

Plastic Pipe Valves (PPV)

Edition 1

The definitive guide to Plastic Pipe Valves

Plastic Pipe Valves (PPV)

Maximum versatility, minimum fuss – your total solution for plastic

Only Myson Controls offer a complete range of plastic pipe valves that fit all manufacturer's BS 10mm and 15mm tube.

The Myson PPV range of both thermostatic and manual radiator valves has been designed in conjunction with heating engineers, national house builders and plastic pipe manufacturers. This has resulted in versatile and attractive ranges with both 'Pushfit' and compression connections specifically for use on central heating systems where plastic pipe or copper has been specified. Up, down, back, front, left, right, vertical or horizontal the Myson Controls PPV range covers them all.

Introducing the new Integral Pushfit 90

The latest addition to the Myson PPV range is the Integral Pushfit 90. This will be available for chrome TRV's, Matchmaster and the new slimline decorative range.

- **Attractive design**
- **Integral all in one valve – no separate elbow**
- **Double EPDM 'O' ring for added security**
- **Impact resistant connection, with flexibility for life**
