SAFETY KEY

SAFETY STANDARDS SHOWN BELOW AND ON FOLLOWING PAGES MEET BOTH CE AND UKCA REQUIREMENTS FOR CERTIFICATION

- EN ISO 20345:2011
- Toe protection tested with 200J impact and 15kN compression force.
- Fuel Oil resistant outsole. (SB)
- A Antistatic Electrical resistance between 100kΩ and 1000MΩ
- P Penetration resistant outsole of 1100 Newtons
- E Heel energy absorption 20 Joules
- HRO Heat Resistant to 300°C for 60 seconds
- SRC Anti slip tested on ceramic tile wetted with dilute soap solution and smooth steel with glycerol
- WRU Water resistant leather uppers
- CI Cold Insulation Certified to -17°C for 30 minutes
- AN 10J ankle impact protection
- HI Heat Insulation Certified to +150°C for 30 minutes
- Short code combinations:
- S1 SB + A + E + Closed seat region
- S2 As S1 + WRU
- S3 As S2 + P + Cleated outsole
- S5 As S3 except uppers are in rubber or all polymeric material
- ESD Electrostatic discharge Class 2 – Dissipative
- EN388 covering protective glove construction, abrasion and blade cut resistance, tear strength and puncture resistance.

GUARANTEED WATERPROOF

Two out of three Buckbootz safety footwear styles are **waterproof**.
Guaranteed Waterproof.

The Buckbootz products whose very existence is dedicated towards keeping feet dry is of course **BBZ**. And not only dry but snug and cosy in a comfort combination no alternative wellie construction can match.

Since those pioneering research and testing years of the early noughties, **BBZ's** have gone on to blaze a trail and bring added value and performance to a sector which hitherto had a focus on cheap without cheerful.

On pages 4 and 5 you will see the two new BBZ8000 colourways we flagged up earlier in 2022. These have attracted a great amount of attention and are available for delivery now.

RECORDS BLITZED

Amongst the Buckbootz waterproof leather styles is the shooting star of 2022, **Blitz** which is part of our Tradez product grouping.

Blitz (pages 16-17) and **BangGuardz** (pages 14-15) have blown away the record book for popularity since launch.

These boots tick all your boxes. They project that special Buckbootz blend of quality, rugged good looks and premium products at affordable prices which prompted the CEO of a significant independent national Buckbootz dealer to remark recently that *"You guys have a very special place in the market."*

PRICE AWARENESS

The reference to 'affordable prices' above takes us to a point which we always have to drive home: there are Buckbootz products **with RSPs on the £60+mark**. Ten in all across the **BuckzViz, Tradez** and **Nubuckz** ranges and all with the no-corners-cut Buckbootz approach to quality.

VAT/Safety Footwear

Safety footwear styles with the exception of shoe styles are exempt from UK VAT. Safety shoe styles and non-safety work boots are subject to VAT at the UK standard rate. If you are purchasing safety footwear on behalf of your employer then VAT should apply at the point of purchase.

PIONEERS AND LEADERS

No safety footwear brand has done more than Buckbootz to design, develop and promote hi-vis safety footwear as an essential element in personal safety in the workplace.

BuckzViz and **BBZ8000** are recognised as the industry's originals and leaders in hi-vis and reflective safety footwear. Hi-vis is a life saver all year round but when the darkness of autumn and winter descend on outdoor working environments they became dangerous places and the Buckbootz BuckzViz and BBZ8000 hi-vis plus reflective combination adds vital 360° visibility to a host of other safety and comfort features. Go to page 8 for a spring 2023 launch preview of **two great new BuckzViz products** which now incorporate ankle protection, then to info@buckbootz.com to let us have your reaction.

CHAMPIONING PERSONAL SAFETY

Championing Personal Safety in outdoor working environments since 1998. That's where we came from and that's what drives the Buckbootz relentless quest to bring you great products, new developments and great value.

Stay warm, dry and safe in the autumn and winter seasons.

Kind regards,

Andrew Duncan

Andrew Duncan
Chairman and Co-founder, Buckler Boots Ltd

PS. We even think of extra safety when you are walking the dog. Go to page 31 for a preview of a great new BBZ non-safety product scheduled for 2023 launch.

BBZ BUCKBOOTZ SAFETY S5 HRO CI HI AN SRC

BBZ 8000. The new generation neoprene/rubber EN/UKCA S5 Safety Boot

BBZ 8000 BK YL

BBZ BUCKBOOTZ SAFETY S5 HRO CI HI SRC

BBZ 6000. The original neoprene/rubber EN/UKCA S5 Safety boot

BBZ 6000

The trail blazing safety wellington, created and developed by Buckbootz and introduced to the UK market in 2008.

BBZ 6000 was the first ever neoprene/rubber safety boot to be produced to EN S5 safety standards and brought hitherto unknown levels of fit and comfort to this type of footwear.

Now specified by national organisations and individual users across the country and across a host of industries and services. BBZ 6000 is available in four colourways including the signature blue/orange combination.

BBZ Buckbootz are also available in non-safety specification - see page 31 for details.

Buckbootz leather styles

Both our **Beezwax Leather Spray** and **Leather Gel** bring nourishment to the cowhide leather uppers on Buckbootz footwear.

The gel brings the satisfaction of applying the leather treatment by rubbing goodness into the leather. The spray brings ease of use and some extra water resistance. Both restore the distinctive and unique look you get from quality leathers.

Boots used in tough working environments get rough treatment but their life can be greatly extended by making sure that muck, loose dirt debris and grime are removed from the uppers at least once per week using no more than a brush and a small amount of water. Allow them to dry naturally then apply spray or gel treatment. There's no harm in applying a little spray or gel to boots before their first wearing.

Never harsh dry leather!

Wet boots should be stuffed with dry newspaper and allowed to dry naturally before rubbing Buckbootz Leather Gel into the leather. Care should be taken not to use the gel too liberally. Over exposure to gel and other conditioners can cause the structure of leather to break down irreparably.

Harsh drying will cause the leather to shrink crack and go brittle. This condition cannot be reversed.

BBZ Buckbootz Neoprene/Rubber Boots

Should be hosed down at the end of every day's wear. By virtue of their leg as well as foot protection, wellington type boots tend to be worn in environments where they come into contact with many external agents which can break down and weaken the structure of the rubber if not removed. This can lead to the rubber weakening and cracking.

Wash down with warm water after the boots have had contact with diesel, petrol, lubricants and other petroleum derivatives.

A spray called ReviveX® will help to restore the flexibility and appearance of the rubber areas but regular hosing down after use will go a long way towards extending the effective life of BBZs.

Buckz Viz Hi-Viz Cordura® areas of the uppers

Use warm water with a soft brush, allow to dry then apply Nikwax Tent and Gear spray.

Buckbootz has been at the forefront of the development of the elastic sided work boot style which we call 'dealer'. Our original dealer style safety boot B1150 has become something of an icon and has been followed by variations of the dealer style in injection moulded construction. So why introduce another variation of the theme? Well, when it comes to Buckbootz dealer style safety boots we believe you can't have too much of a good thing and that is why we introduced **Dealerz**® with plain toe styling to our Nubuckz range with the option of a non-safety specification. See page 32.

Dealerz® Safety

NOTHING MAKES A REAL
BOOT STATEMENT BETTER
THAN A BUCKBOOTZ
CLASSICALLY STYLED
GOODYEAR WELTED BOOT IN
TRIPLE STITCHED PREMIUM
GRADE COWHIDE LEATHER

B1180

From its unmistakable Buckbootz 'Hard As Nails' profile to its rugged good looking dealer boot styling **B1180** carries its Buckbootz heritage and branding with pride.

With its extended whole cut vamp and beefy heel counter this is a waterproof safety boot with gravitas and real substance.

Using construction and components designed to withstand the roughest treatment **B1180** combines strength with light weight thanks to an aluminium toecap, kevlar midsole plus the new Buckbootz K11 dual density sole. K11 lets us retain all the legendary Buckbootz rubber outsole durability and features which now include ladder grips at a weight saving which will win over a new generation of Goodyear welted safety boot wearers. With Buckbootz characteristic attention to detail we have beefed up the outer sole rubber depth at the critical heel/ground contact area.

B1180 also brings three dimensional Buckflex fitting with three flex-strength areas at the boot collar. This makes fitting and removal a stroll in the park and enables the collar to retain its neat look and snug fit at all times.

B1180 is certified to EN/UKCA standards: **SB PS HRO WR SR FO LG***.
Available in sizes 6/40 to 13/47.

*These codes embrace the updated EN20345:2022 standards

Buckbootz years of experience in developing the renowned BBZ rubber/neoprene safety wellingtons are channelled into creating what our customers tell us is the most reliable non-safety wellington boot of its type on the market.

BBZ 5020

- Knee boot
- Vulcanised K3 rubber outsole
- Detachable insole
- Sizes 5/39 to 13/47
- Suitable for Vegans
- RSP £89.10 (+VAT)

BBZ WALKERZ

We now take many of the features of our ground breaking BBZ8000 neoprene/rubber safety boots, blend them with BBZ5020 reliability and introduce some great new styling and wearer benefits to create WALKERZ. A non-safety walking welly like no other on the market. We say non-safety but in fact Walkerz sport reflective safety flashes on the uppers to give near 360° reflectivity for dog walking in the darkness.

To make them easy to pull on we raise the collar height at the back to accommodate the reinforced lever openings. Like most good ideas, simple!

Available from Spring 2023

- Sizes 6/40 to 13/47 in full sizes. No minimum quantity.
- RSP £6.50 (+VAT)

Tradex® Blitz

This great looking rubber outsole is a fitting companion for our great looking Tradex Blitz safety lace boot style. The contemporary chunky wedge cleat design is complemented by sports footwear thermo polyurethane arch and heel inserts. Certified to SRC maximum anti-slip rating and non-marking.

Nubuckz/Buckz Viz/Dealerz®

For our injection moulded Nubuckz, Buckz Viz and Dealerz styles we use a deep cleated rubber outsole specially designed to interact with the polyurethane top sole in which the anti scuff toe is an incorporated and defining feature. Heat resistant to 300°C with maximum rating SRC anti slip certification. They are long lasting with rugged good looks.

K12/BBZ8000

BBZ8000 is a great all new product from the soles upwards so it is vital that the soles incorporate the very latest tread design techniques to maximise grip, extend life and reduce weight. K12 does all of these plus it comes with SRC maximum anti-slip certification and is non-marking.

Tradex® - Baz/Kez/Guyz/Liz

Even when it comes to bringing the street look to the workplace we insist on real rubber outsoles but - our sneaker soles are different. Mindful of the need for some outsole 'dig' in some working conditions, (even with sneaker style safety footwear) we have created a sneaker sole with pronounced cleats, wave effect sipes and a slightly raised heel area without sacrificing that great looking sneaker sole side profile. Comes with SRC maximum anti slip test certification too. Clever, good looking and non-marking.

K3

The renowned Buckbootz sole for Goodyear welted leather styles and BBZ6000 and BBZ5020 neoprene/rubber footwear. Features weight saving wave effect sipes and inherits K2's rugged long life characteristics whilst also achieving SRC maximum anti slip test certification. Looks good too.

Buckshot

Buckshot is featured on our injection moulded Buckshot boot range. It has some of the best anti-abrasion test results achievable. A great looking sole with wave effect sipes, deep cleats and all the outsole benefits which come with rubber plus SRC maximum anti-slip test certification.
