BREWER COWLS

Brewer Aerodyne Clamp model

Fitting instructions

IMPORTANT: THE AERODYNE IS FOR SOLID FUEL USE ONLY

- Fits 150-240mm (6 - 9½ ") internal pot sizes
- Suitable for live or unused chimneys
- Stops downdraught fast
- Economical
- Other models available
- Available painted (terracotta, buff or black) or unpainted finish
- Simple, fast and secure fitting
- Can be fitted with an optional Birdguard mesh

About the Brewer Aerodyne cowl

Guaranteed
The Brewer Aerodyne cowl is guaranteed – satisfaction or your money back.

Efficiency
The Brewer Aerodyne cowl offers a high level of efficiency through its unique aerodynamic design, whatever the wind direction.

Construction
The construction of the Brewer Aerodyne cowl utilises a riveted, hardened aluminium alloy.

Benefits of a Brewer Aerodyne
Years of proven effectiveness at eliminating downdraught on most appliances burning solid fuel.
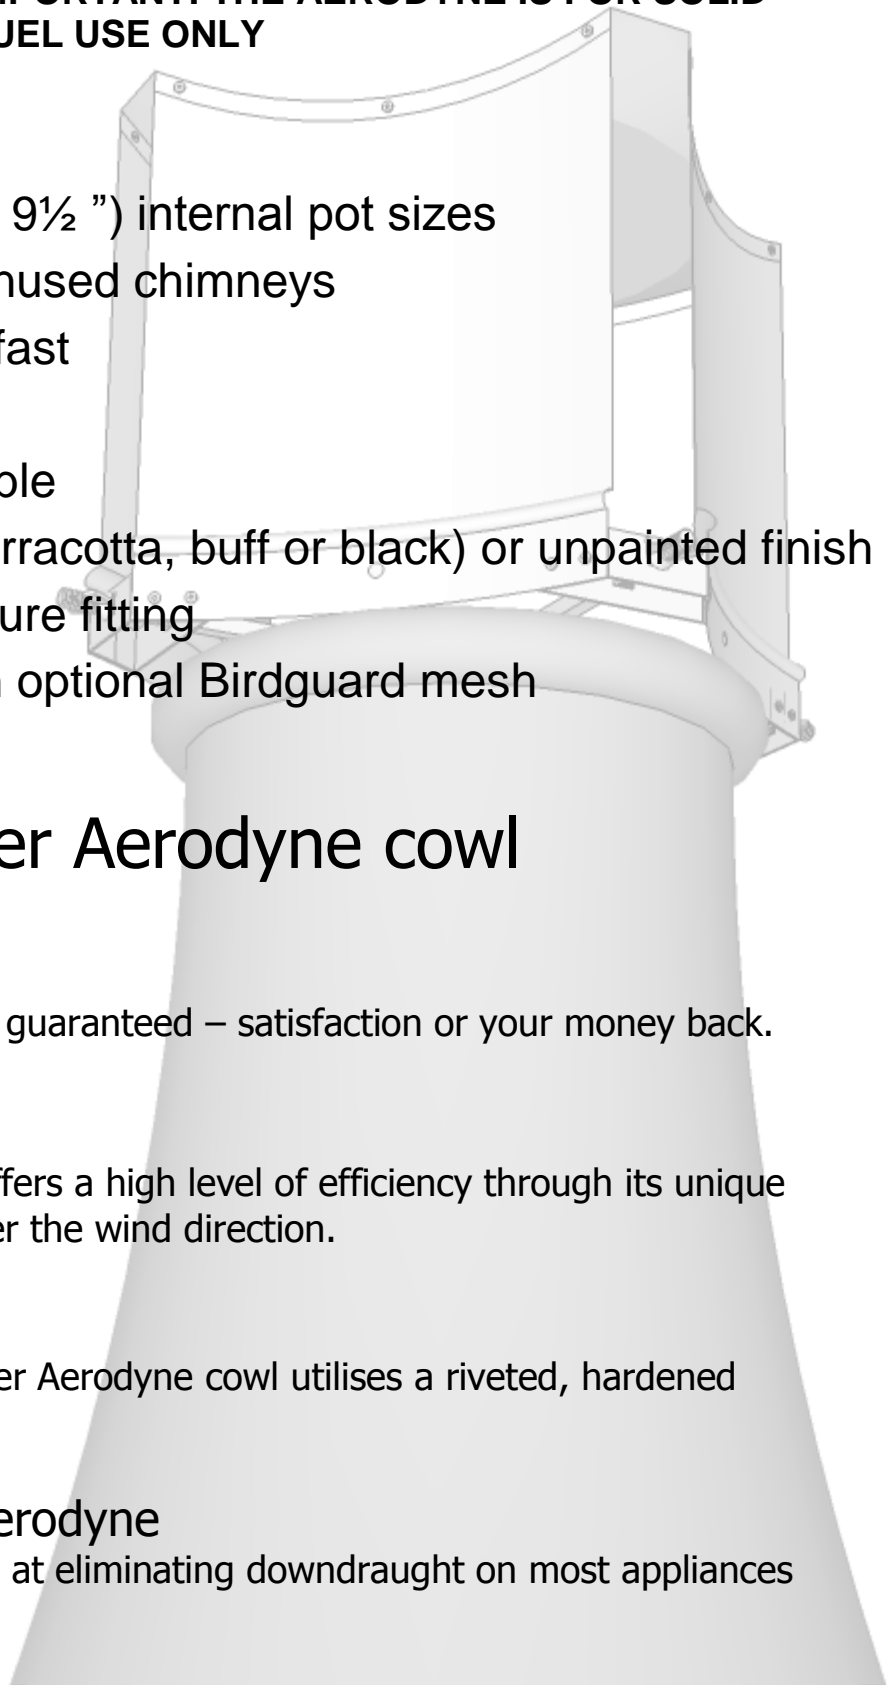

IMPORTANT: THE AERODYNE IS FOR SOLID FUEL USE ONLY

Ensure you have the correct model of terminal to match your application.

To fit the Aerodyne:

1. With the Aerodyne unpacked (Fig1), unscrew the wing nuts from the hook bolts.
2. Remove the hook bolts, rotate and refit them into the Aerodyne (Fig2).
3. Partly screw the wing nuts onto the hook bolts (Fig2).
4. Lower and centralise the Aerodyne onto the chimney (Figs 3&4)
5. Alternately tighten the wing nuts in equal amounts until the Aerodyne is securely fixed in place.
