In the unusual event of this product tailing mechanically, we will replace it free of charge, providing you can supply us with the taulty product and a receipt to show proof of purchase. If the items are not Fited in accordance with the Fiting instructions, in a correct application, this may not apply.

Products have an opplied thish, and we do recommend regular cleaning with a soft cloth. It necessary, you may maister the cloth, with water. It this is not effective in removing accumulated deposits, try using a PH-neutral scop on a soft cloth, then remove the scop immediately after application, with the help of a clean, moist, soft clain. Under no direcomstances should you use an asrasive/hard cool, chemicel, acide or obtasive substance, a clean, hese products. This will break down the applied thish. The thish may able or scratch it subjected to impact from sharp items such as keys and jewellery. At antic UK retains the right to send items away for chemical resting to analyse if the product has come into contact with any abrasive or chemical substance before issuing replacements.

Please be aware that in environments where there are high concentrations of chemicals in the dir, for example from the use of low-quality paint or corrosive agents, corrosion and damage may occur to the surface of the product. Products should therefore not be fitted in such environments, until the high concentration of chemicals in the circhas subsided.

the finish matters
