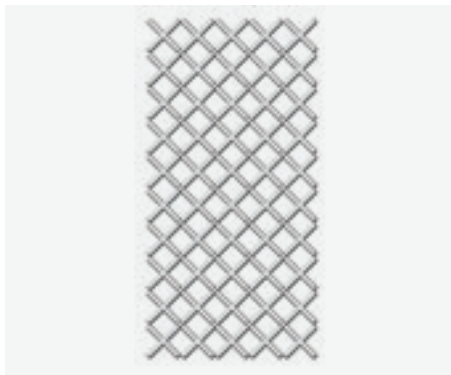

10,000 2mm tile spacers in a handy 5 litre bucket. These tile spacers ensure your spaces are even and give a professional look to the finished installation.

- ✓ Spacer width is a personal preference however traditionally 2mm is used for walls.
- ✓ Leave in and grout over or remove as desired.

DRILLS & HOLE SAWS

DRILLS & HOLE SAWS

WE STOCK A RANGE OF DRILL BITS THAT CAN EASILY PENETRATE PORCELAIN AND GLASS TILES IN WET OR DRY CONDITIONS.

Our traditional spade tip and non-slip tile drills are for use in dry conditions and are suitable for more traditional tile types such as Ceramic, Glass, Terracotta, Quarry & Slate. These drill bits are designed to fit into any standard drill chuck.

Diamond is the most effective material to cut harder tile types such as Porcelain, Marble Granite And Travertine. We supply a wide range of high quality Diamond tipped hole saws, for use in both wet & dry conditions to fit both standard chuck and M14 fittings.

In this section....

- ✓ M14 Dry cut diamond hole saws & accessories.
- ✓ Dry cut Diamond hole saws for use in any standard drill.
- ✓ Wet cut Diamond hole saws.
- ✓ Diamond drilling accessories.
- ✓ Non slip & traditional tile & glass drills.

NEW M14 DRY CUT DIAMOND HOLE SAWS

These super strong brazed diamond hole saws make drilling holes in Porcelain, Marble, Granite & Travertine tiles quick & easy.

- ✓ For best results use with the Tile Rite Angle Grinder (AGR260) at Max RPM 6000-11000.
- ✓ The M14 to 3-Jaw chuck adapter (CAD389) allows the use of Tile Rite M14 diamond drill bits to be used in any standard drill.

METAL TILE EDGE

**TILE TRIMS PROTECT AND DECORATE
TILED EXTERNAL CORNERS AND OTHER
UNGLAZED TILE EDGES PRONE TO DAMAGE.
WE OFFER A WIDE RANGE OF PROFILES
IN HIGH PERFORMANCE GRADE 6463-T6
ALUMINIUM OR G304 STAINLESS STEEL.**

Our 6463-T6 grade aluminium is low in iron and ideal for brightening & creating a lustrous finish. We anodise our trims to provide high corrosion resistance and an optimum seal to ensure years of wear and tear without milking or flaking occurring.

Our G304 stainless steel trims consist of 18% chromium & 8% nickel providing excellent resistance to corrosion & rust and are suitable for use in a wide range of atmospheric environments.

FLOOR TRIM

TILE RITE OFFER A RANGE OF FLOOR TRIMS IDEAL FOR USE AT DOOR THRESHOLDS.

These trims bridge any gaps and create a smooth transition between two flooring types.

We also offer a small selection of intermediate expansion joints. Expansion (or movement joints) must be installed in large tiled areas to prevent grout from cracking and tiles from tenting and becoming de-bonded from the substrate.

In this section

- ✓ Doorway Trims.
- ✓ Expansion Joints.

CARPET TO TILE TRIM

A screw down anodised aluminium door threshold trim that provides a clean bridge from carpet to tile.

- ✓ Anodised top screws in to an aluminium base plate with carpet grippers.
- ✓ Height adjustment from 5-12mm.
- ✓ Available in Bright Gold and Silver finishes.

DOORWAY STRIPS

This Tile Rite Doorway Strip is used to join 2 different flooring types at door thresholds.

Suitable for joining tiles to; tiles, hardwood, laminate wood, & carpet. Also suitable for joining laminate to laminate. Comes with 2 sets of clips (small & medium) that allows variable height adjustment up to 15mm.

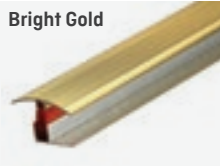

Suitable for joining tiles to; tiles, hardwood, laminate wood and carpet.

- ✓ Variable height adjustment up to 15mm.
- ✓ Allows for expansion.
- ✓ Easily fitted.

Bright Silver

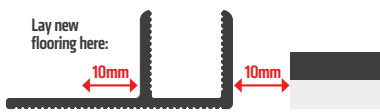

Bright Gold

TOP TIP THIS IS HOW TO FIT DOORWAY STRIPS

Leave a 10mm expansion gap either side of the base plate.

Select the appropriate clip size for the job (red/yellow), this will depend on the thickness of the floor.

Ensure pips are on the side of lowest floor height.

FLOOR TRIMS

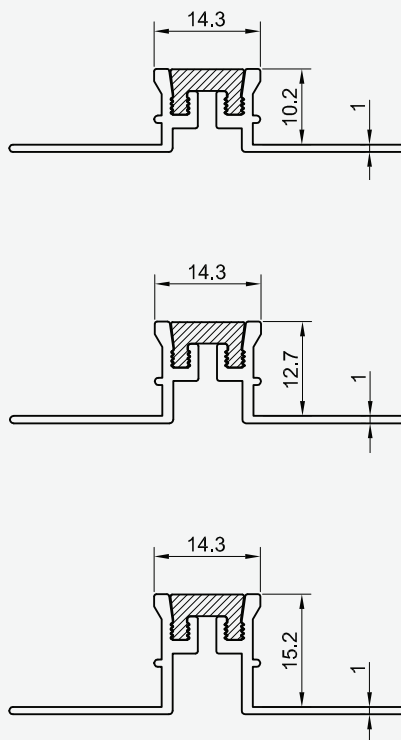

Movement joints must be installed in certain areas and positions to prevent tiles or grout from cracking... and in some cases prevent the tiles from tenting and becoming de-bonded from the substrate.

They are needed because all tiles expand and contract with temperature and moisture changes. In almost every case the substrate will move differently to the covering material.

- ✓ Intermediate movement joints for use in large tiled floors.
- ✓ Anchoring Legs - Aluminium 6063 T5.
- ✓ Flexible grey infill - EPDM with a shore hardness of 65.
- ✓ Infill removable & replaceable.
- ✓ Ability to absorb movement exceeds 20%.
- ✓ 2.5m Lengths.

BS5385. For a large tiled area with a dimension greater than 10m between perimeter joints, intermediate joints should be used to divide the floor into fields no greater than 10 x 10m. Each field should be kept as square as possible and sides should not exceed a size ratio of 2:1.

RCG831	5019788008318	WHITE	30mm	30mm	90°	3m

VINYL TO TILE CAPPING

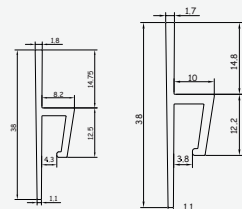

Tile Rite Vinyl to Tile Capping provides a neat transition between Vinyl Flooring & Ceramic Tiles.

These profiles allow the floor covering to be continued up the wall for a neat and clean finish in wet and sanitised areas such as in bathrooms, wet rooms, changing facilities and kitchens etc, where ease of maintenance and hygiene are important. Can be used in conjunction with Altro, Linoleum and vinyl flooring.

- ✓ Available in 8.2mm & 10mm ledge depths.
- ✓ 2.44m lengths.
- ✓ Colour options available: White & Black.

PVC TILE EDGE

BATH TRIMS

TILE RITE OFFER DURING AND AFTER TILING SOLUTIONS FOR FINISHING AROUND YOUR BATH, SHOWER & KITCHEN WORK TOPS.

These trims provide a neat finish, hide joins & gaps between tiled surfaces and cover mouldy or unsightly silicone.

Within this section

- ✓ Bath & Kitchen Cove (after fit).
- ✓ Budget bath trim (after fit).
- ✓ Flexible bath seal (after fit).
- ✓ Heavy duty bath trim (before fit).

BATH & KITCHEN COVE

This ceramic effect trim hides the join between tiled surfaces around baths, showers & worktops.

It has a unique glazed ceramic effect to complement high gloss tiles and is easily applied with self-adhesive tape or silicone sealant.

TILE CUTTING MACHINES

TILE CUTTING MACHINES

TILE RITE OFFER A RANGE OF TILE CUTTING SOLUTIONS TO COMPLETE ANY TILING PROJECT FOR THE PROFESSIONAL OR DIY USER.

Our electric machines are suitable for wet tile cutting and range from our small portables to our large bench style cutters. Electric tile cutters are ideal to cope with a wide variety of cuts including straight & angled, profile & diagonal cuts, pipe cuts, inset cuts and mitre cuts.

If it is just straight tile cutting you need, we offer a variety of small bed manual tile cutters suitable for traditional tile types, and we also offer large bed tile cutters suitable for cutting large format porcelain tiles.

Within this section

- ✓ Bench Cutters.
- ✓ Portable tile cutters.
- ✓ Angle grinder.
- ✓ Replacement blades.
- ✓ Diy manual tile cutters.
- ✓ Professional manual cutters.
- ✓ Replacement wheels.

NVTC BENCH CUTTER SERIES

These stone cutting machines are designed exclusively for wet cutting Ceramic, Marble, Clinker, Porcelain etc; and come fitted with a continuous rim diamond blade.

They have a tilting radial arm that allows cuts at 45 degrees. Special diamond discs are required for machining granite, fine stoneware and glazed tiles.

IMPORTANT: Designed exclusively for wet cutting; Suitable for private and professional use.

- ✓ This is a Professional Tile Saw with integral water tank.
- ✓ Included with the saw is a blade guard, spanner and dual feed submersible water pump.
- ✓ Direct drive motor.
- ✓ Bevel cuts 0-45 degrees.
- ✓ Rubber non-slip bed.

POWER MIXERS & ACCESSORIES

POWER MIXERS & ACCESSORIES

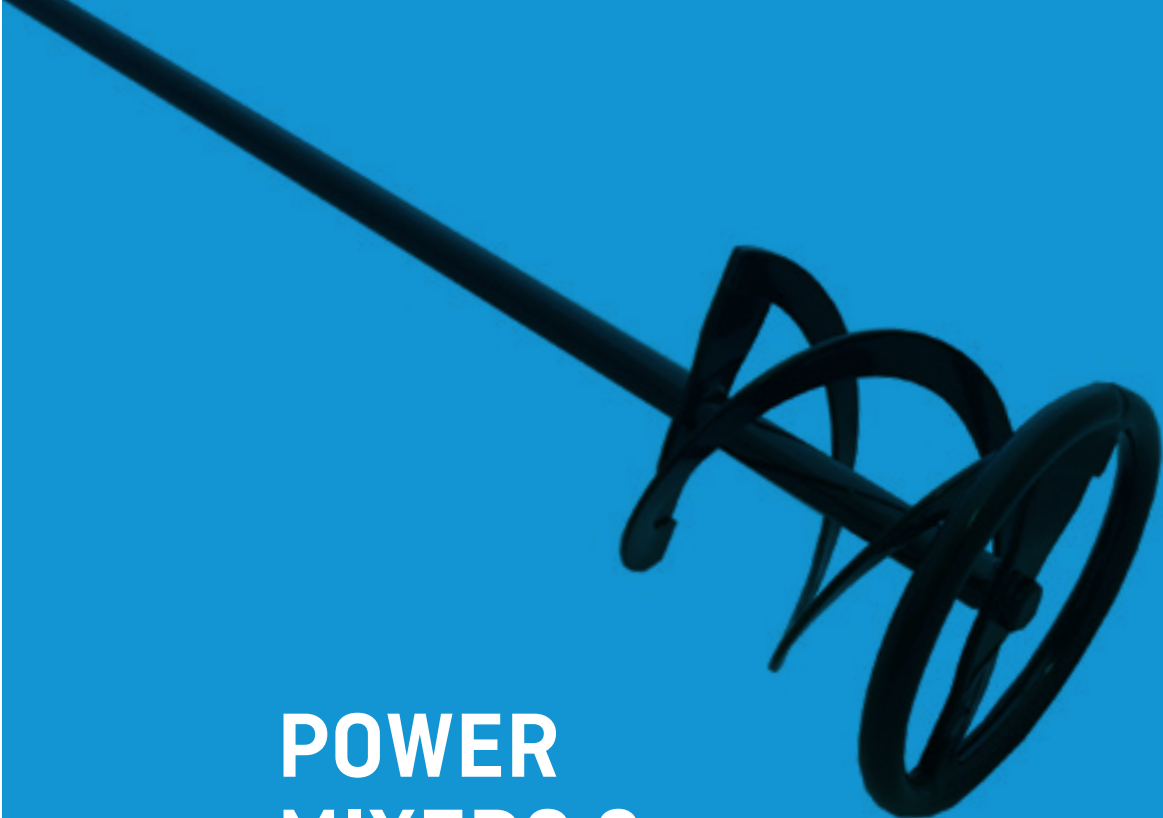

TILE RITE OFFER A SMALL RANGE OF ELECTRIC MIXERS AND PADDLES WITH SPECIFIC HEADS FOR DIFFERENT MATERIALS.

Our range of mixing paddles include mixing paddles for drills that have a hexagonal arm (for drills or mixer with a chuck) and M14 connection, for use with most electric mixers.

With the proper mixing paddle, you will be able to mix a variety of materials, such as mortar, plaster, paint or epoxy resins, allowing you to reach the mixing requirements of the manufacturers.

Within this section

- ✓ Electric Mixer.
- ✓ Replacement Paddles.
- ✓ Flexi Bucket.

1050W TILE RITE POWER MIXER

230V Electric power mixer for mixing cement, plaster, grout, adhesives, fillers & paint plus other mortars for construction.

- ✓ Rotation & frequency adjustment with lock on switch.
- ✓ M14 internal thread.
- ✓ 120mm 2-part mixing paddle.
- ✓ 3 blade propeller head design has a bottom to top movement to create maximum efficiency & optimum consistency.
- ✓ Head ring to preserve tank bottom.

POWER MIXERS & ACCESSORIES

PRO MIXING PADDLE

This screw spiral paddle with protective rim, turns and lifts the mix from bottom to top; it is the most effective paddle for heavier mortars, epoxy, render and screed.

- ✓ Protective rim will not damage your tub.
- ✓ Hexagonal steel handle for use with an electric power drill.
- ✓ Size: 100 x 10 x 600mm.

CODE	BARCODE	SIZE	USE WITH
TMP164	5019788001647	100 X 10 X 600MM	ELECTRIC POWER DRILL

MIXING PADDLE SMALL

This paddle will help produce a low splash mix with the twin propeller paddles producing a parallel mix action helping to blend and spread the materials used.

- ✓ Ideal for mixing powder adhesive, plaster & paint.
- ✓ Hexagonal steel handle. Size: 80 x 8 x 400mm.
- ✓ For use with any standard power drill.

CODE	BARCODE	HANDLE	HANDLE SIZE	BLADE SIZE
MPS158	5019788001586	hexagonal steel	80x8x400mm	255x25.4mm

TILE RITE FLEXI BUCKET

With its large 38 Litre capacity and flexibility, this tub is ideal for a variety of uses including mixing, carrying rubble, tool storage and more!

- ✓ Made from 100% recycled material.
- ✓ Frost & UV resistant.
- ✓ Flexible but extremely strong.
- ✓ 100% phosphate free.
- ✓ Dimensions: H:33cm Dia:45cm.

CODE	BARCODE	HEIGHT	DIAMETER	CAPACITY
TFB285	519788002859	33cm	45mm	38 litres

HAND CUTTING TOOLS

IN THIS SECTION YOU
WILL FIND A SELECTION
OF HAND CUTTING TOOLS
AND ACCESSORIES FOR
CUTTING AND SHAPING
TILES AND TILE TRIM.

Within this section

- ✓ Tile Nippers.
- ✓ Trim Cutters.
- ✓ Scibes & Saws.
- ✓ Tile Shaping Tools.
- ✓ Replacement Blades.

PARROT NIBBLER

Designed to trim and shape glazed wall tiles up to a tile thickness of 8mm.

- ✓ The parrot shaped tungsten carbide jaws are shaped to give a greater degree of control so is suitable for more intricate work.
- ✓ 190mm (7 1/2") drop forged tile nipper commonly used on mosaic tiles.

CODE	BARCODE	SIZE	DESCRIPTION
PNB550	5019788005508	190mm drop forged	parrot nibbler

HEAVY DUTY QUARRY TILE NIPPER

Designed to nibble narrow strips and shapes from wall or floor tiles up to a maximum tile thickness of 12mm.

- ✓ 255mm (10") heavy duty tile nippers with a drop forged body and carbide tipped straight jaws.
- ✓ PVC handles.

CODE	BARCODE	SIZE	DESCRIPTION
QTN548	5019788005485	255mm drop forged	heavy quarry nipper

TITANIUM WHEEL TILE NIPPER

Designed to make ease of nipping tile, glass, ceramic & mosaic to high precision.

- ✓ Fitted with 22mm titanium cutting wheels.
- ✓ Will cut up to a maximum tile thickness of 12mm with minimal crushing and splintering.
- ✓ Easily cuts moulded tile into quarters, halves and triangles.
- ✓ Great for nipping up small pieces of stained glass.
- ✓ Soft grip double dipped handles for comfort.

CODE	BARCODE	SIZE	DESCRIPTION
TWN284	5019788002842	up to 12mm thick	titanium wheel tile nipper

FOR BEST RESULTS:

Get replacement wheels: 22 x 6 x 2mm Tungsten Carbide Cutting Wheel ref: DSW331P

COMFORT GRIP TILE NIPPER

Professional tile nipper designed to nibble narrow strips and shapes from wall or floor tiles; cuts up to a maximum tile thickness of 10mm; double dipped handle with comfort grip; It is well worth while spending a little time when cutting shapes into a tile.

Firstly, draw up a template of the tile to be cut. When using a tile nipper, you should aim to cut a small piece at a time, as trying to cut too much at one time may lead to the tile breaking. Begin by cutting in from the edge of the tile and work towards the lines you have marked. As you get closer to any corners that need to be cut work from the outside of the tile towards the corner. Clean out the corner carefully, using a tile file if necessary.

- ✓ Designed to nibble narrow strips and shapes from wall or floor tiles up to 10mm thick.
- ✓ Double dipped handle with comfort grip.

CODE	BARCODE	SIZE	DESCRIPTION
CGN363	5019788003634	for tiles up to 10mm thick	comfort grip tile nipper

TILE NIPPER

Designed to nibble narrow strips and shapes from wall or floor tiles up to 12mm thick.

- ✓ 205mm (8") drop forged tile nipper with classic carbide tipped straight jaws.
- ✓ PVC handles.

CODE	BARCODE	SIZE	DESCRIPTION
TN513	5019788005133	205mm drop forged	tile nipper

PRO TILE NIPPER

Designed to nibble narrow strips and shapes from wall or floor tiles up to 12mm thick.

- ✓ 215mm (8 inches) drop forged tile nippers.
- ✓ double dipped comfort grip handle.
- ✓ 'V' type spring.

CODE	BARCODE	SIZE	DESCRIPTION
GTN163	5019788001630	for tiles up to 12mm thick	professional tile nipper

ADHESIVE TROWELS

84

ADHESIVE TROWELS

TILE RITE OFFER A RANGE OF ADHESIVE TROWELS WITH CARBON STEEL, HIGH CARBON STEEL & STAINLESS-STEEL BLADES AND 3 HANDLE TYPES, PLASTIC, WOOD AND COMFORT GRIP TO SUIT ALL BUDGETS AND PREFERENCES.

A general guide to notched trowels

The mm size of the notch roughly equates to the inches of tile being fitted plus another 2 inches (for example 6mm notch = 6-8 inch tile). This general rule of thumb, can change according to the surface you are tiling onto. If the surface is not flat then you can increase the notch to the next size up.

3mm trowels are often used for fixing mosaic tiles as this produces a very thin bed of adhesive which means that there is less chance of the adhesive coming through the tiles when fixing.

For floor tiling a minimum of 10mm trowels would be used to ensure there is enough contact on the back of the tile to eliminate voids. It is always better to use a larger trowel than you might need, as more adhesive beneath the tile is completely acceptable, whereas not enough adhesive is not.

When trowelling your adhesive make sure you trowel at an angle of 45 degrees and press hard scraping the wall or floor only to leave the notch of adhesive. When placing a tile move it out 5mm then back to make sure your adhesive gets a good contact with the tile.

Within this section

- ✓ Stainless Steel Trowels.
- ✓ Professional Carbon Steel Trowels.
- ✓ Economy Steel Trowels.
- ✓ Adhesive Spreaders.
- ✓ Bucket Trowels.

STAINLESS STEEL TROWELS

6 x 6 x 6mm

Tile Rite square notched trowels are used for laying down tile adhesive ready for tiling.

The Stainless-Steel blade is rust and corrosion resistant offering tilers a reliable and durable option. Cast aluminium handle is 6 spot rivet mounted and finished with a U curved comfort grip.

ADHESIVE TROWELS

HIGH CARBON STEEL TIGER NOTCH TROWEL

The Tiger trowel is a dual depth trowel offering 100% adhesive coverage. Suitable for use when fixing 300x300mm (12") tiles and over and ideal with flexible adhesive and fixing tiles in wet areas.

The unique notch design allows for easier bedding of tiles and reduces the need to 'back butter'.

- ✓ Dual depth trowel offering 100% adhesive coverage.
- ✓ Suitable when fixing 300x300mm tiles and over.
- ✓ Ideal for use with flexible tile adhesive & fixing tiles in wet areas.
- ✓ The unique notch design allows for easier bedding of tiles and reduces the need to 'back butter'.
- ✓ Aluminium handle with wood grip.

CODE	BARCODE	BLADE SIZE	NOTCH TYPE	COMMON USAGE
TIG688	5019788006888	280 x 115mm	tiger dual depth	fixing tiles 300x300mm and over

HIGH CARBON STEEL ROUND NOTCH TROWELS

U notched trowels create a U-shaped ridge in the tile adhesive, this causes the adhesive to spread out from the bottom when embedding a tile, so the probability of trapping air is less, thus ensuring a better coverage beneath the tile.

This makes the U notch trowels a preferred choice when tiling in wet areas where the adhesive coverage should be between 95-100%.

U notched trowels also make it easier to keep adhesive out of the grout lines as you embed the tile.

ADHESIVE TROWELS

GAUGING TROWEL

The Gauging trowel has a rounded tip and a v-shaped back. It is used for gauging, or mixing in specific proportions, typically when you desire to mix small amounts of a quick-setting thin set, mortar, or drywall compound.

- ✓ Specialist trowel for gauging application of wall adhesive prior to serration.
- ✓ High carbon stiff steel blade.
- ✓ Aluminium handle with wood grip.

CODE	BARCODE	SIZE
GT525	5019788005256	178mm

LARGE BUCKET TROWEL

The tilers flat bottomed bucket trowel is used to remove unmixed and unused adhesive from the side of a mixing bucket. The flat nose ensures that it gets right into the corners of the mixing bucket to shift the unmixed compound that a mixer cannot reach.

- ✓ High carbon steel blade.
- ✓ Aluminium handle with wood grip.

CODE	BARCODE	SIZE
LBT276	50197880012767	200x88mm

SMALL BUCKET TROWEL

Tilers flat bottomed bucket trowel used for removing grout and adhesives from the base of a bucket.

- ✓ High carbon stiff steel blade.
- ✓ Aluminium handle with wood grip.
- ✓ Dimensions 127 x 60mm.

CODE	BARCODE	SIZE
BT135	5019788001357	127x50mm

6MM SQUARE NOTCHED MARGIN TROWEL

Ideally used for the application of tile adhesive in restricted areas and corners. The 6mm square notches create a suitable bed for 6-8-inch wall tiles on to smooth surfaces in dry areas.

- ✓ High carbon steel blade.
- ✓ Aluminium handle with wood grip.

GROUT CLEANING

GROUT CLEANING

TILE RITE OFFER A RANGE OF TOOLS SPECIALLY DESIGNED FOR CLEANING UP AFTER TILE INSTALLATIONS.

Washboys are great when cleaning up large tiled areas, the 23litre bucket has a metal or plastic grid, this decants the excess grout and leaves clean water above it to clean your sponge. The rollers remove excess water from your float, so you don't end up soaking your grout joints!

Our coarse emulsifying pads are great for removing stubborn films, stains & grout residue and our white emulsifying pads are great for cleaning & polishing.

We also offer a variety of specially formulated sponges to suit your preferences.

Within this section

- ✓ Washboy Sets & Accessories.
- ✓ Emulsifying Pads & Accessories.
- ✓ Squeegees.
- ✓ Sponges.

WASHBOY SET C

Makes cleaning off excess wall & floor grout from tile installations quick & easy.

- ✓ 23 Litre black plastic bucket with wheel castors.
- ✓ Grip moulded handle.
- ✓ Heavy duty twin roller system.
- ✓ 1 x segmented sponge float (285 x 140 x 30mm).
- ✓ 1 x removable plastic grid.

CODE	BARCODE	SIZE
WBS231	5019788002316	23 litres

DID YOU KNOW?

ALL OF OUR SPONGES ARE SPECIALLY FORMULATED TO RETAIN LESS WATER SO THAT GROUT LINES DON'T BECOME TOO SATURATED.

CLEAN & SEAL RANGE

MOST TILES REQUIRE CLEANING PRIOR TO SEALING, THIS ENSURES THAT THE TILES ARE IN OPTIMUM CONDITION BEFORE THEY ARE SEALED.

Tile Rite supply a range of cleaners for different applications from removing mould & blackspots to removing heavy duty specialist coatings such as acrylic & polyurethane.

Most natural tiles are porous and need to be sealed to prevent staining. Seal prior to grouting to protect against grout stains. Apply a further 1-2 coats of sealer after installation to prevent every day stains & spills.

Tile Rite offer a variety of sealing solutions, as a general rule, use a solvent based impregnator for polished or finely-honed surfaces and a water-based impregnator for porous tiles.

Within this section

- ✓ Cleaning Products.
- ✓ Sealing Products.

BOUTIQUE LUXURY TILE TRIMS

— RANGE — **coming soon...**

The boutique range offers unique on trend finishes that will complement modern tile designs and bathroom & kitchen fixtures & fittings.

For use surrounding a window frame, part tiled walls, external corners and surrounding a splash back. Designed to attractively finish tiling installations and protect unglazed tile edges prone to impact and damage.

Available in 7 finishes: Brushed Silver, Brushed Black, Embossed Silver, Brushed Copper, Bright Copper, Brushed Gold and Bright Gold

EVERYTHING BUT THE TILES!
